## **Managing Disaster Risk In Emerging Economies** Disaster Risk Management:

**Managing Disaster Risk in Emerging Economies** Alcira Kreimer,Margaret Arnold,2000-01-01 In 1999 natural catastrophes and man made disasters claimed more than 105 000 lives 95 percent of them in the developing world and caused economic losses of around US 100 billion In 1998 the twin disasters of the Yangtze and Hurricane Mitch accounted for two thirds of the US 65 billion loss The geographical areas affected may vary but one constant is that the per capita burden of catastrophic losses is dramatically higher in developing countries To respond to an increased demand to assist disaster recovery programmes the World Bank set up the Disaster Management Facility in 1998 to help provide the Bank with a more rapid and strategic response to disaster emergencies The DMF focuses on risk identification risk reduction and risk sharing transfer the three major topics in this volume The DMF also promotes strategic alliances with key private government multilateral and nongovernmental organisations to ensure the inclusion of disaster risk reduction as a central value of development The most important of these partnerships is the ProVention Consortium launched in February 2000 based on the premise that we must all take responsibility for making the new millennium a safer one

## **Managing Disaster Risks**

**to Cultural Heritage** Bijan Rouhani,Xavier Romão,2023-11-15 Managing Disaster Risks to Cultural Heritage presents case studies from different regions in the world and establishes a framework for understanding identifying and analysing disaster risks to immovable cultural heritage Featuring contributions from academics and practitioners from around the globe the book presents a comprehensive view of the scholarship relating to cultural heritage disaster risk preparedness and post disaster recovery Particular attention is given to the complex and dynamic nature of disaster risks and how they evolve during different phases of a catastrophic event especially as hazards can create secondary effects that have greater impacts on cultural heritage infrastructure and economy Arguing that risk preparedness and mitigation have historically been secondary to reactive emergency and first aid response the book demonstrates that preparedness plans based on sound risk assessments can prevent hazards from becoming disasters Emphasising that the protection of cultural heritage through preparedness mitigation actions and risk adaptation measures especially for climate change can contribute to the resilience of societies the book highlights the vital role of communities in such activities Managing Disaster Risks to Cultural Heritage will be useful to students professionals and scholars studying and working with cultural heritage protection It will be of particular interest to those working in the fields of Cultural Heritage Archaeology Conservation and Preservation Sustainable Development and Disaster Studies

## **Coping with Disaster Risk Management in Northeast Asia** Gregory

Coutaz,2018-10-31 This book analyzes the diversity of national disaster risk governance across Northeast Asia by comparing the national disaster management plans implemented by the governments of China Taiwan Japan and South Korea It also provides an overview of the financial protection measures employed by these jurisdictions to insure against losses

*Mapping Vulnerability* Greg Bankoff,Georg Frerks,Dorothea Hilhorst,2013-06-17 Raging floods massive storms and

cataclysmic earthquakes every year up to 340 million people are affected by these and other disasters which cause loss of life and damage to personal property agriculture and infrastructure So what can be done The key to understanding the causes of disasters and mitigating their impacts is the concept of vulnerability Mapping Vulnerability analyses vulnerability as a concept central to the way we understand disasters and their magnitude and impact Written and edited by a distinguished group of disaster scholars and practitioners this book is a counterbalance to those technocratic approaches that limit themselves to simply looking at disasters as natural phenomena Through the notion of vulnerability the authors stress the importance of social processes and human environmental interactions as causal agents in the making of disasters They critically examine what renders communities unsafe a condition they argue that depends primarily on the relative position of advantage or disadvantage that a particular group occupies within a society s social order The book also looks at vulnerability in terms of its relationship to development and its impact on policy and people s lives through consideration of selected case studies drawn from Africa Asia and Latin America Mapping Vulnerability is essential reading for academics students policymakers and practitioners in disaster studies geography development studies economics environmental studies and sociology

