Developing Quantitative Literacy Skills in History and the Social Sciences Kathleen W. Craver, 2014-07-22 History and social sciences educators have been charged with ensuring that our students are quantitatively literate Being able to integrate research data in the form of graphs charts and tables and

deconstruct quantitative evidence to address questions and solve problems is no longer the domain of mathematicians Being quantitatively literate is considered an educational imperative in a data drenched world that holds so many employment challenges The internet contains a treasure trove of valid and reliable sources of quantitative data that history and social sciences teachers can easily use to satisfy the quantitative literacy requirements of the National Common Core Standards This book features 85 interesting and exciting multi century and multicultural web sites that are accompanied by numerical critical thinking questions and activities Teachers can pose the questions to their entire class or individually assign them It also contains lists of best practices and examples for interpreting visualizing and displaying quantitative data History and social sciences educators will find this book an indispensable tool for incorporating numerical literacy skills into their class activities and assignments **Women, Rank, and Marriage in the British Aristocracy, 1485-2000 K.**

Schutte,2014-05-15 Through an analysis of the marriage patterns of thousands of aristocratic women as well as an examination of diaries letters and memoirs this book demonstrates that the sense of rank identity as manifested in these women s marriages remained remarkably stable for centuries until it was finally shattered by the First World War *The TurnAround ToolKit* Lynn Winters,Joan Herman,2011 Lynn Winters s and Joan Herman s The Turnaround Toolkit is written for school leaders who are focused on transforming instruction and who may be working under significant time constraints to reverse declining student achievement or public perceptions of school failure Based on the evidence that simply implementing continuous improvement is not enough to close the achievement gap The Turnaround Toolkit provides a nine step formative evaluation program designed to achieve an immediate and consistent focus on improving instruction in order to bolster student achievement In a straightforward and accessible fashion Herman and Winters explain three overarching Turnaround Tasks that frame these steps and the necessary and sometimes drastic actions that must be taken by school leaders as they use data to strategically choose implement monitor and revise school interventions A dedicated online toolkit offers numerous worksheets and templates that support each stage of the process and help school leaders scaffold the work of educators to put an aggressive turnaround plan into action while a leadership guide at the end of the book provides guidance to turnaround teams and facilitators Teaching Undergraduate Political Methodology Brown, Mitchell,Nordyke, Shane,Thies, Cameron G.,2022-08-12 Providing expert advice from established scholars in the field of political science this engaging book imparts informative guidance on teaching research methods across the undergraduate curriculum Written in a concise yet comprehensive style it illustrates practical and conceptual advice alongside more detailed chapters focussing on the different aspects of teaching political methodology *Teaching Quantitative Methods* Geoff Payne,Malcolm Williams,2011-03-04 This exciting collection is both useful and timely It clearly lays out the problems strategies and resources associated with the teaching of quantitative methods in modern universities Addressing the perceived crisis of number in a practical and fresh way the book sets out dynamic new approaches to teaching quantitative methods It offers

historical comparative analytical reflection and empirical evidence concerning the crisis in contemporary social sciences Experts from across the social sciences provide a wide range of authoritative insights as well as a number of useful illustrations of strategies and resources designed to help overcome this crisis of number Each chapter reflects the diversity of backgrounds and approaches within the social sciences making this an interdisciplinary relevant addition to the subject The book also o focuses on innovations in how to teach quantitative research methods o reports on the latest ESRC research projects on teaching quantitative methods o locates itself within current debates about skills for employment Clear engaging and original this book will be essential reading for those interested in learning and teaching quantitative methods

**Problem Solving for New Engineers** Melisa Buie,2017-07-20 This book brings a fresh new approach to practical problem solving in engineering covering the critical concepts and ideas that engineers must understand to solve engineering problems Problem Solving for New Engineers What Every Engineering Manager Wants You to Know provides strategy and tools needed for new engineers and scientists to become apprentice experimenters armed only with a problem to solve and knowledge of their subject matter When engineers graduate they enter the work force with only one part of what s needed to effectively solve problems Problem solving requires not just subject matter expertise but an additional knowledge of strategy With the combination of both knowledge of subject matter and knowledge of strategy engineering problems can be attacked efficiently This book develops strategy for minimizing eliminating and finally controlling unwanted variation such that all intentional variation is truly representative of the variables of interest *Evolutionary Psychology in the Business Sciences*

Gad Saad,2011-07-09 All individuals who operate in the business sphere whether as consumers employers employees entrepreneurs or financial traders to name a few constituents share a common biological heritage and are defined by a universal human nature As such it is surprising that so few business scholars have incorporated biological and evolutionary informed theories within their conceptual toolboxes This edited book addresses this lacuna by culling chapters at the intersection of the evolutionary behavioral sciences and specific business contexts including in marketing consumer behavior advertising innovation and creativity intertemporal choice negotiations competition and cooperation in organizational settings sex differences in workplace patterns executive leadership business ethics store design behavioral decision making and electronic communication To reword the famous aphorism of T G Dobzhansky nothing in business makes sense except in the light of evolution
