Making An Issue Of Child Abuse Political Agenda Setting For Social Problems:

Making an Issue of Child Abuse Barbara J. Nelson, 1986 **Making an Issue of Child Abuse** Barbara J. Nelson, 1984 A history of the social agenda of child abuse and policy set by society government and other agencies *Combating Child Abuse* Neil Gilbert, 1997 Many countries are struggling with issues involving the definition of child maltreatment reporting requirements processes for responding to reports and services to abused children and their families This book illustrates approaches to dealing with these problems by examining and comparing the designs of child abuse systems **Advances in Child Abuse Prevention Knowledge** Deborah Daro, Anne Cohn Donnelly, Lee Ann Huang, Byron J. Powell, 2015-06-05 This book addresses new avenues in child abuse prevention research that will expand our capacity to protect children These new avenues result from the emergence of new research methods made possible through technologic advances an understanding of the benefits of cross disciplinary research and learning and the entrance of many young scholars in the field The book explores what these avenues produce in terms of clarifying the complex problems that continue to limit our progress in addressing child maltreatment and promoting optimal child development Specifically the book showcases individual contributions from emerging scholars and show how these scholars use the frameworks and advanced methods to shape their work apply their findings and define their learning communities The book highlights the benefits of creating explicit and extended opportunities for researchers to network across disciplines and areas of interest The primary authors are young scholars from universities across the U S who have worked together as Fellows of the Doris Duke Fellowships for the Promotion of Child Well Being seeking innovations to prevent child abuse Through this program the Fellows have engaged in a robust self generating learning network designed to create the type of ongoing professional linkages and decision making style that fosters an interdisciplinary and team planning approach to research design and policy formation Encyclopedia of Public Administration and Public Policy - 5 Volume Set Domonic A. Bearfield, Evan Berman, Melvin J. Dubnick, 2020-08-14 Now in its third edition Encyclopedia of Public Administration and Public Policy remains the definitive source for article length presentations spanning the fields of public administration and public policy It includes entries for Budgeting Bureaucracy Conflict resolution Countries and regions Court administration Gender issues Health care Human resource management Law Local government Methods Organization Performance Policy areas Policy making process Procurement State government Theories This revamped five volume edition is a reconceptualization of the first edition by Jack Rabin It incorporates over 225 new entries and over 100 revisions including a range of contributions and updates from the renowned academic and practitioner leaders of today as well as the next generation of top scholars The entries address topics in clear and coherent language and include references to additional sources for further study **The DeShaney Case** Lynne Curry, 2007 Joshua s story Child protection in the nineteenth and twentieth centuries The crime of child abuse DeShaney v Winnebago County in the lower courts DeShaney v Winnebago County in the U S Supreme Court Poor Joshua DeShaney v

Winnebago County in the court of public opinion *Ending the Cycle of Violence* Einat Peled, Peter G. Jaffe, Jeffery L. Edleson, 1995 This work covers the complex issues involved in intervention with children of battered women and provides an overview of current practice including strategies and program models **Handbook of Family Violence** Alan S. Bellack, Michel Hersen, R.L. Morrison, Vincent B. Van Hasselt, 2013-06-29 In the last decade there has been heightened clinical and investigative activity in the area of family violence This of course is partly attributable to recent surveys showing a high incidence of family violence in the United States For example there are indications that nearly 30% of married women in this country are victims of physical abuse by spouses at some point in their marriage Further FBI statistics show that approximately 13% of all homicides are husband wife killings Moreover it has been projected that such figures are likely to increase over the next several years Consistent with these trends funding of family violence research by both federal and private agencies has increased Indeed federal agencies such as the National Institute of Mental Health and the National Institute of Law Enforcement and Criminal Justice have provided considerable support for work in this area In addition family violence particularly wife battering child abuse and sexual abuse of children has been the focus of media attention at the national level and has generated intensive interest in both lay and professional publications Moreover there have been several recent governmental hearings and investigations regarding the prevalence of these problems **Abusive Policies** Mical Raz, 2020-10-12 In the early 1970s a new wave of public service announcements urged parents to help end an American tradition of child abuse The message relayed repeatedly over television and radio urged abusive parents to seek help Support groups for parents including Parents Anonymous proliferated across the country to deal with the seemingly burgeoning crisis At the same time an ever increasing number of abused children were reported to child welfare agencies due in part to an expansion of mandatory reporting laws and the creation of reporting hotlines across the nation Here Mical Raz examines this history of child abuse policy and charts how it changed since the late 1960s specifically taking into account the frequency with which agencies removed African American children from their homes and placed them in foster care Highlighting the rise of Parents Anonymous and connecting their activism to the sexual abuse moral panic that swept the country in the 1980s Raz argues that these panics and policies as well as biased viewpoints regarding race class and gender played a powerful role shaping perceptions of child abuse These perceptions were often directly at odds with the available data and disproportionately targeted poor African American families above others **Children at Risk** Robert T. Ammerman, Michel Hersen, 2013-03-09 During the past decade a dramatic increase in research and clinical interest has risen in child abuse and neglect This recent growth in awareness is due at least partly to the alarming statistics documenting the incidence of child maltreatment Almost one million children are reported to be abused and neglected each year and many experts believe that this figure underestimates the true incidence Indeed recent surveys suggest that almost 15 million children are the targets of domestic violence every year A significant proportion of these children die as a function of this

