Looking Beyond The Structure Critical Thinking For Designers Architects:

Looking Beyond the Structure Dan Bucsesu, Michael Eng, 2009-11-20 In *Looking Beyond the Structure* architect Dan Bucsesu and philosopher Michael Eng record their conversations about the relationship of the built environment and other forms of design to the culture in which they are created. The authors exchange their interpretations of selected readings about design theory and invite the reader to join in the discussion. Questions following each chapter's reading stimulate critical thinking about the philosophies and theories of design and additional assignments encourage students to express their critical thinking skills visually. **Landscape Architecture Criticism** Jacky Bowring, 2020-04-29 *Landscape Architecture Criticism* offers techniques, perspectives and theories which relate to landscape architecture, a field very different from the more well-known domains of art and architectural criticism. Throughout the book, Bowring delves into questions such as: how do we know if built or unbuilt works of landscape architecture are successful? What strategies are used to measure the success or failure and by whom? Does design criticism only come in written form? It brings together diverse perspectives on criticism in landscape architecture, establishing a substantial point of reference for approaching design critique, exploring how criticism developed within the discipline. Beginning with an introductory overview to set the framework, the book then moves on to historical perspectives, the purpose of critique, theoretical positions ranging from aesthetics to politics and experience, unbuilt projects, techniques and communication. Written for professionals and academics as well as for students and instructors in landscape architecture, it includes strategies, diagrams, matrices and full-colour illustrations to prompt discussion and provide a basis for exploring design critique. **Cases on Interdisciplinary Research Trends in Science, Technology, Engineering, and Mathematics: Studies on Urban Classrooms** Lansiquot, Reneta D., 2012-10-31 Involving two or more academic subjects, interdisciplinary studies aim to blend together broad perspectives, knowledge, skills and epistemology in an educational setting. By focusing on topics or questions too broad for a single discipline to cover, these studies strive to draw connections between seemingly different fields. *Cases on Interdisciplinary Research Trends in Science, Technology, Engineering, and Mathematics: Studies on Urban Classrooms* presents research and information on implementing and sustaining interdisciplinary studies in science, technology, engineering and mathematics for students and classrooms in an urban setting. This collection of research acts as a guide for researchers and professionals interested in improving learning outcomes for their students. **Practical Pedagogy** Mike Sharples, 2019-04-01 *Practical Pedagogy* expands the universe of teaching and learning. It provides an accessible guide to new and emerging innovations in education with insights into how to become more effective as a teacher and learner. New teachers will find a comprehensive introduction to innovative ways of teaching and learning. Experienced educators will be surprised by the range of useful pedagogies such as translanguaging, crossover learning, teachback, bricolage and rhizomatic learning. Policy makers will gain evidence of how new teaching methods work in practice with resources for curriculum design and course development. Drawing on material from

Structures & Architecture Paulo J. da Sousa Cruz, 2010-07-02 Although Architecture and Structural Engineering have both had their own historical development their interaction has led to many fascinating and delightful structures over time To bring this interaction to a higher level there is the need to stimulate the inventive and creative design of architectural structures and to persuade architects and s

Transgressive Design Strategies for Utopian Cities Bertug Ozarisoy, Hasim Altan, 2023-03-24 This book critically examines the philosophy of the term transgression and how it shapes the utopian vision of contemporary urban design scenarios The aim of this book is to provide scholarly yet accessible graphic novel illustrations to inform narratives of urban manifestos Through four select case studies from the UK Cyprus and Germany the book highlights the paradoxes and contradictions in architecture and provides detailed evaluation of the limits and contemporary forms of sustainable urban regeneration The book proposes an utopian urban vision approach to social political and cultural relations trends and tensions both locally and globally and seeks to inspire an awakening in architectural discourse The book argues that the philosophical undermining of transgression is the result of a phenomenon from a different perspective its philosophical background social construction experimental research process and design implications on the city As such the book provides a critical examination of how architectural design interventions contribute to sustainable urban regeneration and gentrification and can impact local communities This book provides a significant contribution to both undergraduate and postgraduate students as well as early career researchers working in architecture planning and sustainable urban design It offers effective guidance on adopting the state of the art graphical illustrations into their own design projects while considering contradictions between architectural discourse and the philosophy of transgression

The Rhetorical Nature of XML J.D. Appen, Rudy McDaniel, 2009-09-10 The Rhetorical Nature of XML is the first volume to combine rhetoric XML and knowledge management in a substantive manner It serves as a primer on XML and XML related technologies illustrating how the naming of XML elements can be understood as a rhetorical

act and detailing the essentials of knowledge management practices that illustrate the need for intelligently conceived databases in organizations Authors J D Appen and Rudy McDaniel explain how technical knowledge and rhetorical knowledge are symbiotic assets in the modern information economy emphasizing that skilled professionals and apprentice learners must not only adapt to and become adept with new technological environments but they must also remain aware of the dynamic social and technological contexts through which they communicate Appen and McDaniel use this subject as a catalyst to encourage interdisciplinary connections and projects between experts in fields such as technical communication digital media library science computer science and information technology The authors demonstrate techniques for working with XML in interdisciplinary projects with attention to single sourcing and content management Interviews with practitioners working with XML for research and in industry are also included to illustrate how XML is currently being used in a variety of disciplines such as technical communication and digital media Combining applied theory and XML technology to solve real world problems in technical communication and digital media this work provides an entry point for students and practitioners who do not have an extensive background in markup languages enabling them to begin developing user centric projects using XML Visit the book's companion web site <http://rhetoricalxml.com>

Beyond Patronage Joyce Hwang, Martha Bohm, 2016-01-15 Essays projects and interviews will examine emerging forms of sponsorship new forms of connectivity technological or social that produce innovative modes of collaboration and strategies for cultivating relationships that allow us to rethink typical hierarchies between those in power and those in service One could argue that the profession of architecture has traditionally been characterized by patronage Throughout the twentieth century private clients have enabled architects to develop and realize their most significant work Today the landscape of patronage is shifting While the role of private clients is still central to the survival of the profession an increasing number of architects and design practitioners are actively cultivating partnerships with not for profits granting agencies educational institutions and other public organizations How are these broader relationships redefining the role of patronage in architecture Have our current economic ecological and political climates provoked architecture to confront its own priorities and assumptions How can the practice of architecture be shaped not only through relationships of power but also through strategies of empowerment How are emerging practitioners today grappling with issues of inclusion and exclusion in the field
