1990s continue to reap the rewards and have enabled India to become the fourth largest GDP in the world in terms of purchasing power. The policy driven reforms have taken our country from the third world status to one that plays a part albeit small in defining the fate of the global economy. The country is in the midst of a great transformation almost epochal in scope. Everything is positive in the economy today. Manufacturing is resurgent, services going strong, revenue collection buoyant, export jumping 37.3 per cent, foreign investment flows strong and no overheating of the economy. There is a new sense of optimism and a willingness to take risk and think big among the business tycoons. Simply put, Indians can get ready to uncork the bubbly to celebrate unprecedented growth in the coming years. The rapid growing economy however brings its own share of problems. Agriculture is not keeping pace with the overall buoyancy and there has been a rise in inflation rate. Besides poor infrastructure, antiquated labour laws, low quality education for all except the elites, dismal health services and widening of rural-urban disparities are only a few of the many constraints which India cannot afford to overlook in the economy. Some legs march in the wrong direction, some in the right one. But if there are more right moving legs, they can negate the wrong ones and move the economy in their direction. The present book seeks to suggest the right initiatives and reforms through its articles and speeches contributed by eminent economists. It emphasises that in the present scenario, reform should focus on four areas: concerted efforts to bring about a second green revolution, measured strategies to deregulate priority industries, substantial push for infrastructural development and strong encouragement of manufacturing alongside knowledge based services. Such measures will undoubtedly ensure inclusive growth in the country and enable the GDP growth not only to reach but even to sustain the magical double digit figures as projected by many economists. The book aims at acquainting readers with the economic scenario in India in its true spirit. On one hand, it suggests effective measures to meet the challenges ahead. On the other, it is hoped that the book will be found highly useful by the researchers and students of economics, government executives, parliamentarians and legislators concerned with the formulation and execution of economic policies. And the general readers keen to know in depth the present state of Indian economy and the challenges ahead.

Liberalisation and Globalisation of Indian Economy Kulwant Rai Gupta, 1995. Six years have passed since the fast process of liberalisation and globalisation was started in India. In July 1991, the book examines the achievements and failures of the process of economic reforms during this period. It makes useful suggestions to make the economic reforms more successful and human. The role which the state has to play in accelerating the process of economic development and in lessening social tensions involved in rapid economic reforms has been clearly laid down in detail. The book studies the experience of economic reforms in other countries and the lessons which India can draw from that. It also examines the role which multinationals can play in the economic development of the country. The book analyses the impact of economic reforms on the agricultural economy and the cottage and small scale sector. It

Emphasises The Need For Greater Attention To These Sectors On Which Depends The Well Being Of An Overwhelming Portion Of The Population A Host Of Issues Concerning The Process Of Liberalisation And Globalisation Have Been Examined By Fortyseven Economists Spread Over The Entire Country The First Volume Was Published In 1995 And The Response Of Readers Was So Heavy That It Had To Be Reprinted Again The Encouraging Response To The First Volume Has Led To The Publication Of The Second Volume
