Blomberg, Francis T. Cullen, Christoffer Carlsson, Cheryl Lero Jonson, 2017-07-31 Fifty years ago David Matza wrote Delinquency and Drift challenging the ways people thought about the development of criminals Today Delinquency and Drift Revisited reminds criminologists that they ignore Matza s writings at their own intellectual peril

Matza's work shows his insights on a range of core criminological issues such as the complex nature of culture and its connection to criminality the extent to which rule breakers are truly different from the rest of us the importance of focusing on human agency in understanding the subjective side of offending the interaction of propensity and peer influences in criminal involvement the role of the state in signifying individuals as deviant and entrapping them in criminal roles and the processes that lead offenders to desist from crime This volume was not written to pay homage to Matza but to show how his ideas remain relevant to criminology today by continuing to question conventional wisdom by making us pay attention to realities we have overlooked and by inspiring us to theorize more innovatively

Fundamentals of Criminology Kelly Frailing,Dee Wood Harper,2013-07-19 Fundamentals of Criminology New Dimensions delivers a comprehensive and comprehensible introduction to the discipline of criminology As the title implies it covers the fundamentals of criminology including the major theories of crime causation classic and current empirical tests of those theories the strengths and weaknesses and the policy implications of each It also describes the types of crime and provides current rates trends over time and theoretical explanations for each as well as a discussion of characteristics of offenders and victims What sets this book apart from the

many other fine criminology textbooks out there is its inclusion of some new dimensions of criminology. The new dimensions in this book include but are not limited to research designs in criminology, new theories of crime causation, crime in different contexts, connections between criminology and criminal justice policy, and a number of lingering issues for both disciplines. In combination with the fundamentals, these new dimensions are designed to provide readers with the richest, most complete understanding of what crime is, how much of it there is, what causes it, and what to do about it, as well as the ability and desire to pose important questions for the future of both criminology and criminal justice. The authors have produced a comprehensive, readable, and thoroughly interesting text covering the topic of sociological criminology. Yes, there are a plethora of texts in this area, but Harper and Frailing's addition to the field has a number of features moving it ahead of the competition. There is in-depth coverage of emerging areas in crime, including cybercrime and human trafficking, as well as an excellent section on how disasters augment the opportunities for crime by hindering capable guardianship. The authors' arguments for evidence-based crime prevention strategies and public policies are compelling. *Fundamentals of Criminology* is worthy of the closest consideration by instructors teaching undergraduate criminology courses. Jay Corzine, professor of sociology, University of Central Florida. [The Origins of American Criminology](#) Francis T. Cullen, Cheryl Lero

Jonson, Andrew J. Myer, Freda Adler, 2017-09-08. *The Origins of American Criminology* is an invaluable resource. Both separately and together, these essays capture the stories behind the invention of criminology's major theoretical perspectives. They preserve information that otherwise would have been lost. There is urgency to embark on this reflective task given that the generation that defined the field for the past decades is heading into retirement. This fine volume insures that their life experiences will not be forgotten. The volume shows criminology to be a human enterprise. Ideas are not driven primarily, and often not at all, by data. Theories are not invented solely as part of the scientific process; they are not inevitable. American criminology's great theories most often precede the collection of data; they guide and produce empirical inquiry, not vice versa. Theoretical paradigms are shaped by a host of factors: scholars' assumptions about the world, drawn from their social constructs, disciplinary content, and ideology; cognitive environments found in specific universities and the field's scholarly networks and quirks in a person's biography. The volume demonstrates that humanity is what makes theory possible. Diverse experiences when we were born, where we have lived, the unique trajectories of our personal life courses, the disciplines, and academic places we have ended up, allow individual scholars to see the world differently. **Primary Theories of Crime**
