Healthcare Architecture In An Era Of Radical Transformation:

Healthcare Architecture in an Era of Radical Transformation Stephen Verderber, David J. Fine, Professor David J. Fine, 2000 In the 1960s and 1970s large high technology inpatient oriented hospitals reflected the central role of such facilities in an expanding healthcare system But hospital architecture and the healthcare system have vastly changed since then in profound and unpredicted ways This book explores for the first time how and why acute care hospitals and the often related psychiatric facilities retirement communities and community clinics have been transformed during the final decades of the twentieth century The authors also consider utopian visions of unbuilt work and look ahead to the possible healthcare landscape of the future health villages home based care for the aging and aged population and cyberclinics and virtual hospitals

Innovations in Behavioural Health Architecture Stephen Verderber, 2018-01-19 WINNER OF A NAUTILUS 2018 SILVER MEDAL BOOK AWARD Innovations in Behavioural Health Architecture is the most comprehensive book written on this topic in more than 40 years It examines the ways in which healthcare architecture can contribute as a highly valued informational and reference source to the provision of psychiatric and addictive disorder treatment in

communities around the world It provides an overview of the need for a new generation of progressively planned and designed treatment centres both inpatient and outpatient care environments and the advantages challenges and opportunities associated with meeting the burgeoning need for treatment settings of this type Additional chapters address the specifics of geriatric psychiatry and its architectural ramifications in light of the rapid aging of societies globally and provide a comprehensive compendium of planning and design considerations for these places in both inpatient and outpatient care contexts Finally the book presents an expansive and fully illustrated set of international case studies that express state of the art advancements in architecture for behavioural healthcare

Innovations in Hospital Architecture Stephen Verderber,2010-03-31 Captures key developments in the field of sustainable hospital architecture **Innovations in Transportable Healthcare Architecture** Stephen Verderber,2015-10-05 *Innovations in Transportable Healthcare Architecture* is the first book to examine the ways that healthcare architecture can provide better assistance in disaster stricken communities Aimed at architects and other professionals working across the disaster relief sector it provides An overview of the need for rapid response healthcare facilities Global case studies which demonstrate real examples Historical perspectives on redeployables used in past military and civilian contexts Analysis of the advantages challenges and opportunities associated with offsite premanufactured healthcare facilities and their component systems for permanent installations or reuse on multiple sites Planning and design considerations for transportable offsite built healthcare architecture State of the art research on pop up clinics truck based configurations ISO container based outpatient clinical and trauma care centres and modularized facilities for contemporary military and civilian contexts *Innovations in Transportable Healthcare Architecture* will be an invaluable reference source for architects disaster mitigation planners design and engineering practitioners non governmental medical aid organizations NGOs governmental health ministries and policy specialists across the spectrum of disciplines engaged in disaster mitigation and the provision of healthcare in medically underserved communities globally

Nature through a Hospital Window Shan Jiang,2022-03-10 Adopting an evidence based approach this book uses two state of the art experimental studies to explore nature s therapeutic benefits in healthcare environments emphasizing how windows and transparent spaces can strengthen people nature interactions High quality supportive and patient centred healthcare environments are a key priority for healthcare designers worldwide with ageing populations creating a demand for remodeled and updated facilities The first study demonstrates individual psychophysiological responses moods and preferences in simulated hospital waiting areas with different levels of visual access to nature through windows while the second experiment uses cutting edge immersive virtual reality techniques to explore how gardens and nature views impact people s spatial cognition wayfinding behaviors and experience when navigating hospitals Through these studies and discussions drawing on architectural theory the book highlights the important benefits of having access to nature from hospital interiors This concise volume will appeal to academics and

