Chapter 23: Musculoskeletal System

Answer Keys: Study Guide and Lab Manual

1. 1. In *non-synovial* joints, the bones are united by fibrous tissue or cartilage and are immovable (e.g., the sutures in the skull) or only slightly movable (e.g., the vertebrae). *Synovial* joints are freely movable, because they have bones that are separated from each other and are enclosed in a joint cavity.
2. 2. The four signs of acute inflammation:
 1. (1) Exquisite tenderness.
 2. (2) Swelling.
 3. (3) Heat.
 4. (4) Redness.
- 3. The differences are as follows:
 - • Dislocation: one or more bones in a joint are out of position.
 - • Subluxation: partial dislocation of a joint.
 - • Contracture: shortening of a muscle leading to limited range of motion of a joint.
 - • Ankylosis: stiffness or fixation of a joint.
- 4. Test active range of motion by asking the person to move his or her joint voluntarily. To test passive range of motion, anchor the joint with one hand while your other hand slowly moves it to its limit. The normal ranges of active and passive motion should be the same.
- 5. To measure true leg length: measure between fixed points, from the anterior iliac spine to the medial malleolus, crossing the medial side of the knee (see Fig. 23.45). Normally these measurements are within 1 cm of each other. To measure apparent leg length, when true leg length is equal but the legs still look unequal, measure from a nonfixed point (the umbilicus) to a fixed point (medial malleolus) on each leg.
- 6. See the text description of Ortolani maneuver and refer to Fig. 23.46.
- 7. See test description of functional assessment for the older adult, under "Normal Range of Findings."
- 8. See photograph and descriptions of swan-neck deformity and boutonnière deformity in Table 23.4, Abnormalities of the Wrist and Hand.
- 9. Bouchard nodes are bony overgrowths on the proximal interphalangeal joints. Heberden nodes are bony overgrowths of the distal interphalangeal joints. Both types of nodes are hard and nontender, and occur with osteoarthritis. See photograph in Table 23.4, Abnormalities of the Wrist and Hand.
