Green Genius Guide Richa Sharma,2008-01-01 Did you know that not all webs are spiders homes and not all pyramids contain mummies Did you know that all the living beings in the world are linked to one another Find out how nature s elements exist in balance and what happens when this balance is lost Learn about ecosystems biomes ecotones and much much more Green Genius Guide Tripti Nainwal,2008-01-01 We cannot see them with our naked eyes but they are

everywhere They move like us breathe like us and eat like us In fact these tiny creatures were the first living beings to appear on the earth and they can survive extreme conditions Get introduced to the fascinating hidden world of microbes

Ecotones Between Forest and Grassland Randall W. Myster,2014-08-08 Ecotones are dynamic overlapping boundary areas where major terrestrial biomes meet As past studies have shown and as the chapters in this book will illustrate their structure size and scope have changed considerably over the millennia expanding and shrinking as climate and or other driving conditions also changed Today however many of them are changing at a rate not seen for a long time perhaps largely due to climate change and other human induced factors Indeed ecotones are more sensitive to climate change than the biomes on either side and thus may serve as critical early indicators of future climate change As ecotones change they also redefine the limits of the biomes on either side by altering their distributions of species because in addition to their own endemic species any ecotone will also have species from both adjoining biomes Consequently they may also be places of high levels of species interaction serving as active evolutionary laboratories which generate new species that then migrate back into adjacent biomes *Ecotones Between Forest and Grassland* explores how these ecotones have changed in the past how they are changing today and how they are likely to change in the future The book includes chapters from around the world with a special focus on South American and Neotropical ecotones Biomes and Ecosystems Robert Warren
