Life Cycle Analysis and Assessment in Civil Engineering: Towards an Integrated Vision Robby Caspee, Luc Taerwe, Dan Frangopol, 2018-10-31 This volume contains the papers presented at IALCCE2018 the Sixth International Symposium on Life Cycle Civil Engineering IALCCE2018 held in Ghent Belgium October 28 31 2018 It consists of a book of extended abstracts and a USB device with full papers including the Fazlur R Khan lecture 8 keynote lectures and 390 technical papers from all over the world Contributions relate to design inspection assessment maintenance or optimization in the framework of life cycle analysis of civil engineering structures and infrastructure systems Life cycle aspects that are developed and discussed range from structural safety and durability to sustainability serviceability robustness and resilience Applications relate to

buildings bridges and viaducts highways and runways tunnels and underground structures off shore and marine structures dams and hydraulic structures prefabricated design infrastructure systems etc During the IALCCE2018 conference a particular focus is put on the cross fertilization between different sub areas of expertise and the development of an overall vision for life cycle analysis in civil engineering The aim of the editors is to provide a valuable source of cutting edge information for anyone interested in life cycle analysis and assessment in civil engineering including researchers practising engineers consultants contractors decision makers and representatives from local authorities

Successful Construction Supply Chain Management Stephen Pryke, 2020-02-25 Provides a unique overview of supply chain management SCM concepts illustrating how the methodology can help enhance construction industry project success This book provides a unique appraisal of supply chain management SCM concepts brought together with lessons from industry and analysis gathered from extensive research on how supply chains are managed in the construction industry The research from leading international academics has been drawn together with the experience from some of the industry's foremost SCM practitioners to provide both the experienced researcher and the industry practitioner a thorough grounding in its principles as well as an illustration of SCM as a methodology for enhancing construction industry project success The new edition of Successful Construction Supply Chain Management Concepts and Case Studies incorporate chapters dealing with Building Information Modelling sustainability the Demand Chain in projects the link between self organizing networks and supply chains decision making Lean and mega projects Other chapters cover risk transfer and allocation behaviors innovation trust supply chain design alliances and knowledge transfer Supply Chain Management techniques have been used successfully in various industries such as manufacturing and food processing for decades Fully updated with new chapters dealing with key construction industry topics such as BIM sustainability the Demand Chain in projects Lean mega projects and more Includes contributions from well established academics and practitioners from Network Rail mainstream construction and consultancy Illustrates how SCM methodologies can be used to enhance construction industry project success Successful Construction Supply Chain Management Concepts and Case Studies is an ideal book for postgraduate students at MSc and PhD level studying the topic and for all construction management practitioners

Construction Innovation and Process Improvement Akintola Akintoye, Jack Goulding, Girma Zawdie, 2012-04-30 Innovation in construction is essential for growth The industry strives to remain competitive using a variety of approaches and needs to engage structured initiatives linked to proven innovation concepts techniques and applications Even in mature markets like the Architecture Engineering and Construction AEC sector where business behaviour is generally considered as being risk averse it is increasingly important to embed innovation into mainstream business practices In Construction Innovation and Process Improvement a number of wide ranging issues from construction practice in different countries with different contexts are presented to provide a rich collection of literature embracing theory and practice Chapters are divided into three broad themes of construction

innovation relating to Theory and Practice Process Drivers and Future Technologies Several questions are posed including for example What is particularly unique about construction innovation in theory and practice What are the major drivers of construction innovation What factors are needed to support and deliver future construction technologies In attempting to respond to such questions the book sheds new light on these challenges and provides readers with a number of ways forward especially cognisant of the increased role of globalisation the enhanced impact of knowledge and importance of innovation All these can have a significant impact on strategic decision making competitive advantage and sustainable policies and practices Part One deals with change management technology sustainable construction and supply chain management Part Two addresses innovation and process improvement drivers including strategic management concurrent engineering risk management innovative procurement knowledge management Part Three explores future technologies in construction and particularly how these can be harnessed and leveraged to help procure innovation and process improvement