designers interested in therapeutic landscapes and healthcare architecture Managerial Epidemiology for Health Care Organizations Peter J. Fos, David J. Fine, 2012-06-28 Managerial Epidemiology for Health Care Organizations provides readers with a thorough and comprehensive understanding of the application of epidemiological principles to the delivery of health care services and management of health care organizations As health administration becomes evidence and population based it becomes critical to understand the impact of disease on populations of people in a service area This book also addresses the need of health organizations to demonstrate emergency preparedness and respond to bioterrorism threats A follow up to the standard text in the field this book introduces core epidemiology principles and clearly illustrates their essential applications in planning evaluating and managing health care for populations This book demonstrates how health care executives can incorporate the practice of epidemiology into their various management functions and is rich with current examples concepts and case studies that reinforce the essential theories methods and applications of managerial epidemiology *Portico*, 2000 **The Production of Hospice Space** Sarah McGann, 2016-03-03 Challenging the widely held notion of a hospice as a building or a place this book argues that it should instead be a philosophy of care It proposes that the positive and negative impact that space can have in the pursuit of an ideal such as hospice care has previously been underestimated Whether it be a purpose built hospice part of a hospital a nursing home or within the home a hospice is anchored by space and spatial practices and these spatial practices are critical for a holistic approach to dying with dignity Such spatial practices are understood as part of a broad architectural social conceptual and theoretical process By linking health social and architectural theory and establishing conceptual principles this book defines hospice as a philosophy that is underpinned by space and spatial practice In putting forward the notion of hospice space removed from the bounds of a specific building type it suggests that hospice philosophy could and should be available within any setting of choice where the spatial practices support that philosophy be it home nursing home hospice or hospice friendly hospitals

Obsolescence Daniel M. Abramson, 2016-02-12 In our architectural pursuits we often seem to be in search of something newer grander or more efficient and this phenomenon is not novel In the spring of 1910 hundreds of workers labored day and night to demolish the Gillender Building in New York once the loftiest office tower in the world in order to make way for a taller skyscraper The New York Times puzzled over those who would sacrifice the thirteen year old structure as ruthlessly as though it were some ancient shack In New York alone the Gillender joined the original Grand Central Terminal the Plaza Hotel the Western Union Building and the Tower Building on the list of just one generation s razed metropolitan monuments In the innovative and wide ranging *Obsolescence* Daniel M Abramson investigates this notion of architectural expendability and the logic by which buildings lose their value and utility The idea that the new necessarily outperforms and makes superfluous the old Abramson argues helps people come to terms with modernity and capitalism s fast paced change *Obsolescence* then gives an unsettling experience purpose and meaning Belief in obsolescence as Abramson shows also

profoundly affects architectural design In the 1960s many architects worldwide accepted the inevitability of obsolescence experimenting with flexible modular designs from open plan schools offices labs and museums to vast megastructural frames and indeterminate building complexes Some architects went so far as to embrace obsolescence s liberating promise to cast aside convention and habit envisioning expendable short life buildings that embodied human choice and freedom Others we learn were horrified by the implications of this ephemerality and waste and their resistance eventually set the stage for our turn to sustainability the conservation rather than disposal of resources Abramson s fascinating tour of our idea of obsolescence culminates in an assessment of recent manifestations of sustainability from adaptive reuse and historic preservation to postmodernism and green design which all struggle to comprehend and manage the changes that challenge us on all sides

Lean-Led Hospital Design Naida Grunden, Charles Hagood, 2012-03-16 Lean Led Hospital Design explains how hospitals can be built to increase patient safety and reduce wait times while eliminating waste lowering costs and easing some of healthcare s most persistent problems It supplies a simplified timeline of architectural planning from start to finish to guide readers through the various stages of the Lean design development philosophy including Lean architectural design and Lean work design It includes examples from several real healthcare facility design and construction projects as well as interviews with hospital leaders and architects

Feeling blue Victoria Bates, 2025-08-19 *Feeling blue* is the first book length history of colour in modern hospitals It examines colour in relation to six key themes hygiene emotion humanisation homeliness play consumerism which are tied together by the idea of the modern hospital The book does not simply describe changes to the appearance of hospitals over time but instead thinks expansively about the role of colour in shaping how hospitals felt It uses colour to understand the layered meanings of modernity in twentieth century Britain and its relationship to the mundane or everyday life of hospitals

The Impact of Hospitals, 300-2000 John Henderson, Peregrine Horden, Alessandro Pastore, 2007 The first wide ranging collection of articles on the history of hospitals in the Mediterranean northern Europe and the Americas for over 17 years The contributions present a nuanced approach to the impact of hospitals on society over a very long time period and an exceptional geographical range

Multimodality in the Built Environment Louise J. Ravelli, Robert J. McMurtrie, 2015-11-19 This book provides an extended exploration of the multimodal analysis of spatial three dimensional texts of the built environment culminating in a holistic approach termed Spatial Discourse Analysis SpDA

