Health, Wellness and Social Policy Guy Bäckman, 2010 Social and Health Services are at the core of the debate in Europe. On the one hand, the topic tackles one of the vital points of the claimed European social Model. On the other hand, politics around these services are very much about their liberalisation and managerialisation. The 21 contributions that are gathered in this volume take up on this topic and show the complexity of the topic. And it is only by spanning from the fundamental questions around human and social rights to the concrete analysis of service provision and use of services. The contributors to this volume span across different fields of expertise and come as well from different national and regional backgrounds. This opens the way of communicating common grounds but as well the way of engaged discussions that are concerned with the actual meaning of general positions when it comes to societal and social practice. This reflects very much Guy Bäckman's research that includes many areas of health, social and welfare policy. The Festschrift *Health, Wellness and Social Policy* had been compiled in his honor. The authors want to recognize the important contribution Guy Bäckman made over the years and they want it by fostering the further debates in this area
