Knowledge Partnering for Community Development Robyn Eversole, 2014-10-17 Effective community development means that many different stakeholders have to work together governments development organizations and NGOs and most importantly the people they serve Knowledge Partnering for Community Development teaches community development professionals how to mediate community needs and development agendas to make community based solutions for development challenges Based on the newest research in community and global development Eversole shows readers a strong research and theoretically based framework for understanding local development processes and gives them the skills to turn this into cutting edge practice Each chapter features global case studies of innovative community state partnerships and practical application exercises and strategies for professionals looking to bring new approaches to their research Knowledge Partnering for Community Development is essential for community workers and students of community development looking to bridge the gap between research insight and best practice between community actors Theories of Local Economic Development James E. Rowe, 2016-12-05 In economic development theory and practice exist as two

seemingly separate realities Academics strive to develop or refine theory by drawing on abstract concepts about the way people behave and institutions work while practitioners draw from a stock of experiences By bringing together leading theorists and practitioners such as Blakely Blair McCann Luger Gunder Stough and Stimson this book provides the first comprehensive overview of local economic development theories for over fifteen years It explores the theory behind the key concepts that every economic practitioner must understand and in doing so ties together the various theories from across the disciplines to practice

Local Food and Community Development Gary Paul Green, Rhonda Phillips, 2014-10-20 Food has become an essential component in community development practice Whether in reference to building a local or regional food system or addressing food insecurity food has become a focus in community development approaches in many localities Farmers markets community gardens farm to school programs and other food centered initiatives have been used to foster community development processes across a spectrum of desired outcomes The surging interest in food for fostering community development draws attention to numerous applications ranging from grassroots efforts to formal programs sponsored by the public or nonprofit sectors These efforts are often in conjunction with local private businesses helping create micro businesses and supporting the small farm movement Some regions are even considering economic development strategies of food clusters to promote speciality food businesses and supporting programs This volume explores the relationships between food and community and the various approaches for development through a selection of chapters illustrating a wide range of applications This book is a compilation of articles published in the journal Community Development

Methods For Identifying Local Import Substitution Opportunities To Foster Sustainable Regional Economies David Elvin, 2008-05-15 Why does buying local make so much economic sense for regions What are the biases and strengths of using a traditional economic base approach to regional economic analysis versus industry cluster analysis This engaging book explores answers using the Pioneer Valley of Western Massachusetts as a testing ground Great for regional planners in food systems economic development transportation industrial development and more

Climate Governance and Urban Planning Deborah Heinen, 2022-12-08 Urban planning as a discipline is deeply integral to implementing a low carbon future This book fosters an understanding for how the rules in use that govern urban planning influence the ability to implement low carbon development patterns Drawing on the theoretical foundations of the climate governance and urban planning

literatures the book provides a context to understand plan implementation challenges and obstacles in metropolitan areas As metropolitan regions across the globe seek to reduce emissions from transportation many levels of governments have developed ambitious climate action plans that make land use and transportation recommendations in order to reduce vehicle miles traveled Many have recommended low carbon development patterns which are characterized by intensified and diversified uses around rapid transit stations However the implementation of these recommendations is done within the context of different rules in use unique to the planning systems in each metropolitan region The book examines the rules in use in three metropolitan regions of similar demographic size the Metro Vancouver Puget Sound and the Stuttgart regions By examining the implementation of low carbon development patterns the book focuses on growth management related questions about how to coordinate transit investments with land use decisions in metropolitan regions The book finds that state legislation that deals with metropolitan planning and regional growth strategies can greatly aid in creating accountability among actors as well as provide a road map to navigate conflicts when implementing low carbon development patterns By focusing on the rules in use the book is of interest to policy makers planners advocates and researchers who wish to assess and improve the odds of implementing low carbon development patterns in a metropolitan region Axial Shift

Benjamin Gussen, 2019-05-17 This book uses historical analysis constitutional economics and complexity theory to furnish an account of city subsidiarity as a legal ethical political and economic principle The book contemplates subsidiarity as a constitutional principle where cities would benefit from much wider local autonomy Constitutional economics suggests an optimal limit to jurisdictional footprints territories This entails preference for political orders where sovereignty is shared between different cities rather states where capital cities dominate The introduction of city subsidiarity as a constitutional principle holds the key to economic prosperity in a globalizing world Moreover insights from complexity theory suggest subsidiarity is the only effective response to the problem of scale It is a fitness trait that prevents highly complex systems from collapsing The nation state is a highly complex system within which cities function as attractors The collapse of such systems would ensue if there were strong coupling between attractors Such coupling obtains under legal monism Only subsidiarity can make the eventuality of collapse improbable The emergent and self organizing properties of subsidiarity entail a shift in policy emphasis towards cities with a wide margin of autonomy **Usable Social Science** Neil J.

