Making Things and Drawing Boundaries Jentery Sayers, 2018-01-15 In Making Things and Drawing Boundaries critical theory and cultural practice meet creativity collaboration and experimentation with physical materials as never before Foregrounding the interdisciplinary character of experimental methods and hands on research this collection asks what it means to make things in the humanities How is humanities research manifested in hand and on screen alongside the essay and monograph And importantly how does

experimentation with physical materials correspond with social justice and responsibility. Comprising almost forty chapters from ninety practitioners across twenty disciplines, *Making Things and Drawing Boundaries* speaks directly and extensively to how humanities research engages a growing interest in maker culture, however making may be defined. Making Things Smart Gordon F. Williams, 2017-07-06. *Making Things Smart* teaches the fundamentals of the powerful ARM microcontroller by walking beginners and experienced users alike through easily assembled projects comprised of inexpensive hardware store parts. Current ARM programming books take a bland textbook approach focused on complex beginner-unfriendly languages like C or ARM Assembler. *Making Things Smart* uses Espruino JavaScript for Hardware, flattening the learning curve.

Making Things and Teaching the Creative Arts in the Post-Digital Era Ellen Marie Saethre-McGuirk, 2022-06-28. This interdisciplinary book critically studies the processes of making art and creative arts education in the post-digital era. Drawing from fields such as Philosophy and Pedagogy, it demarcates a meaningful understanding of what it is to make art and things and to teach artmaking in this contemporary landscape. The book develops and articulates a phenomenology of aesthetic practices within the post-digital era and covers themes such as the aesthetic practices of making and the experience of an aesthetic act through a digital interface. Chapters also suggest new didactic approaches to understanding and creating form as an integral part of creative arts education in the post-digital era and analyses creative arts pedagogy research in this light. The experience of materials and space, both real and virtual, are presented for theoretical reflection throughout the book. This book will be of interest to scholars working in aesthetics, art design, public art, public space, art education, digital culture, and human-computer interaction studies.

Making Things Better A. David Napier, 2013-12-09. In *Making Things Better*, A. David Napier demonstrates how anthropological description of non-Western exchange practices and beliefs can be a tonic for contemporary economic systems in which our impersonal relationship to things transforms the animate elements of social life into inanimate sets of commodities. Such a fundamental transformation, Napier suggests, makes us automatons in globally integrated social circuits that generate a cast of winners and losers engaged in hostile competition for wealth and power. Our impersonal relations to things and to people as well are so ingrained in our being we take them for granted as we sleepwalk through routine life. Like the surrealist artists of the

1920s who through their art poetry films and photography fought a valiant battle against mind numbing conformity Napier provides exercises and practica designed to shock the reader from their wakeful sleep These demonstrate powerfully the positively integrative social effects of more socially entangled non Western orientations to things and to people His arguments also have implications for the rights and legal status of indigenous peoples which are drawn out in the course of the book
