

Justice And Peace For All

We are fighting for justice and peace for all,
And our young men are answering the call.
They are giving their lives for you and for me,
On land, in the air, and out on the sea.
They are brave and strong, and have faith in God.
And are fighting for the land their forefathers trod.
If they can fight for justice and peace.
Let's not let our efforts cease. Let us back home, toil- from
light to dark

So our boys, can hit their mark,
This justice and peace, although it is old,
Is a tale that years and centuries unfold.
Our country was founded upon this claim,
And it's our privilege to keep it the same.
This was and conflict, I know will soon end.
For justice and peace; to God are akin.

Pitfalls of AI Integration in Education: Skill Obsolescence, Misuse, and Bias Garcia, Manuel B., Rosak-Szyrocka, Joanna, Bozkurt, Aras, 2025-05-09 The integration of artificial intelligence (AI) in education rapidly transforms the teaching and learning process. Recent systematic reviews have shown an increase in research studying the opportunities and challenges associated with AI in education. This trend reflects a growing recognition of its potential to revolutionize educational practices. However, there are also growing concerns and issues with skill obsolescence leading to job displacement, algorithm bias, and misuse of AI for academic dishonesty. As educational institutions increasingly rely on AI to enhance academic outcomes, proactively addressing these challenges ensures the ethical and responsible use of AI in education. **Pitfalls of AI Integration in Education: Skill Obsolescence, Misuse, and Bias** offers a targeted exploration of the critical challenges and concerns that arise as AI becomes more embedded in educational systems. Focusing on emerging issues, it addresses the gaps in current research and practice, shedding light on the ethical, practical, and pedagogical dilemmas that educators, students, and institutions face. Covering topics such as school infrastructure, critical academic skills, and intellectual property protection, this book is an excellent resource for educators, school administrators, policymakers, professionals, researchers, academicians, and more.

Early Thirteenth-Century English Franciscan Thought Lydia Schumacher, 2021-10-25 The thirteenth century was a dynamic period in intellectual history which witnessed the establishment of the first universities, most famously at Paris and Oxford. At these and other major European centres of learning, English-born Franciscans came to hold prominent roles both in the university faculties of the arts and theology and in the local studia across Europe that were primarily responsible for training Franciscans. This volume explores the contributions to scholarship of some of the leading English Franciscans or Franciscan associates from this period, including Roger Bacon, Adam Marsh, John Pecham, Thomas of York, Roger Marston, Robert Grosseteste, Adam of Exeter, Richard Rufus of Cornwall, and Bartholomew of England.
