**The Handbook of Public Sector Communication** Vilma Luoma-aho, María José Canel, 2020-02-03. A multidisciplinary collection on global public entity strategic communication. Research into public sector communication investigates the interaction between public and governmental entities and citizens within their sphere of influence. Today's public sector organizations are operating in environments where people receive their information from multiple sources. Although modern research demonstrates the immense impact public entities have on democracy and societal welfare, communication in this context is often overlooked. Public sector organizations need to develop communicative intelligence in balancing their institutional agendas and aims of public engagement. The Handbook of Public Sector Communication is the first comprehensive volume to explore the field. This timely innovative volume examines the societal role, environment, goals, practices and development of public sector strategic communication. International in scope, this handbook describes and analyzes the contexts, policies, issues and questions that shape public sector communication. An interdisciplinary team of leading experts discusses diverse subjects of rising importance to public sector government and political communication. Topics include social exchange, relationships, crisis communication, citizen expectations, measuring and evaluating media diversity and inclusion, and more. Providing current research and global perspectives, this important resource addresses the questions public sector communicators face today. Summarizes the current state of public sector communication worldwide. Clarifies contemporary trends and practices including mediatization, citizen engagement and change and expectation management. Addresses global challenges and crises such as corruption and bureaucratic roadblocks. Provides a framework for measuring communication effectiveness. Requiring minimal prior knowledge of the field. The Handbook of Public Sector Communication is a valuable tool for academics, students and practitioners in areas of public administration, public management, political communication, strategic and organizational communication and related fields such as political science, sociology, marketing, journalism and globalization studies.

**CERN Courier**, 2016. *Communicating Science and Technology in Society* Ana Delicado, Fabienne Crettaz, Von Roten, Katarina Prpić, 2020-11-22. This volume addresses the engagement between science and society from multiple viewpoints. At a time when trust in experts is being questioned, misinformation is rife and scientific and technological development shows growing social impact, the volume examines the challenges in involving the public in scientific debates and decisions. It takes into account societal needs and concerns in research and analyses the interface between the roles of

institutions and individuals From environmental challenges to science communication participatory technological design to animal experimentation and transdisciplinarity to norms and values in science the volume brings together research on areas in which scientists and citizens interact across diverse often understudied socio cultural contexts in Europe It encompasses the natural sciences engineering and the social sciences and the chapters follow diverse theoretical frameworks and methodologies including both quantitative and qualitative approaches This volume contributes not just to scholarly knowledge on the topic of science and society relations but also provides useful information for students policy makers journalists and STEM science technology engineering and mathematics researchers keen on engaging with their publics and conducting responsible research and innovation

**Making Sense of Nature** Noel Castree, 2013-08-15 We listen to a cacophony of voices instructing us how to think and feel about nature including our own bodies The news media wildlife documentaries science magazines and environmental NGOs are among those clamouring for our attention But are we empowered by all this knowledge or is our dependence on various communities allowing our thoughts sentiments and activities to be unduly governed by others Making Sense of Nature shows that what we call nature is made sense of for us in ways that make it central to social order social change and social dissent By utilising insights and extended examples from anthropology cultural studies human geography philosophy politics sociology science studies this interdisciplinary text asks whether we can better make sense of nature for ourselves and thus participate more meaningfully in momentous decisions about the future of life human and non human on the planet This book shows how nature can be made sense of without presuming its naturalness The challenge is not so much to rid ourselves of the idea of nature and its collateral concepts such as genes but instead we need to be more alert to how why and with what effects ideas about nature get fashioned and deployed in specific situations Among other things the book deals with science and scientists the mass media and journalists ecotourism literature and cinema environmentalists advertising and big business This innovative text contains numerous case studies and examples from daily life to put theory and subject matter into context as well as study tasks a glossary and suggested further reading The case studies cover a range of topics range from forestry in Canada and Guinea to bestiality in Washington State to how human genetics is reported in Western newspapers to participatory science experiments in the UK Making Sense of Nature will empower readers from a wide range of fields across the social sciences humanities and physical sciences

**Communicating Science in Social Contexts** Donghong Cheng, Michel Claessens, Nicholas R. J. Gascoigne, Jenni Metcalfe, Bernard Schiele, Shunke Shi, 2008-07-15 Science communication as a multidisciplinary field has developed remarkably in recent years It is now a distinct and exceedingly dynamic science that melds theoretical approaches with practical experience Formerly well established theoretical models now seem out of step with the social reality of the sciences and the previously clear cut delineations and interacting domains between cultural fields have blurred Communicating Science in Social Contexts examines that shift which itself depicts a profound recomposition of knowledge

fields activities and dissemination practices and the value accorded to science and technology Communicating Science in Social Contexts is the product of long term effort that would not have been possible without the research and expertise of the Public Communication of Science and Technology PCST Network and the editors For nearly 20 years this informal international network has been organizing events and forums for discussion of the public communication of science

*Public Relations for Public Health and Social Good* Brooke W. McKeever, 2024-07-25 Foregrounding the work professional communicators do to support public health and social missions this book examines how the principles and practices of public relations can be applied by nonprofit government and corporate entities working to understand and improve public health and social conditions Many organizations attempt to influence prosocial behaviors such as donating one's time money or talents participating in advocacy or activism or otherwise working to protect public health or inspire social change This book explores research and practice related to communication and other factors involved in motivating such efforts Each chapter focuses on a different topic providing definitions summarizing research and explaining how it has been or can be applied to practice and ends with discussion questions to consider and references for further reading Ideally placed for advanced undergraduate and graduate courses in public relations health communication or strategic communication as well as for communications professionals looking to apply research to their practice
