

Logic Synthesis (Logic Optimization)

- ❖ Major concerns when synthesizing a logic gate network:
 - **functional metric**: such as fanin, fanout, and others.
 - **non-functional metric**: such as area, power, and delay.
- ❖ Two phases of logic synthesis:
 - technology-independent logic optimization
 - technology-dependent logic optimization
- ❖ The process of translating from technology-independent to the technology-dependent gate network is called **library binding**.