maltreatment whereas the remainder suffers a variety of short and long term deleterious medical and psychosocial consequences Child maltreatment is a universal problem that has precipitated a mobilization of effort from a variety of disciplines including psychology medicine psychiatry social work sociology and criminology Particular attention has been directed toward the prevention and treatment of child abuse and neglect Such endeavors require the screening of large groups in order to identify families that are at high risk for engaging in such behavior Delineating those characteristics that differentiate high from low risk families and children is one of the obvious priorities for researchers and clinicians in the future This book therefore carefully considers the status of research on risk factors of abuse and neglect in children Adduced data undoubtedly will have practical value for subsequent intervention efforts Child Abuse Brian Corby, David Shemmings, David

Wilkins, 2012-11-01 This book is an accessible knowledge base for the whole area of child abuse and child protection now fully updated in terms of policy cases and research **Child Protection in America** John E.B. Myers, 2024-10-11 Child abuse and neglect are tragically common Each year more than 1 000 American children die due to maltreatment Thousands more suffer physical abuse sexual abuse and neglect Across the country every community has a system of government operated and funded child protective services CPS But given that social workers of CPS have the authority to remove children from unsafe parents it is no surprise that CPS is controversial Does CPS protect children Does CPS do more good than harm Is CPS fundamentally racist as some critics argue Should CPS be abolished To answer these questions it is essential to understand the origins of child protection in America How did we arrive at the child protection system in place today This book traces the history of child protection from colonial times to the present and provides the most in depth analysis ever published of the origins of child protection **Contemporary Public Opinion** Maxwell McCombs, 2017-10-03

This book discusses the public opinion process with a focus on the role that the news media play in shaping public opinion Although heavily influenced by the agenda setting perspective the view that the news media define the important issues of the day and determine how these issues are presented the authors neither support nor refute this claim They present instead a variety of contemporary scholarship integrated into a coherent picture of public opinion for a general audience

Motivation and Child Maltreatment David J. Hansen, 2000-01-01 In this volume the concept of motivation is used to shed light on a range of complex issues surrounding the maltreatment of children Cathy Spatz Widom investigates the role of motivation in the intergenerational transmission of violence where victimized children themselves become perpetrators of violence as adults Joel S Milner looks at the way abusive parents process social information related to children The biological psychological and social contextual regulatory processes in maltreated children are considered by Dante Cicchetti and Sheree L Toth Deborah Daro discusses the current status of efforts to eliminate maltreatment of children and offers an alternative model for approaching the concept and practice of prevention John R Lutzker addresses the challenges of and procedures for applied research on the treatment of abusive parents In his concluding essay Ross A Thompson highlights the