Construction Innovation Finn Orstavik, Andrew R. J. Dainty, Carl Abbott, 2015-04-20 Construction innovation is an important but contested concept both in industry practice and academic reflection and research A fundamental reason for this is the nature of the construction industry itself the industry and the value creation activities taking place there are multi disciplinary heterogeneous distributed and often fragmented This book takes a new approach to construction innovation revealing different perspectives set in a broader context It coalesces multiple theoretical and practice based views in order to stimulate reflection and to prepare the ground for further synthesis By being clear cogent and unambiguous on the most basic definitions it can mobilise a plurality of perspectives on innovation to promote fresh thinking on how it can be studied enabled measured and propagated across the industry This book does not gloss over the real life complexity of construction innovation Instead its authors look explicitly at the challenges that conceptual issues entail and by making their own position clear they open up fresh intellectual space for reflection Construction Innovation examines innovation from different positions and through different conceptual lenses to reveal the richness that the theoretical perspectives offer to our understanding of the way that the construction sector actors innovate at both project and organizational levels The editors have brought together here leading scholars to deconstruct the concept of innovation and to discuss the merits of different perspectives their commonalities and their diversity The result is an invaluable sourcebook for those studying and leading innovation in the design the building and the maintenance of our built environment

Building Urban Resilience through Change of Use Sara J. Wilkinson, Hilde Remøy, 2018-04-30 Describes all aspects of sustainable conversion adaptation of existing buildings and provides solutions for making urban settlements resilient to climate change This comprehensive book explores the potential to change the character of cities with residential conversion of office space in order to withstand the negative effects of climate change It investigates the nature and extent of sustainable conversion in a number of global cities as well as the political economic social technological environmental and legal drivers and barriers to

successful conversion The book also identifies the key lessons learned through international comparisons with cases in the UK US Australia and the Netherlands Building Urban Resilience Through Change of Use covers the benefits and aspects of sustainable conversion adaptation through the whole lifecycle from inception planning and design to procurement construction and management and operational issues It illustrates and quantifies through empirical research the changes that have been achieved or delivered in sustainable conversion adaptation The book gives an overview of all aspects of performance characteristics and the conversion adaptation of existing buildings In the end it enables planners to make more informed decisions about whether conversion adaptation is a good choice and if so which types of sustainability measures are best suited for projects Provides detailed empirical knowledge based on real world research undertaken in five countries over three continents on both a citywide scale and on individual buildings Case studies and exemplars demonstrate the application of the knowledge in North and South America Canada Australia New Zealand and in Europe Addresses the key themes of technology finance and procurement and the regulatory framework The first research based book to examine how to improve resilience to climate change through sustainable reuse of buildings Building Urban Resilience Through Change of Use is a welcome book for researchers and academics involved in building surveying urban development and sustainability planning

Solutions for Climate Change Challenges in the Built Environment Colin A. Booth,Felix N. Hammond,Jessica Lamond,David G. Proverbs,2012-03-12 The multi disciplinary perspective provided here offers a strategic view on built environment issues and improve understanding of how built environment activities potentially induce global warming and climate change It also highlights solutions to these challenges Solutions to Climate change Challenges in the Built Environment helps develop an appreciation of the diverse themes of the climate change debate across the built environment continuum A wide perspective is provided through contributions from physical environmental social economic and political scientists This strategic view on built environment issues will be useful to researchers as well as policy experts and construction practitioners wanting a holistic view This book clarifies complex issues around climate change and follows five main themes climate change experiences urban landscape development urban management issues measurement of impact and the future Chapters are written by eminent specialists from both academic and professional backgrounds The main context for chapters is the developed world but the discussion is widened to incorporate regional issues The book will be valuable to researchers and students in all the built environment disciplines as well as to practitioners involved with the design construction and maintenance of buildings and government organisations developing and implementing climate change policy New Management Approaches in Construction (Penerbit USM) Mastura Jaafar,Abdul Rashid Abdul Aziz,2014-11-25 In this new era changes and innovations that happen in the construction industry force the industry players to increasingly seek knowledge to enhance their firm and project competitiveness Small as well as large industry players has no exceptions from identifying their strategy for business survival and success To accommodate those needs this book

presents the new management approaches that could be learned and applied in managing firms and projects The book goes on to explore the strategic management and project management approaches of business and project entities in construction Knowledge and ideas discussed in this book were contributed by scholars who are closely involved with research in the industry Having read their ideas improving performance would be a significant contribution of this book to the existing and future industry players in construction Being simultaneously dependent upon each other this book sees the need to incorporate the various approaches in managing projects and businesses in the construction industry There will be no doubt by understanding and practising the approaches the competitiveness of the industry will be improved

