Encyclopedia of Crisis Management K. Bradley Penuel,Matt Statler,Ryan Hagen,2013-02-14 Although now a growing and respectable research field crisis management as a formal area of study is relatively young having emerged since the 1980s following a succession of such calamities as the Bhopal gas leak Chernobyl nuclear accident Space Shuttle Challenger loss and Exxon Valdez oil spill Analysis of organizational failures that caused such events helped drive the emerging field of crisis management Simultaneously the world has experienced a number of devastating natural disasters Hurricane Katrina the Japanese earthquake and tsunami etc From such crises both human induced and natural we have learned our modern tightly interconnected and interdependent society is simply more vulnerable to disruption than in the past This interconnectedness is made possible in part by crisis management and increases our reliance upon it As such crisis management is as beneficial and crucial today as information technology has become over the last few decades Crisis is varied and unavoidable While the examples highlighted above were extreme we see crisis every day within organizations governments businesses and the economy A true crisis differs from a routine emergency such as a water pipe bursting in the kitchen Per one definition it is associated with urgent high stakes challenges in which the outcomes can vary widely and are very negative at one end of the spectrum and will depend on the actions taken by those involved Successfully engaging dealing with and working through a crisis requires an understanding of options and tools for individual and joint decision making Our Encyclopedia of Crisis Management comprehensively overviews concepts and techniques for effectively assessing analyzing managing and resolving crises whether they be organizational business community or political From general theories and concepts exploring the meaning and causes of crisis to practical strategies and techniques relevant to crises of specific types crisis management is thoroughly explored Features the electronic version of this allows students to explore customized response plans for crises of various sorts Appendices also include a Resource Guide to classic books journals and internet resources in the field a Glossary and a vetted list of crisis management related degree programs crisis management conferences etc

Disaster Risks and Hazards Rosemary Kasimba,Innocent Chirisa,2025-07-18 This book discusses disaster risks and hazards as well as measures to increase people s resilience The

21st Century has experienced a number of disasters that resulted in hampering socio economic development the loss of lives and property hence they are a threat to sustainable development Disaster risk management efforts and practices have failed to arrest the underlying drivers of increased global risk No country is immune to disaster risk thus resilience has become a critical component of disaster management It provides an opportunity to confront the social ecological foundations of disasters However it has been vaguely conceptualised and lacks a concrete approach to operationalization Some developing countries are gradually coming to realise that preparedness hazard mapping prediction risk and vulnerability assessment and planning are critical for increasing resilience and reducing losses following disasters A paradigm shift is required from reactionary to proactive measures in disaster management as the later focuses more on increasing the resilience of the community Zimbabwe s disaster management policy of 1979 is in the process of review following Cyclone Idai in March 2019 and the Corona Virus 19 COVID 19 Furthermore the consequences of climate change disaster are being felt with across the world particularly developing countries whose preparatory measures for such disasters are inadequate Disasters have become inevitable and no country is every country is vulnerable to them In the event of these disasters the vulnerable people are at risk and are affected more as majority of them are not able to cope In developed countries measures are in place to assist the vulnerable in the event that a disaster strikes However Zimbabwe being a developing country is not able to deal with unpredictable disasters due to lack of resources hence the need for it to adopt mitigatory and transformative measures to reduce the impact of any form of disasters
