

Optimizing Data Integration Solutions by Customizing the IBM InfoSphere Information Server Deployment Architecture

IBM Redbooks Solution Guide

IBM® InfoSphere® Information Server provides a unified data integration platform so that you can understand, cleanse, transform, and deliver trustworthy and context-rich information to critical business initiatives. InfoSphere Information Server includes several product modules and components that enable an integrated end-to-end information integration solution, as shown in Figure 1. You can deploy the InfoSphere Information Server components in specific patterns to achieve enterprise business objectives in an optimal manner. These patterns vary depending on several factors, including which product modules will be used, the size of the user community, and the needs for high availability.

Figure 1. IBM InfoSphere Information Server: Solutions for optimized data integration

This solution also includes a facility for governance throughout the process. This key element of the InfoSphere Information Server platform is a rich, shared metadata layer that provides visibility into the business and the technical aspects of your information architecture.
