Teaching and Learning Frank K. Lester, 2007-02-01 The audience remains much the same as for the 1992 Handbook namely
mathematics education researchers and other scholars conducting work in mathematics education This group includes
college and university faculty graduate students investigators in research and development centers and staff members at
federal state and local agencies that conduct and use research within the discipline of mathematics The intent of the authors
of this volume is to provide useful perspectives as well as pertinent information for conducting investigations that are
informed by previous work The Handbook should also be a useful textbook for graduate research seminars In addition to the
audience mentioned above the present Handbook contains chapters that should be relevant to four other groups teacher
educators curriculum developers state and national policy makers and test developers and others involved with assessment
Taken as a whole the chapters reflects the mathematics education research community's willingness to accept the challenge
of helping the public understand what mathematics education research is all about and what the relevance of their research