important themes focusing on child maltreatment that underlie this volume Agenda-Setting James W. Dearing, Everett Rogers, 1996-08-28 What is the major social problem in the news today Who made it so important Social issues that are widely recognized on the media agenda often demand attention on the public agenda and in turn move quickly up the policy agenda creating policy changes Based on research of contemporary social issues that have hit the headlines including the war on drugs drink driving the Exxon Valdez oil spillage AIDS and the Ethiopian famine this book provides important theoretical and practical insights into the agenda setting process and its role in effecting social change Policy Problems and Policy Design B. Guy Peters, 2018-07-27 Public policy can be considered a design science It involves identifying relevant problems selecting instruments to address the problem developing institutions for managing the intervention and creating means of assessing the design Policy design has become an increasingly challenging task given the emergence of numerous wicked and complex problems Much of policy design has adopted a technocratic and engineering approach but there is an emerging literature that builds on a more collaborative and prospective approach to design This book will discuss these issues in policy design and present alternative approaches to design *Hiding Politics in Plain Sight* Patricia Strach, 2016-08-02 As late as the 1980s breast cancer was a stigmatized disease so much so that local reporters avoided using the word breast in their stories and early breast cancer organizations steered clear of it in their names But activists with business backgrounds began to partner with corporations for sponsored runs and cause marketing products from which a portion of the proceeds would benefit breast cancer research Branding breast cancer as pink hopeful positive uncontroversial on the products Americans see every day these activists and corporations generated a pervasive understanding of breast cancer that is widely shared by the public and embraced by policymakers Clearly they have been successful today more Americans know that the pink ribbon is the symbol of breast cancer than know the name of the vice president *Hiding Politics in Plain Sight* examines the costs of employing market mechanisms especially cause marketing as a strategy for change Patricia Strach suggests that market mechanisms do more than raise awareness of issues or money to support charities they also affect politics She shows that market mechanisms like corporate sponsored walks or cause marketing shift issue definition away from the contentious processes in the political sphere to the market where advertising campaigns portray complex issues along a single dimension with a simple solution breast cancer research will find a cure and Americans can participate easily by purchasing specially marked products This market competition privileges even more specialized actors with connections to business As well cooperative market activism fundamentally alters the public sphere by importing processes values and biases of market based action into politics Market activism does not just bring social concerns into market transactions it also brings market biases into public policymaking which is inherently undemocratic As a result industry and key activists work cooperatively rather than contentiously and they define issues as consensual rather than controversial essentially hiding politics in plain sight The Individual, the Family, and Social Good Gary B.

Melton,1995-01-01 The question of whether personal gratification is compatible with social good is one of the fundamental problems of motivation The family an institution that has undergone extraordinary change in the last generation is perhaps the most profound context in which to consider this issue This volume is tinged with prophetic concern about the state of contemporary family life and about the un likelihood of reconciling individual family members interests with those of the family as a whole The nine contributors backgrounds are diverse anthropology economics law and clinical community developmental and social psychology and their positions on the nature of motivation in families vary widely Their views are often disquieting and sometimes conflicting as they offer provocative analyses of divorce family violence political transitions and concerns of both Western and non Western cultures Gary B Melton is director of the Institute for Families in Society at the University of South Carolina and professor of law neuropsychiatry and psychology His books include Adolescent Abortion Psychological and Legal Issues Nebraska 1986 Child Abuse And Neglect Richard J. Gelles,Jane Beckman Lancaster, Child Abuse and Neglect is the third volume sponsored by the Social Science Research Council The goals of these volumes include the development of a biosocial perspective and its application to the interface between biological and social phenomena in order to advance the understanding of human behavior Child Abuse and Neglect applies the biosocial perspective to child maltreatment and maladaptation in parent child relations The biosocial perspective is particularly appropriate for investigating parent behavior since the family is the universal social institution in which children are born and reared in which cultural traditions and values are transmitted and in which individuals fulfill their biological potential for reproduction growth and development The volume examines biological substrates and social and environmental contexts as determinants of parent behavior By identifying areas in which contemporary human parent behaviors conform with and depart from evolutionary and historical patterns and assessing the overall costs and benefits it permits their objective assessment in terms of modern circumstances In analyzing evolutionary and historical variations in parent behavior and assessing their costs and benefits the book makes possible an objective assessment of contemporary variations Its analysis of the occurrence of child abuse in past history and in other cultures and species advances our ability to predict the probability of child abuse and neglect in various social and ecological contexts **Protecting Our Kids?** Emily Horowitz,2015-04-21 This thought provoking work raises important questions about sex offender laws drawing from personal stories research and data to prove the policies promote fear destroy lives and fail to protect children Do sex offender laws protect children or are they inherently unfair practices that at their worst promote vigilante justice The latter this book argues By analyzing the social political historical and cultural context surrounding the emergence of current sex offender policies and laws the work shows how sex offenders have come to loom as greater than life monsters when in many cases that is not true at all Looking at its subject from a fresh viewpoint the book shares research and new analyses of data and qualitative evidence to show how sex offender laws are not only ineffective but engender destructive fear and anxiety To help readers understand the impact of

these laws the author presents interviews with sex offenders and their families as they describe the day to day reality of living on the sex offender registry Citing research and statistics the book challenges the idea that sex offenders must be continually monitored and publicly identified because they are incurably predatory Most important the study shows that undue sex offender panic is preventing policymakers from addressing the true threats to children poverty and growing inequality
