*Jung and Steiner* Gerhard Wehr, 2003-02 All descriptions of the past are in the present therefore history tells our descendants more about us than it does about the imaginary creatures we like to call our ancestors All of which is only another way of saying that the past and the future do not exist nevertheless we need these narrative fictions for we gain knowledge by looking backward at patterns and forward in anticipation of the results of our actions William Irwin Thompson With the threat of global climate change a looming mass extinction of species and increasingly complex and volatile geopolitical relations the entire Earth Community has entered a most critical phase of what the author describes as the Planetary Era This era began some five hundred years ago with the conquest of the Americas and the Copernican revolution in cosmology but it is just now becoming a defining feature of human consciousness on a global scale How did the Planetary Era come about and why was it initiated in the European West What elements in the evolution of the Western worldview might contribute to the actualization of a sustainable planetary culture Drawing from a wide range of panoptic or big picture thinkers from Hegel Teilhard Jaspers and Campbell to Ken Wilber Richard Tarnas and Edgar Morin among others the author answers such questions and presents his own synthetic theory of the evolution of consciousness leading to the birth and transformation of the Planetary Era Beginning with a consideration of the fundamental pattern of world history Sean Kelly reveals the role of a Great Code and the turning of a tightening spiral in the evolution of the past two millennia of Western and increasingly planetary consciousness Along with a vision of the path that has lead to our vexed and complex present the author offers reason to hope that we are on the threshold of a new countercultural resurgence a new planetary wisdom culture that could signal the homecoming for which our troubled world so desperately longs Freud, Jung, and Spiritual Psychology Rudolf Steiner, 2001-05 12 Lectures Leipzig September 2 14 1908 CW 106 Rudolf Steiner emphasizes the astonishing and special relationship between our own time and that of ancient Egypt how in the natural rhythm of the ages the so called third post Atlantian Egyptian epoch is mirrored by the fifth present epoch In this sense today it is especially relevant to look at ancient Egypt with fresh eyes The evolution of Western civilization has been profoundly influenced by Egyptian myths through the Greek mysteries Because of other influences however this heritage has degenerated thinking has mummified and and myth has all but disappeared Consequently it is important to revive the seed of goodness passed down to us from ancient Egypt Through true imagination it is our task to renew human knowledge related to the creative forces in nature which the Egyptians attempted through the Osiris Isis myth and the Greeks through the myth of Demeter This is what Rudolf Steiner attempts in this lecture cycle Steiner's subjects include experiences of Egyptian initiations esoteric anatomy and physiology the stages of evolution of the human form and much more The final lecture is on the Christ impulse as the conqueror of matter This volume is a translation from German of *gyptische Mythen und Mysterien im Verh ltnis zu den wirkenden Geisteskr ften der Gegenwart* GA 106 Freud, Jung, & Spiritual Psychology Rudolf Steiner, 2001 A collection of

talks on Psychology CW 143 178 205 In these five talks Rudolf Steiner laid out the foundations for a truly spiritual psychology The first two lectures take a critical look at the principles of Freud and Jung s early work The last three lectures describe the threefold structure of human consciousness and then outline a psychological approach that considers both the soul s hidden powers and the complex connections between psychological and organic bodily processes Robert Sardello codirector of The School of Spiritual Psychology contributed an important and provocative introduction from the perspective of a practicing psychotherapist CONTENTS Introduction by Robert J Sardello Anthroposophy and Psychoanalysis part 1Dornach November 10 1917 Anthroposophy and Psychoanalysis part 2Dornach November 11 1917 Spiritual Psychology Subconscious and Supraconscious Munich February 25 1912 Hidden Depths of Soul Munich February 27 1912 Organic Processes and Soul Life Dornach July 2 1921 NotesThis is an important work for understanding Steiner s views on psychoanalytic practices as they appeared in the first quarter of the twentieth century A previous edition of this book was titled Psychoanalysis Spiritual Psychology READ A REVIEW BY BOBBY MATHERNE *Psychoanalysis and Spiritual Psychology* Rudolf Steiner,1990-08 In these five lectures Steiner lays the foundations for a truly spiritual psychology The first two lectures constitute a critical examination of the principles of Freud and Jung The last three lectures begin with a description of the threefold structure of human consciousness and go on to outline a psychology that takes into account both the soul s hidden powers and the complex connections between psychological and organic bodily processes Robert Sardello co director of the Dallas Institute for Humanities and Culture has contributed an important introduction from the perspective of a practicing psychotherapist

