Psychotherapy Nikolaos Kazantzis, Luciano L'Abate, 2006-12-11 The aim of this Handbook of Homework Assignments in Psychotherapy Research Practice and Prevention is to provide comprehensive resource on the role of homework assignments in psychotherapy and prevention. However, the process of generalizing in-session therapeutic work through between-session activity has a long history in psychotherapy. This Handbook is designed to elucidate and extend that history by presenting theoretical and clinically focused descriptions of the role of homework assignments in a range of psychotherapies, clinical populations, and presenting problems. Designed for both the beginning and the experienced psychotherapy practitioner, this Handbook assumes a basic knowledge of psychopathology and practice of psychotherapy and prevention. The Handbook aims to contribute to the professional resources for all psychotherapy practitioners and researchers in private and public practice, graduate students in clinical and counseling psychology, couples and family therapists, as well as residents in psychiatry. This book does not aim to review the theories of psychotherapy in detail, specific treatments of psychopathology, clinical assessment, or basic psychotherapy and prevention processes that are currently available in numerous psychotherapy textbooks. This Handbook is a clinical resource designed to provide a focused coverage of how to integrate homework assignments into psychotherapy practice and in the prevention of mental illness. Outline for the Handbook This Handbook comprises four distinct parts.

Using Homework Assignments in Cognitive Behavior Therapy Nikolaos Kazantzis, Frank P. Deane, Kevin R. Ronan, Luciano L'Abate, 2005-12-05 Homework is a central feature of Cognitive Behavioral Therapy (CBT) given its educational emphasis. This new text is a comprehensive guide for administering assignments. The first part of the text offers essential introductory material: a comprehensive review of the theoretical and empirical support for the use of homework models for practice and systems for evaluating client compliance and therapist competence in administering assignments. Part two focuses on the role of homework in cognitive therapy, demonstrating successful methods of integration and discussing solutions to common barriers. Rather than offering one size fits all pre-designed tasks, this book illustrates application of a model with detailed case study and recommendations for adjusting administration methods for particular problems and specific client populations. Over the last nine chapters, homework administration is described within cognitive and behavioral therapy for anxiety and depression, chronic pain, delusions and hallucinations, obsessions and compulsions, marital and sexual problems, personality disorders, children and adolescents, group and family therapy, and older adults. Readers are provided with a full range of knowledge to successfully incorporate individualized homework assignments into their practice to maximize the proven long-term benefits of CBT.