Advances in Informatics and Computing in Civil and Construction Engineering Ivan Mutis,Timo Hartmann,2018-10-08 This proceedings volume chronicles the papers presented at the 35th CIB W78 2018 Conference IT in Design Construction and Management held in Chicago IL USA in October 2018 The theme of the conference focused on fostering encouraging and promoting research and development in the application of integrated information technology IT throughout the life cycle of the design construction and occupancy of buildings and related facilities The CIB International Council for Research and Innovation in Building Construction was established in 1953 as an association whose objectives were to stimulate and facilitate international cooperation and information exchange between governmental research institutes in the building and construction sector with an emphasis on those institutes engaged in technical fields of research The conference brought together more than 200 scholars from 40 countries who presented the innovative concepts and methods featured in this collection of papers

eWork and eBusiness in Architecture, Engineering and Construction. ECPPM 2006 Manuel Martinez,Raimar Scherer,2020-11-25 The task of structuring information on built environment has presented challenges to the research community software developers and the industry for the last 20 years Recent work has taken advantage of Web and industry standards such as XML OWL IFC and STEP Another important technology for the fragmented AEC industry is digital communication Wired or wireless it brings together architects engineers and construction site workers enabling them to exchange information communicate and work together Virtual enterprise organization structures involving mobile teams over distance are highly compatible with the needs of the construction industry

New Approaches in Contemporary Architecture and Urbanism Edited by Dr. Hourakhsh Ahmad Nia,2020-07-01 This book is an intellectual discourse and a concise compendium of current research in architecture and urbanism Primarily it is a book of readings of 16 chapters The book brings together theories manifestos and methodologies on contemporary architecture and urbanism to raise the understanding for the future architecture and urban planning Overall the book aimed to establish a bridge between theory and practice in built environment Thus it reports on the latest research findings and innovative approaches methodologies for creating assessing and understanding of contemporary built environment

Building A Body Of Knowledge In Construction Project Delivery, Procurement And Contracting Giovanni C Migliaccio,Pramen P Shrestha,2022-12-16

This book aims to consolidate structure and articulate collective knowledge on construction project delivery procurement and contracting so that it can serve as a gateway to the contiguous topics of construction project delivery In addition to supporting the education of student researchers as well as broadening and deepening the knowledge of practitioners the book is also intended to serve as a foundation for future education and as a reference book Academicians can use it to benchmark and support their research and also as a textbook for an undergraduate or graduate course on the topics of project delivery procurement and contracting Project Risk Management Kurt J. Engemann,Rory V. O'Connor,2021-03-08 Managing risk is essential for every organization However significant opportunities may be lost by concentrating on the negative aspects of risk without bearing in mind the positive attributes The objective of Project Risk Management Managing Software Development Risk is to provide a distinct approach to a broad range of risks and rewards associated with the design development implementation and deployment of software systems The traditional perspective of software development risk is to view risk as a negative characteristic associated with the impact of potential threats The perspective of this book is to explore a more discerning view of software development risks including the positive aspects of risk associated with potential beneficial opportunities A balanced approach requires that software project managers approach negative risks with a view to reduce the likelihood and impact on a software project and approach positive risks with a view to increase the likelihood of exploiting opportunities Project Risk Management Managing Software Development Risk explores software development risk both from a technological and business perspective Issues regarding strategies for software development are discussed and topics including risks related to technical performance outsourcing cybersecurity scheduling quality costs opportunities and competition are presented Bringing together concepts across the broad spectrum of software engineering with a project management perspective this volume represents both a professional and scholarly perspective on the topic **Civil and Environmental Engineering: Concepts, Methodologies, Tools, and Applications** Management Association, Information Resources,2016-01-31 Civil and environmental engineers work together to develop build and maintain the man made and natural environments that make up the infrastructures and ecosystems in which we live and thrive Civil and Environmental Engineering Concepts Methodologies Tools and Applications is a comprehensive multi volume publication showcasing the best research on topics pertaining to road design building maintenance and construction transportation earthquake engineering waste and pollution management and water resources management and engineering Through its broad and extensive coverage on a variety of crucial concepts in the field of civil engineering and its subfield of environmental engineering this multi volume work is an essential addition to the library collections of academic and government institutions and appropriately meets the research needs of engineers environmental specialists researchers and graduate level students *Managing Social and Economic Change with Information Technology* Information Resources Management Association.