*Jung's Studies in Astrology* Liz Greene,2019-09-04 Winner of the IAJS award for best authored book of 2018 C G Jung had a profound interest in and involvement with astrology which he made clear in virtually every volume of the Collected Works as well as in many of his letters This ancient symbolic system was of primary importance in his understanding of the nature of time the archetypes synchronicity and human fate Jung s Studies in Astrology is an historical survey of his astrological work from the time he began to study the subject It is based not only on his published writings but also on the correspondence and documents found in his private archives many of which have never previously seen the light of day Liz Greene addresses with thoroughness and detailed scholarship the nature of Jung s involvement with astrology the ancient medieval and modern sources he drew on the individuals from whom he learned his ideas about how and why it worked its religious and philosophical implications and its applications in the treatment of his patients as well as in his own self understanding Greene clearly demonstrates that any serious effort to understand the development of Jung s psychological theories as well as the nature of his world view needs to involve a thorough exploration of his astrological work This thorough investigation of a central theme in Jung s work will appeal to analytical psychologists and Jungian psychotherapists students and academics of Jungian and post Jungian theory the history of psychology archetypal thought mythology and folklore the history of New Age movements esotericism and psychological astrology **Jung the Mystic** Gary Lachman,2012-12-27 Bold

and compact this new biography of Carl Jung fills a gap in the understanding of the pioneering psychiatrist by focusing on the occult and mystical dimension of Jung's life and work a critical but frequently misunderstood facet of his career

Spiritualism and the Foundations of C. G. Jung's Psychology F. X. Charet, 2015-04-17 Charet uncovers some of the reasons why Jung's psychology finds itself living between science and religion He demonstrates that Jung's early life was influenced by the experiences beliefs and ideas that characterized Spiritualism and that arose out of the entangled relationship that existed between science and religion in the late nineteenth century Spiritualism following its inception in 1848 became a movement that claimed to be a scientific religion and whose controlling belief was that the human personality survived death and could be reached through a medium in trance The author shows that Jung's early experiences and preoccupation with Spiritualism influenced his later ideas of the autonomy personification and quasi metaphysical nature of the archetype the central concept and one of the foundations upon which he built his psychology

**Acts of the Heart** Robert Sardello, 2011-10 Reading through this volume is to be taken on a journey It is to walk with Robert Sardello on his journey as he pushes forward toward new realities In a sense each step is not so easy The thinking often appears dense the ideas often new and therefore disconcerting But each individual piece as the whole is bathed in an aura in a way we may say it is bathed in soul in love in generosity and friendship Attending to these we find the ideas and the new possibilities begin to make sense We are moved to change our lives Christopher Bamford from his introduction In these introductions Robert Sardello introduces us to many people we may not otherwise have met and introduces us to many ways of being and thinking which we didn't know before The range of those we meet in these pages is staggering At the same time there is a sweet harmony and ever unfolding deepening of a single theme Miraculously it pervades and shapes the entire sequence of those whom he presents even though he often wrote in response to a request and not initially on his own initiative Robert writes of matters with which he has made a deep friendship and out of that friendship he has received and participated in a communion of ideas He is able to do this because he has entered the aspiration of those he is introducing at the deepest level making their insights his own and deepening them in his own way An introduction conveys a particular soul capacity For Robert Sardello soul capacities are of the essence of what he calls Spiritual Psychology Together with the worlds and beings to which they correspond it is such capacities that make us human and enable us to fulfill our human tasks Reading these introductions is an astonishing experience Within their short individual compasses they allow us to participate in Robert's own journey to catch as it were the bird in flight and fly with it That is they map his journey at least that portion of it that began to unfold as his destiny began to crystallize Robert Sardello's insights navigate many hazardous abstractions from the so called New Age through the perennial philosophies With Sophia as his muse the current from the future calls him carrying its many imaginations as energy the always immediate now and the truly new Across these author's writings his visionary perspective deepens in dialogue with the different works as authored beings For writings possess their own spirit or how

otherwise do they engender a unique spirit when reborn within our own imagination Scott R Scribner from his introduction