Disaster Management and Rehabilitation Rajdeep Dasgupta,2007-12-01

New Frontiers of Policy Evaluation in Regional Science Yoshiro

Higano,Lily Kiminami,Kenichi Ishibashi,2022-06-02 This book is especially valuable for its policy evaluation studies using both a theoretical model for policies carried out at national and regional levels and for gathering policy evaluation studies in diverse disciplines by empirical study Policy analysis shown here employs theoretical models such as an international trade model an optimal tariff and spatial reorganization At the same time factors in well being are taken into consideration with land development changes in migration and local economies by natural disasters validation of efficiency for emission control methods the relationship between cyberspace and physical space in urban networks and NPOs investment activities The empirical research reported in this volume analyzes Japan China and Asian Pacific cities In the case of Japan studies focus on the finances of local governments the real estate industry the role of consumer cooperatives in a food system and agriculture and its productivity in hilly and mountainous areas As well the effects of industrial clusters in megacities and investment in high speed railways and prediction of human behavior during an earthquake are studied In China s case studies focus on food policy and the effect of ecology and environment on migration policy For Asia Pacific cities studies show performance rankings of super cities in the region The book defines the frontier of policy evaluation following a middle path between

theoretical study and empirical study with regard to evaluation In addition the book contributes to an understanding of the relationship between the goals and targets of sustainable development This book is highly recommended for graduate students policymakers and researchers concerned with policy evaluation *Natural Disaster Hotspots* Maxx Dilley,2005 This synthesis summarizes the findings of the Global Natural Disaster Risk Hotspots project The Hotspots project generated a global disaster risk assessment and a set of more localized or hazard specific case studies The synthesis draws primarily from the results of the global assessment Full details on the data methods and results of the global analysis can be found in volume one of *Natural Disaster Hotspots A Global Risk Analysis* The case studies are contained in volume two forthcoming

*Managing Catastrophic Disaster Risks Using Alternative Risk Financing and Pooled Insurance Structures* John D. Pollner,2001-01-01 This report examines the existing constraints and opportunities to implement a catastrophe insurance system which can resolve the key obstacles currently impeding broader implementation of a risk funding approach The four main pillars in such a strategy involve strengthening the insurance sector regulatory requirements and supervision establishment of broad based pooled catastrophe funding structures with efficient risk transfer tools promoting public insurance policies linked to programs for loss reduction in the uninsured sectors and strengthening the risk assessment and enforcement of structural measures such as zoning and building code compliance **OECD Green Growth Studies**

**Putting Green Growth at the Heart of Development** OECD,2013-06-05 This book presents evidence that green growth is the only way to sustain growth and development over the long term **Measuring Vulnerability to Natural Hazards** Birkmann,2007-01-01 Measuring Vulnerability to Natural Hazards presents a broad range of current approaches to measuring vulnerability It provides a comprehensive overview of different concepts at the global regional national and local levels and explores various schools of thought More than 40 distinguished academics and practitioners analyse quantitative and qualitative approaches and examine their strengths and limitations This book contains concrete experiences and examples from Africa Asia the Americas and Europe to illustrate the theoretical analyses The authors provide answers to some of the key questions on how to measure vulnerability and they draw attention to issues with insufficient coverage such as the environmental and institutional dimensions of vulnerability and methods to combine different methodologies This book is a unique compilation of state of the art vulnerability assessment and is essential reading for academics students policy makers practitioners and anybody else interested in understanding the fundamentals of measuring vulnerability It is a critical review that provides important conclusions which can serve as an orientation for future research towards more disaster resilient communities *Climate Change, Disaster Risk, and the Urban Poor* Judy L. Baker,2012-04-01 The urban poor living in slums are at particularly high risk from the impacts of climate change and natural hazards This study analyzes key issues affecting their vulnerability with evidence from a number of cities in the developing world **Cultural Landscapes of South Asia** Kapila Silva,Amita Sinha,2016-10-14 Winner of the Environmental Design Research Association s 2018

