Gpfs File System On Ecomstation:

Implementing the IBM General Parallel File System (GPFS) in a Cross Platform Environment Dino

Quintero, Matteo Barzaghi, Randy Brewster, Wan Kim, Steve Normann, Paulo Queiroz, Robert Simon, Andrei Vlad, 2011 This IBM Redbooks publication provides a documented deployment model for IBM GPFS in a cross platform environment with IBM Power Systems™ Linux and Windows servers With IBM GPFS customers can have a planned foundation for file systems management for cross platform access solutions This book examines the functional integration simplification and usability changes with GPFS v3.4 It can help the technical teams provide file system management solutions and technical support with GPFS based on Power Systems virtualized environments for cross platform file systems management The book provides answers to your complex file systems management requirements helps you maximize file system availability and provides expert level documentation to transfer the how to skills to the worldwide support teams The audience for this book is the technical professional IT consultants technical support staff IT architects and IT specialists who is responsible for providing file system management solutions and support for cross platform environments that are based primarily on Power Systems

Gpfs on Aix Clusters, High Performance File System Administration Simplified Ibm Redbooks, 2001

Evaluation of GPFS Connectivity Over High-Performance Networks, 2009 We present the results of an evaluation of new features of the latest release of IBM's GPFS filesystem v3.2 We investigate different ways of connecting to a high performance GPFS filesystem from a remote cluster using Infiniband IB and 10 Gigabit Ethernet We also examine the performance of the GPFS filesystem with both serial and parallel I/O Finally we also present our recommendations for effective ways of utilizing high bandwidth networks for high performance I/O to parallel file systems

Using Gpfs 2.2 to Enable a Cross Platform Accessibility of Single Storage, 1994 With IBM's aid I have conducted a cross compatibility test of GPFS 2.2 between an IBM F50 Power2 running AIX 5.2 ML 3 and 8 Dual Pentium 4 2.2 GHz running Redhat 9.0 The objective was to demonstrate a single shared instance of the file system and storage between the disparate operating systems and hardware systems The cross compatibility test was successful The chronology of events that led to this successful test are documented below

Performance Comparison of GPFS 1.3 and GPFS 1.4 for POSIX and MPI-IO.

, 2001 This report by the SIOP observes the effects of recent hardware and software changes for parallel I/O performance to the GPFS parallel file system The IBM SP machine frost has been upgraded from Mohonk with GPFS 1.3 to Mohonk2 with GPFS 1.4 In addition the Colony switch adapters have been upgraded from Single Single to Double Single The tests discussed here were performed on frost using 60 compute nodes and the GPFS file system using 2 dedicated I/O nodes servers The tests performed utilize the POSIX and MPI IO interfaces to GPFS The noted system changes to frost have improved both POSIX and MPI IO peak read performance and have not diminished peak write performance We note that as the bandwidth of mounted disks is near fully utilized there was no expectation of significant performance improvement For

POSIX the best write rates did not change from 550 MB/sec The read rates improved from 500 MB/sec to 600 MB/sec however For MPI IO the best write rates did not change from 550 MB/sec The read rates improved from 470 MB/sec to 570 MB/sec in line with the improvements observed The MPI IO discontinuous test results show that improvement is significant nearly a factor of 2 beyond 40 nodes The performance of this particular test is more sensitive to the improved switch performance characteristics because the data passes across the switch twice once in the MPI IO datashipping phase to assemble large block and then to write the data out to the disks as this requires two passes across the switch

Configuration and Tuning GPFS for Digital Media Environments Octavian Lascu, Andreas Lungen, Dag Wieers, Dino Quintero, 2005 In today's environments when access to information is more and more demanding media companies are implementing new solutions for their environments focusing on performance availability and cost Because GPFS historically comes from multimedia roots the adoption of this product for digital media environments comes as a natural evolution This IBM Redbooks publication focuses on the newest GPFS functionality and its on demand characteristics related to but not limited to digital media environments Digital media information flow and requirements are analyzed and matched with GPFS functionality Interoperability of a GPFS cluster and file sharing applications for Windows clients are discussed This book presents a nine step approach for configuring a GPFS cluster and also presents various tools and techniques that make it easier for a systems administrator in GPFS implementation and day to day management tasks
