The Border Martin Schain,2019 In our globalized world borders are back with a vengeance New data shows a massive increase of walls and barriers between countries after 2001 However at the same time the flow of people and the growth of trade have continued at impressive rates and arguments for more open borders remain relevant In The Border Martin Schain compares how and why border policy has become increasingly important politicized and divisive in both Europe and the United States Drawing from an intensive analysis of documents and interviews he argues that border control is a growing international movement In Europe the European Union is under scrutiny and many countries seek to block the entry of asylum seekers from wars in the Near East In the US Donald Trump pledged to build a wall along the Mexico border restricted the entry of Syrian asylum seekers and more generally tried to ban Muslim immigration Moreover on both sides of the Atlantic trade barriers appear in the political agendas of major parties Schain delves into these interlinked phenomena showing that migration identity and trade have been packaged and transformed into hotly contested issues of border governance and control

Governing Borders and Security Catarina Kinnvall, Ted Svensson, 2014-09-19 This book explores and maps the relationship between borders security and global governance Theoretically the book seeks to establish to what degree and in what ways traditional notions of borders security and global governance are being eroded undermined and contested

in the context of a globalising world Borders are increasingly being re conceptualised to account for connectivity as well as divisions at the same time as focus is shifting from permanence to permeability The ambivalence ascribed to bordering processes is at heart a security concern borders are not only entwined with state formation but are also attempts at governing securities identities and histories Proceeding from a critical rendering of statist conceptualisations of borders security and governance the book not only emphasises the politics of borders mobility and re locations but also provides a shared groundwork for interrogating the spatial conditions for bordering and border work as manifestations of a continuously deferred becoming rather than being A principal contribution of the volume is its scrutiny of how borders are enacted and perceived in and through the everyday and of how such production and construal can make sense as acts of resistance to various forms of governing Such a focus reveals the necessity of investigating how governing from afar affects the possibilities and tendencies to securitise as well as desecuritise within as well as beyond elite settings This book will be of much interest to students of border studies human geography governmentality global governance and IR critical security studies
