Acquisition Julia Herschensohn, 2000-02-15 Linking recent advances in theoretical syntax and empirical research in language development the book claims that second language acquisition is not totally distinct from first language acquisition but rather is a replay a relearning of language It argues that Universal Grammar is a template guiding acquisition of L1 while constraining acquisition of L2 Assuming that a syntactic distinction crucial for language and its acquisition is the division between lexical and functional categories it argues that the key to L2 as well as L1 acquisition of syntax is the mastery of morphological features and their linking to functional categories It thus supports the availability of UG to the second language learner and the minimalist claim that cross linguistic variation is morpholexical Constructionism the hypothesis of L2A proposed in this account argues for a period of feature underspecification after loss of the L1 value followed by a progressive building of the L2 value through specific constructions Language and Literacy Teaching for Indigenous Education Norbert Francis, Jon Allan Reyhner, 2002-01-01 Language and Literacy Teaching for Indigenous Education A Bilingual Approach presents a proposal for the inclusion of indigenous languages in the classroom Based on extensive research and field work by the authors in communities in the United States and Mexico the book explores ways in which the cultural and linguistic resources of indigenous communities can enrich the language and literacy program Teacher Training and Effective Pedagogy in the Context of Student Diversity Liliana Minaya-Rowe, 2002-06-01 The purpose of this volume is two fold First the book attempts to initiate a research based dialogue from a variety of perspectives specifically about teacher training and teaching in the context of student linguistic and cultural diversity and second to cast a wide net over three major areas of professional development that have the potential to impact on teacher quality and on the educational services provided to ELLs at all levels of instruction This book represents a first attempt to a quiet revolution going on in teacher education Johnson 2000 It allows the reader to uncover research activities and experiences that constitute individual teacher education program initiatives A revolution because it is stirring the very essence of what stands at the core of teacher education a core that has long been based more on training to teach monolingual English speaking students and less on teaching ELLs their first and second language development using their bilingualism to teach academics and on the process of becoming an effective teacher of ELLs This state of the art review brings together research on effective pedagogy and teacher training The nine feature chapters are directly concerned with effective new structures and practices for professional development and are presented in a framework that considers a wide spectrum of topics to address issues such as what teachers need to understand about English language learners what kind of professional experiences are likely to facilitate those understandings and what kinds of teacher education programs and school settings are able to support their ongoing learning The authors also discuss the implications of their work for helping English language learners connect and benefit from school from the points of view of 1 school reform 2 teachers bilingual proficiencies 3 teachers knowledge and beliefs and 4 teacher training programming and sustainability **Proceedings of the Second International Conference**
