Manual of Austere and Prehospital Ultrasound Benjamin D. Nicholson, Michael J. Vitto, Harinder S. Dhindsa, 2021-01-27 Ultrasound has rapidly become integral to the practice of emergency medicine Over the past few years with improvements in device size and cost there has been increasing interest in exploring the utility of ultrasound in the prehospital environment Much of the available literature on ultrasound in the emergency setting focuses on care delivered in emergency departments and intensive care units within the developed world As a result most resources are inappropriate and inadequate for doctors and non physicians practicing in out of hospital environments that by definition are resource limited This manual fills that gap by focusing on simplified discussions of ultrasound studies ultrasound physics and research that impacts out of hospital care in order to meet the needs of prehospital and austere providers The manual discusses the use of ultrasound for diagnosis in out of hospital care advanced noninvasive monitoring of patients and safety in performing procedures common to the prehospital and austere environment As is the approach for prehospital education the chapters

are complaint based and not diagnosis based where applicable Chapters cover ultrasound image interpretation and basic physics common image adjustments to improve image quality unique challenges found in urban prehospital environments austere wilderness environments tactical environments and military special operations environments and initial training quality improvement assurance programs and credentialing It also includes a section on procedures such as pericardiocentesis vascular access cricothyroidotomy and others specific to austere providers The Manual of Austere and Prehospital Ultrasound is an essential resource for physicians and related professionals residents and medical students in emergency medicine civilian and military EMS providers and critical care flight paramedics and nurses U.S. ARMY AEROMEDICAL EVACUATION CRITICAL CARE FLIGHT PARAMEDIC STANDARD MEDICAL OPERATING GUIDELINES (2023-2024) U.S. Army ,2022-12-31 CONTENTS 1 U S ARMY AEROMEDICAL EVACUATION CRITICAL CARE FLIGHT PARAMEDIC STANDARD MEDICAL OPERATING GUIDELINES CY23 Version Published January 2023 318 pages 2 TCCC Guidelines for Medical Personnel 15 December 2021 19 pages 3 JTS Clinical Practice Guidelines 2 260 total pages current as of 19 September 2023 INTRODUCTION The SMOG continues to go through significant improvements with each release as a result of the collaboration of Emergency Medicine professionals experienced Flight Medics Aeromedical Physician Assistants Critical Care Nurses and Flight Surgeons There has been close coordination in the development of these guidelines by the Joint Trauma System and the Defense Committees on Trauma Our shared goal is to ensure the highest quality en route care possible and to standardize care across all evacuation and emergency medical pre hospital units It is our vision that all of these enhancements and improvements will advance en route care across the services and the Department of Defense Unit medical trainers and medical directors should evaluate Critical Care Flight Paramedics CCFP ability to follow and execute the medical instructions herein These medical guidelines are intended to guide CCFPs and prehospital professionals in the response and management of emergencies and the care and treatment of patients in both garrison and combat theater environments Unit medical providers are not expected to employ these guidelines blindly Unit medical providers are expected to manipulate and adjust these guidelines to their unit s mission and medical air crew training experience Medical directors or designated supervising physicians should endorse these guidelines as a baseline appropriately adjust components as needed and responsibly manage individual unit medical missions within the scope of practice of their Critical Care Flight Paramedics Enroute Critical Care Nurses and advanced practice aeromedical providers The medication section of this manual is provided for information purposes only CCFPs may administer medications only as listed in the guidelines unless their medical director and or supervising physician orders a deviation Other medications may be added so long as the unit supervising physician and or medical director approves them This manual also serves as a reference for physicians providing medical direction and clinical oversight to the CCFP Treatment direction which is more appropriate to the patient s condition than the guideline should be provided by the physician as long as the CCFP scope of practice is not exceeded Any