**Ancient Egypt and Modern Psychotherapy** Todd Hayen, 2016-12-19 In *Ancient Egypt and Modern Psychotherapy* Todd Hayen explores what the spiritual concepts of the enigmatic ancient Egyptians can teach us about our own modern psyches and the pursuit of a meaningful life Hayen examines the ancient Egyptians possession of a concept contemporary academics have labeled consciousness of the heart an innate knowledge of the entirety of the universe While all human beings possess this consciousness of the heart our modern culture has largely lost the ability to tap into this inborn knowledge By examining the material accomplishments of ancient Egypt and how their seemingly deeper awareness of their inner world created a harmonious outer world we can begin to understand how modern psychotherapy through a Jungian perspective could be instrumental in achieving a more profound and meaningful personal experience of life *Ancient Egypt and Modern Psychotherapy* will be insightful reading for analytical psychologists in practice and in training Jungian psychotherapists and psychologists and academics and students of Jungian and post Jungian studies and ancient spirituality Enigma

**of the Dead** Zachary Gage, 2020 In this thesis I address a dearth in psychological research that takes spirituality seriously as the natural counterpart to materialistic approaches to the psyche To do so I look at the role that non human beings and the dead play in the psychological thought of C G Jung and Rudolf Steiner and how these challenge the oppositional thinking present in modern psychology particularly in conceptions of consciousness being life and death I use a close reading of Jung s *Liber Novus* *The Red Book* and several of Steiner s works along with an antithetical methodology that seeks questions rather than answers What emerges from the work of Jung and Steiner is a reimagining of psychology as spiritual psychology a way of life that involves questioning the oppositional thinking of ordinary waking consciousness and developing a complementary form of imaginative non ordinary consciousness The Secret Teachers of the Western World Gary Lachman, 2015-12-08 Running alongside the mainstream of Western intellectual history there is another current which in a very real sense should take pride of place but which for the last few centuries has occupied a shadowy inferior position somewhere underground

This other stream forms the subject of Gary Lachman's epic history and analysis *The Secret Teachers of the Western World*. In this clarifying accessible and fascinating study the acclaimed historian explores the Western esoteric tradition a thought movement with ancient roots and modern expressions which in a broad sense regards the cosmos as a living spiritual meaningful being and humankind as having a unique obligation and responsibility in it. The historical roots of our counter tradition as Lachman explores have their beginning in Alexandria around the time of Christ. It was then that we find the first written accounts of the ancient tradition which had earlier been passed on orally. Here in this remarkable city filled with teachers philosophers and mystics from Egypt Greece Asia and other parts of the world in a multi cultural multi faith and pluralistic society a synthesis took place a creative blending of different ideas and visions which gave the hidden tradition the eclectic character it retains today. ***No Religion Higher Than Truth*** Maria Carlson, 2015-03-08 Among the various kinds of occultism popular during the Russian Silver Age 1890-1914 modern Theosophy was by far the most intellectually significant. This contemporary gnostic gospel was invented and disseminated by Helena Blavatsky an expatriate Russian with an enthusiasm for Buddhist thought and a genius for self promotion. What distinguished Theosophy from the other kinds of mysticism the spiritualism table turning fortune telling and magic that fascinated the Russian intelligentsia of the period. In answering this question Maria Carlson offers the

Entheogens and the Development of Culture John A. Rush, 2013-07-30 Entheogens and the Development of Culture makes the radical proposition that mind altering substances have played a major part not only in cultural development but also in human brain development Researchers suggest that we have purposely enhanced receptor sites in the brain especially those for dopamine and serotonin through the use of plants and fungi over a long period of time The trade off for lowered functioning and potential drug abuse has been more creative thinking or a leap in consciousness Experiments in entheogen use led to the development of primitive medicine in which certain mind altering plants and fungi were imbibed to still fatigue pain or depression while others were taken to promote hunger and libido Our ancestors selected for our neural hardware and our propensity for seeking altered forms of consciousness as a survival strategy may be intimately bound to our decision making processes going back to the dawn of time Fourteen essays by a wide range of contributors including founding president of the American Anthropological Association's Anthropology of Religion section Michael Winkelman PhD Carl A P Ruck PhD Boston University professor of classics and an authority on the ecstatic rituals of the god Dionysus and world renowned botanist Dr Gaston Guzman member of the Colombian National Academy of Sciences and expert on hallucinogenic mushrooms demonstrate that altering consciousness continues to be an important part of human experience today Anthropologists cultural historians and anyone interested in the effects of mind altering substances on the human mind and soul will find this book deeply informative and inspiring
