When the truck is used to carry a load in excess of the rated capacity of the truck, one of the most common causes of failure is the weight of the load's cargo. Cargo weight limits are usually indicated on the manufacturer's cargo weight label. The weight of the cargo must not exceed the weight of the cargo. The total weight of the cargo must not exceed the truck's rated weight. The weight of the cargo must not exceed the truck's rated weight. The weight of the cargo must not exceed the truck's rated weight. The weight of the cargo must not exceed the truck's rated weight.

Any moisture or other impurities added to the vehicle after final date of manufacture, must be weighed and the weight deducted from the grossed cargo weight rating (GCWR) of the vehicle. This may decrease the permissible loading and use of the vehicle or of the vehicle for the vehicle.

The longitudinal stress of gravity may be here determined by the full cargo weight being carried by the truck. If a driver carries his load weight less than the rated weight rating (GWR), the percentage longitudinal stress of the cargo of gravity may be larger. However, tak-

Always have tires in proper weight status that could affect the balance of your vehicle. When the truck engine is loaded, drive to a scale and weigh on the front end and on the rear wheels separately to determine axle loads. Individual axle loads should not exceed either of the gross axle weight ratings (GAWR). The total of the axle loads should not exceed the gross vehicle weight rating (GVWR). These ratings are given on the vehicle certification label that is located either on the left door hinge post or on the left door edge next to the driver. If weight ratings are exceeded, there is too much stress on some of the vehicle's major

Crane weight rating (CWR) means the value specified by the vehicle manufacturer as the cargo carrying capacity in pounds of a vehicle, exclusive of the weight of occupants, compared to 10 pounds more the number of designated seating positions.

Your vehicle dealer will assist you in obtaining a proper track ratings match and ensuring that the vehicle load capacities are not exceeded.

However, the usage context of quality is very one of many factors which may affect the overall performance of a vehicle, including handling, steering and braking. The recommendations here for the company's usage of quality are based on the assumption that the vehicle will be operated with reasonable systems in light of all of the existing conditions. Failure to do so could result in diminished vehicle performance and greatly reduced lifespan.
