Decision Framework for Managing the Spirit Lake and Toutle River System at Mount St. Helens National Academies of Sciences, Engineering, and Medicine, Division of Behavioral and Social Sciences and Education, Board on Environmental Change and Society, Division on Earth and Life Studies, Water Science and Technology Board, Board on Earth Sciences and Resources, Committee on Geological and Geotechnical Engineering, Committee on Long-Term Management of the Spirit Lake/Toutle River System in Southwest Washington, 2018-03-29 The 1980 eruption of Mount St Helens in southwest Washington State radically changed the physical and socio economic landscapes of the region The eruption destroyed the summit of the volcano sending large amounts of debris into the North Fork Toutle River and blocking the sole means of drainage from Spirit Lake 4 miles north of Mount St Helens As a result of the blockage rising lake levels could cause failure of the debris blockage putting the downstream population of approximately 50 000 at risk of catastrophic flooding and mud flows Further continued transport of sediment to the river from volcanic debris deposits surrounding the mountain reduces the flood carrying capacity of downstream river channels and leaves the population vulnerable to chronic flooding The legacy of the 1980 eruption and the prospect of future volcanic seismic and flood events mean that risk management in the Spirit Lake Toutle River system will be challenging for decades to come This report offers a decision framework to support the long term management of risks related to the Spirit Lake and Toutle River system in light of the different regional economic cultural and social priorities and the respective roles of federal tribal state and local authorities as well as other entities and groups in the region It also considers the history and adequacy of characterization monitoring and management associated with the Spirit Lake debris blockage and outflow tunnel other efforts to control transport of

water and sediment from the 1980 and later eruptions and suggests additional information needed to support implementation of the recommended decision framework *Mass Media and Political Decision-Making* Nino Landrer,2016-10-20 To what extent have political decision making processes become mediatized Based on this question the author analyzes media coverage and parliamentary actors MPs strategies and perceptions in three conflicted decision making processes in Switzerland Mediatization of politics refers to behavioral changes and adaptations of political actors institutions and processes that are related to mass media According to some scholars mediatization may lead to politics of immediacy conflict drama and personalization thereby challenging established institutions and processes in liberal democracies The quantitative and qualitative analyses of MPs strategies and perceptions provide new insights into how political actors may self mediatize in the advent of globalization and polarization Overall the book adopts an actor centric approach and shows that mediatization of politics is not a fate but a strategic choice Decision Support Systems Ger Devlin,2010-03-01 This book by

In Tech publishing helps the reader understand the power of informed decision making by covering a broad range of DSS Decision Support Systems applications in the fields of medical environmental transport and business The expertise of the chapter writers spans an equally extensive spectrum of researchers from around the globe including universities in Canada Mexico Brazil and the United States to institutes and universities in Italy Germany Poland France United Kingdom Romania Turkey and Ireland to as far east as Malaysia and Singapore and as far north as Finland Decision Support Systems are not a new technology but they have evolved and developed with the ever demanding necessity to analyse a large number of options for decision makers DM for specific situations where there is an increasing level of uncertainty about the problem at hand and where there is a high impact relative to the correct decisions to be made DSS s offer decision makers a more stable solution to solving the semi structured and unstructured problem This is exactly what the reader will see in this book