Based on existing frameworks of multimodal analysis this book applies adapts and extends these frameworks to spatial texts The authors argue that choices in spatial design create meanings about what we perceive and how we can or should behave within spatial texts influence how we feel in and about those spaces and enable these texts to function as coherent wholes Importantly a spatial text once built is also a resource which is then used and an essential aspect of understanding these texts is to consider what users themselves contribute to the meaning potential of these texts The book takes the metafunctional approach familiar from Systemic Functional Linguistics SFL and foregrounds each metafunction in turn textual interpersonal experiential and logical in relation to the detailed analysis of a particular spatial text

Design for Pediatric and Neonatal Critical Care Mardelle McCuskey Shepley, 2014-02-03 *Design for Pediatric and Neonatal Critical Care* provides an overview of the design and research issues associated with the development of environments for pediatric and neonatal intensive care This is the first and only book dedicated to this topic and was created to support individuals interested in developing and studying critical care environments for children and their families In addition to a detailed analysis of the literature from research and practice the author provides a summary of the historical development of critical care for infants and children and information regarding the role of PICUs and NICUs in the critical care system A discussion of current codes and future trends is also provided *Design for Pediatric and Neonatal Critical Care* includes essays from prominent voices in the field ranging from inspired young architects and researchers to world renowned healthcare design and research icons Illustrations of work that has been identified as exemplary or representative of recent directions are included which will help those planning new or remodeled projects to identify and examine precedents This book is intended to help designers and researchers enhance healing environments for young patients in critical care settings and provide information in support of the families and staff who provide care for these children and infants

Architecture and Health Dina Battisto, Jacob J. Wilhelm, 2019-10-17 *Architecture and Health* recognizes the built environment and health as inextricable encouraging a new mind set for the profession Over 40 international award winning projects are included to explore innovative design principles linked to health outcomes The book is organized into three interdependent health domains individual community and global in which each case study proposes context specific architectural responses Case studies include children s hospitals rehabilitation facilities elderly housing mental health facilities cancer support centers clinics healthy communities healthcare campuses wellness centers healing gardens commercial offices infrastructure for developing countries sustainable design and more Representing the United States Africa Asia Europe and Australia each author brings a new perspective to health and its related architectural response This book brings a timely focus to a subject matter commonly constricted by normative building practices and transforms the dialogue into one of creativity and innovation With over 200 color images this book is an essential read for architects designers and students to explore and analyze designed environments that promote health and well being

Landscapes of Mobility Jennifer Johung, 2016-04-22

Our world is unquestionably one in which ubiquitous movements of people goods technologies media money and ideas produce systems of flows Comparing case studies from across the world including those from Benin the United States India Mali Senegal Japan Haiti and Romania this book focuses on quotidian landscapes of mobility Despite their seemingly familiar and innocuous appearances these spaces exert tremendous control over our behavior and activities By examining and mapping the politics of place and motion this book analyzes human beings embodied engagements with their built world and provides diverse perspectives on the ideological and political underpinnings of landscapes of mobility In order to describe landscapes of mobility as a historically socially and politically constructed condition the book is divided into three sections objects contacts and flows The first section looks at elements that constitute such landscapes including mobile bodies buildings and practices across multiple geographical scales As these variable landscapes are reconstituted under particular social economic ecological and political conditions the second section turns to the particular practices that catalyze embodied relations within and across such spaces Finally the last section explores how the flows of objects bodies interactions and ecologies are represented presenting a critical comparison of the means by which relations processes and exchanges are captured depicted reproduced and re embodied

The Architecture of Use Stephen Grabow, Kent

Spreckelmeyer, 2014-10-03 By analyzing ten examples of buildings that embody the human experience at an extraordinary level this book clarifies the central importance of the role of function in architecture as a generative force in determining built form Using familiar twentieth century buildings as case studies the authors present these from a new perspective based on their functional design concepts Here Grabow and Spreckelmeyer expand the definition of human use to that of an art form by re evaluating these buildings from an aesthetic and ecological view of function Each building is described from the point of view of a major functional concept or idea of human use which then spreads out and influences the spatial organization built form and structure In doing so each building is presented as an exemplar that reaches beyond the pragmatic concerns of a narrow program and demonstrates how functional concepts can inspire great design evoke archetypal human experience and help us to understand how architecture embodies the deeper purposes and meanings of everyday life