Achievement Award The pluralism of South Asia belies any singular reading of its heritage In spite of this diversity its cultural traditions retain certain attributes that are at their core South Asian in their capacity to self organize enact and reinvent cultural memories and in their ability to retain an intimate connection with nature and landscape This volume focuses on the notion of cultural landscape as a medium integrating multiple forms of heritage and points to a new paradigm for conservation practices in the South Asian context Even though the construct of cultural landscape has been accepted as a category of heritage its potent use in heritage management in general and within the South Asian context in particular has not been widely studied The volume challenges the prevalent views of heritage management in South Asia that are entrenched in colonial legacies and contemporary global policy frameworks

### **Natural Hazards, UnNatural Disasters**

World Bank,United Nations,2010-11-10 This book examines how to ensure that the preventive measures are worthwhile and effective and how people can make decisions individually and collectively at different levels of government *Natural Disaster Hotspots Case Studies* Margaret Arnold,2006-01-01 These case studies complement the earlier groundbreaking work of Natural Disaster Hotspots A Global Risk Analysis published in April 2005 Three case studies address specific hazards landslides storm surges and drought An additional three case studies address regional multi hazard situations in Sri Lanka the Tana River basin in Kenya and the city of Caracas Venezuela

### **Understanding the economic and financial impacts of natural disasters** Charlotte Benson,Edward J. Clay,2004

### **Managing the Risks of Extreme Events and Disasters**

**to Advance Climate Change Adaptation** Intergovernmental Panel on Climate Change,2012-05-28 Extreme weather and climate events interacting with exposed and vulnerable human and natural systems can lead to disasters This Special Report explores the social as well as physical dimensions of weather and climate related disasters considering opportunities for managing risks at local to international scales SREX was approved and accepted by the Intergovernmental Panel on Climate Change IPCC on 18 November 2011 in Kampala Uganda

**Climate Change Impacts** Vijay P Singh,Shalini Yadav,Ram Narayan Yadava,2017-11-15 This book comprises the select proceedings of the International Conference on Water Environment Energy and Society The book is divided into four parts Part I deals with some aspects of climatic characteristics ranging from changes in temperature and sunshine hours to downscaling to global climate patterns and effects of El Ni o Southern Oscillation ENSO and Indian Ocean Dipole IOD on extreme rainfall Part II covers rainfall analysis including changes in regional rainfall series analysis of non stationarity summer monsoon and rainfall scenarios Impacts of climate change are treated in Part III Change point analysis greenhouse gas emissions rainfall variability water resources variability and water resources sustainability are discussed in this part The concluding Part IV is on low flow and drought It deals with the Standardized Precipitation Index SPI concept and assessment of drought This book is of interest to researchers and practitioners in the field of water resources hydrology environmental resources agricultural engineering watershed management and earth sciences as well as those engaged in natural resources planning and management Graduate students

and those wishing to conduct further research in water and environment and their development and management find the book to be of value *Macroeconomic Risk Management Against Natural Disasters* Stefan Hochrainer, 2007-12-14 Looking back in history we conceive the twentieth century as the century of wars Most likely we will conceive the twenty first century as the century of natural catastrophes Wars can be avoided unfortunately it did not happen often in history in contrast most natural disasters are outside human influence However the consequences of disasters can be alleviated by means of risk management For an effective risk management information is needed about i the size of the risk measured by the frequency and intensity of the hazard and ii the degree of vulnerability of the economy and society Stefan Hochrainer's thesis deals with measuring and modeling of both While the physical risk modeling is a well developed area within statistical modeling frequency analysis point processes extreme value theory etc estimating the economic consequences is a more challenging task The author studies economic effects of catastrophes by statistical analysis of macroeconomic data One interesting finding is that disasters can decrease the absolute level of economic performance such as the GDP while keeping growth levels nearly the same at least after some years as in the pre disaster years The boom of new products in the financial markets especially of new derivative instruments has led to new risk hedging instruments such as catastrophe bonds CAT bonds transfer the risk to the market of investors **MEDICAL MANAGEMENT OF DISASTERS** Fourth edition revised Work registered in the Catalog of National Library of United States , **International Case Studies in the Management of Disasters** Babu George, Qamar-ud-Din Maher, 2020-11-30 Showcasing internationally sourced case studies on disaster management International Case Studies in the Management of Disasters presents a diverse range of case studies on how disasters both natural and manmade are being managed globally