Smelser, John S. Reed, 2012-10-15 This volume is a one of a kind contribution to applied social science and the product of a long collaboration between an established interdisciplinary sociologist and a successful banking executive Together Neil Smelser and John Reed use a straightforward approach to presenting substantive social science knowledge and indicate its relevance and applicability to decision making problem solving and policy making Among the areas presented are space and time coordinates of social life cognition and bias group and network effects the role of sanctions organizational dynamics and macro changes associated with economic development Finally the authors look at the big picture of why society at large

demands and needs social science knowledge and how the academy actually supplies relevant knowledge *Local Councillors in Europe* Björn Egner, David Sweeting, Pieter-Jan Klok, 2013-03-16 Councillors are the essence of local representative democracy linking ordinary citizens and decision makers in municipal arenas In cross national perspective and taking in countries from across Europe this book analyses the recruitment patterns career party associations role perceptions and attitudes to democracy representation and participation of local councillors Matters such as gender parties institutions municipal reform functions in governance networks and councillor influence are considered using data collected in an international survey covering some 12 000 members of the local political elite Drawing on diverse and eclectic literature the contributions in this volume comprise a comprehensive and revealing analysis of modern councillors

Wellness City Ari-Veikko Anttiroiko, 2018-04-19 Addressing the continuous need for new growth sectors in post industrial cities this book considers the economic significance of wellness from a development policy perspective The author goes beyond personal health discourse to conceptualise wellness as an emerging industry presenting empirical cases of community attraction and export orientated strategies around the world Combining holistic health urban governance and economic development this book will provide valuable reading for those studying policy tourism and the wellness sector as well as business entrepreneurs within this evolving industry *The Making of Twenty-First-Century Richmond* Thad Williamson, Julian M. Hayter, Amy L. Howard, 2024-12-02 Richmond Virginia took center stage globally in the summer of 2020 as an epicenter of antiracist protests in the wake of the police murder of George Floyd In a period of just a few weeks overwhelming public support grew for removing Richmond s Confederate monuments Activists then transformed the remaining statue of Robert E Lee into a shrine to African American resolve to the Black Lives Matter movement and to Black victims of police brutality Coming to terms with Richmond s tortured racial history however is much more difficult than toppling symbols of white supremacy This book explores these dynamics via a multidisciplinary framework of historical research public policy analysis and political analysis showing the inner dynamics of politics and governance in Richmond The authors reveal why change and progress has often been so difficult to achieve and why that matters with a focus on three fundamental policy areas education economic development and housing The result is a comprehensive assessment of urban governance in a major southern city in the early twenty first century as well as an accounting of the policy and human consequences of both its limited successes and its recurring failures **Driving Tourism through Creative Destinations**

Religion and Ethics in a Globalizing World L. Anceschi, J. Camilleri, R. Palapathwala, 2011-02-14 Around the world religion is an increasingly vital and pervasive force in

both personal and public life Though this trend has been widely noted its long term implications are as yet only dimly perceived Will this be a force for healing or for violence To express the question to its most dramatic yet urgent form can the world s major religious traditions respond constructively to contemporary challenges in the public sphere that are now by definition global Religion and Ethics in a Globalizing World seeks to address this question and to contribute to a greater understanding of the role of religion in the paradoxical context of a world that is increasingly unified but which remains fundamentally plural

Local Economic Development John P. Blair,1995-03-29 Blending knowledge from a variety of disciplines planning political science finance sociology and marketing with a strong analytical approach this is the ideal text for courses in local economic development as well as public finance public administration and policy studies In addition practitioners will find much of value in this impressive volume

Understanding Local Economic Development Emil Malizia,Edward J. Feser,Henry Renski,Joshua Drucker,2020-10-05 This book offers insights into the process and the practice of local economic development Bridging the gap between theory and practice it demonstrates the relevance of theory to inform local strategic planning in the context of widespread disparities in regional economic performance The book summarizes the core theories of economic development applies each of these to professional practice and provides detailed commentary on them This updated second edition includes more recent contributions regional innovation agglomeration and dynamic theories and presents the major ideas that inform economic development strategic planning particularly in the United States and Canada The text offers theoretical insights that help explain why some regions thrive while others languish and why metropolitan economies often rise and fall over time Without theory economic developers can only do what is politically feasible This text however provides them with a logical tool for thinking about development and establishing an independent basis from which to build the local consensus needed for evidence based action undertaken in the public interest Offering valuable perspectives on both the process and the practice of local and regional economic development this book will be useful for both current and future economic developers to think more profoundly and confidently about their local economy The Open Access version of this book available at <http://www.taylorfrancis.com> has been made available under a Creative Commons Attribution Non Commercial No Derivatives CC BY NC ND 4 0 license
