

Module 2: Making Sense of the Universe and Expansion Lecture Tutorial

In this discussion, you will work through a series of 7 questions designed to demonstrate how the universe expands. You will then respond to your classmates' discussion posts. Your discussion will be based on the following image. The two drawings in the image represent the same group of galaxies at two different points in time during the history of the universe.

You are strongly encouraged to work with a partner or two over chat or Skype on this activity, but each individual student must follow all instructions below (i.e., each student must make their own posts). Be sure you are familiar with the information on the page [Introduction to Lecture Tutorial Discussions](#) before beginning this assignment.

This discussion will be in two parts:

A. Please compose a post addressing each of the following:

- 1) Describe how the universe changed in going from the Early Universe to the Universe Some Time Later. Include a description of what happens to the sizes of the galaxies (if anything).
- 2) Compare the amount that the distance between the D and C galaxies changed in comparison to the amount that the distance between the D and E galaxies changed. Which galaxy, C or E, appears to have moved farther from D? Which galaxy, C or E, has been moving away from D faster?
- 3) Imagine that you are in Galaxy D. Rank the A, B, C, and E galaxies in terms of their relative speeds away from you, from fastest to slowest.
- 4) Now imagine that you are in the E galaxy. Rank the A, B, C, and D galaxies in terms of their relative speeds away from you, from greatest to smallest.
- 5) Is there a relationship between an object's distance away from you in the universe and the speed it would appear to be moving away from you? If so, describe this relationship.
- 6) Would your answer to Question 5 be true in general for all locations in the universe?
- 7) Consider the following statement: "Since all galaxies we observe are moving away from us, we must be at the center of the universe." Do you agree or disagree? Explain your reasoning.
