**Ecocriticism in Taiwan** Chia-ju Chang, Scott Slovic, 2016-06-01

Ecocriticism is a mode of interdisciplinary critical inquiry into the relationship between cultural production society and the environment The field advocates for the more than human realm as well as for underprivileged human and non human groups and their perspectives Taiwan is one of the earliest centers for promoting ecocriticism outside the West and has continued to play a central role in shaping ecocriticism in East Asia This is the first English anthology dedicated to the vibrant development of ecocriticism in Taiwan It provides a window to Taiwan s important contributions to international ecocriticism especially an emerging vernacular trend in the field emphasizing the significance of local perspectives and styles including non western vocabularies aesthetics cosmologies and political ideologies Taiwan s unique history geographic location geology and subtropical climate generate locale specific vernacular thinking about island ecology and environmental history as well as global environmental issues such as climate change dioxin pollution species extinction energy decisions pollution and environmental injustice In hindsight Taiwan s industrial modernization no longer appears as a success narrative among Asia s Four Little Dragons but as a cautionary tale revealing the brute force entrepreneurial exploitation of the land and the people In this light this volume can be seen as a critical response to Taiwan s postcolonial capitalist industrial modernity as manifested in the scholars readings of Taiwan s mountain and river ocean animal and aboriginal non fictional narratives environmental documentaries and art installations This volume is endowed with a mixture of ecocosmopolitan and indigenous sensitivities Though dominated by the Han Chinese ethnic group and its Confucian ideology Taiwan is a place of complicated ethnic identities and affiliations The succession of changing colonial and political regimes made even more complex by the island s sixteen aboriginal groups and several diasporic subcultures South Asian immigrants Western expatriates and diverse immigrants from the Chinese mainland has led to an ongoing quest for political and cultural identity This complexity urges Taiwan based ecoscholars to pay attention to the diasporic comparative and intercultural dimensions of local specificity either based on their own diasporic experience or the cosmopolitan features of the Taiwanese texts they scrutinize This cosmopolitan vernacular dynamic is a key contribution Taiwan has to offer current ecocritical scholarship

**Interdisciplinary Essays on Environment and Culture** Luigi Manca, Jean-Marie Kauth, 2015-12-24 This is a collection of essays about the media the environment and the whole of humanity at the brink of extinction As the demands of overpopulation and of an unsustainable consumer economy dry up existing natural resources and destroy vital ecosystems that we need to survive the corporate controlled media saturate worldwide audiences with a barrage of hypnotic images and narratives to stimulate over consumption and to distract us from the consequences of rampant consumerism while remaining silent about the systematic destruction of the environment and our future Academicians from the across the sciences the social sciences the arts and the humanities engage in an interdisciplinary discussion informed by a vision of an interconnected humanity and focused on the role of the media in forging public discourse Contributors to the collection argue that today s media are failing humanity Rather than providing pictures of reality on which the world s citizens can act the corporate controlled media are widely used as instruments of commercial and political propaganda creating an immense web of images and narratives that their creators know to be not true fabrications designed to sell to manipulate in a sense to enslave worldwide audiences At the core of the discussion in this book is a utopian vision of one unified humanity billions of

people whose destinies and dreams are imbricated and interdependent and who share the same world the same habitats It is a vision of a world that cherishes diversity but is also united a world where our differences are no longer a cause for conflict and where separate countries or separate ethnic or religious communities no longer have to compete or wage war to exploit available resources As extensions of humans the media can be instruments of salvation instead of destruction liberation instead of oppression But first we must recognize the challenges we face

**Why Look at Plants?** ,2018-11-05 Winner of the 2019 Outstanding Academic Titles award in Choice a publishing unit of the Association of College Research Libraries ACRL Why Look at Plants proposes a thought provoking and fascinating look into the emerging cultural politics of plant presence in contemporary art Through the original contributions of artists scholars and curators who have creatively engaged with the ultimate otherness of plants in their work this volume maps and problematizes new intra active agential interconnectedness involving human non human biosystems central to artistic and philosophical discourses of the Anthropocene Plant s fixity perceived passivity and resilient silence have relegated the vegetal world to the cultural background of human civilization However the recent emergence of plants in the gallery space constitutes a wake up call to reappraise this relationship at a time of deep ecological and ontological crisis Why Look at Plants challenges readers pre established notions through a diverse gathering of insights stories experiences perspectives and arguments encompassing multiple disciplines media and methodologies

**Writing the Earth, Darkly** Isabel Hoving,2017-02-08 Why do we find so many references to nature and the environment in the many Caribbean literary texts that try to come to terms with the contemporary age of globalization Even when these novels and poems do not seem to be concerned with environmental issues at all they abound with fragrant creepy or dark references to flowers insects trees gardens and mud This book discusses a range of Anglophone and Dutch language Caribbean literary texts to propose an answer It shows that some writers evoke nature to question oppressive notions of what is natural and what is not when it comes to race gender and desire Other writers choose to counter the destructive dichotomies of wildness order nature culture nature human that marked colonialism Instead they represent the environment as a field of interconnectedness marked by intense semiotic interaction in which human beings are also implicated But writing about nature can also be a means to reconnect with the very foundations of life itself In the most dramatic cases references to nature evoke an extra discursive space that then functions to subvert existing discourses That space may even mark the site of the annihilation of discourse or of the self These texts suggest that in times of globalization it is only the dark queer turn to matter that will free the path to imagining human existence in a new way The book s proposal to understand some of these fascinating texts as an effort to relate to the mind baffling explosive real is inspired by postcolonial trauma theory posthumanism and new materialism However Caribbean literature is a layered practice that does much more than merely explore the world s materiality It works simultaneously as cultural critique counter discourse and as the manipulation of affect This book therefore brings together

ecocriticism with Caribbean and postcolonial studies the study of globalization trauma theory the study of gender and sexuality posthumanism and new materialism to bring out the full complexity of these wise texts Thus it hopes to show its readers their extraordinary innovative potential

**T.S. Eliot, Poetry, and Earth** Etienne Terblanche, 2016-05-12 T S Eliot enjoyed a profound relationship with Earth Criticism of his work does not suggest that this exists in his poetic oeuvre Writing into this gap Etienne Terblanche demonstrates that Eliot presents Earth as a process in which humans immerse themselves The Waste Land and Four Quartets in particular re locate the modern reader towards mindfulness of Earth s continuation and one s radical becoming within that process But what are the potential implications for ecocriticism Based on its careful reading of the poems from a new material perspective this book shows how vital it has become for ecocriticism to be skeptical about the extent of its skepticism to follow instead the twentieth century s most important poet who at the end of searing skepticism finds affirmation of Earth art and real presence

Thinking about Animals in the Age of the Anthropocene Morten Tønnessen, Kristin Armstrong Oma, Silver Rattasepp, 2016-04-13 The term Anthropocene the era of mankind is increasingly being used as a scientific designation for the current geological epoch This is because the human species now dominates ecosystems worldwide and affects nature in a way that rivals natural forces in magnitude and scale Thinking about Animals in the Age of the Anthropocene presents a dozen chapters that address the role and place of animals in this epoch characterized by anthropogenic human made environmental change While some chapters describe our impact on the living conditions of animals others question conventional ideas about human exceptionalism and stress the complex cognitive and other abilities of animals The Anthropocene idea forces us to rethink our relation to nature and to animals and to critically reflect on our own role and place in the world as a species Nature is not what it was Nor are the lives of animals as they used to be before mankind s rise to global ecological prominence Can we eventually learn to live with animals rather than causing extinction and ecological mayhem
