Green Technology Dustin Mulvaney, 2011-05-03 Green Technology An A to Z Guide explores the essential role of technology and its most recent developments toward a sustainable environment Twofold in its definition green technology includes the changing of existing technology toward energy conservation as well as the creation of new clean technology aimed at utilizing renewable resources With a primary focus on waste management the volume presents more than 150 articles in A to Z format featuring such disciplines as nanoscience biochemistry information technology and environmental engineering Scholars and experts in their fields present a full range of topics from applications of green technology to The Green Grid global consortium to membrane technology and water purification systems to waste to energy technology This work culminates in an outstanding reference available in both print and electronic formats for academic university and public libraries Vivid photographs searchable hyperlinks an extensive resource guide numerous cross references and a clear accessible writing style make the Green Society volumes ideal for classroom use as well as for research Science Fiction and Posthumanism in the Anthropocene Jonathan Hay, 2024-12-26 With science fiction stories imagining futures and worlds vastly different from our own and posthuman philosophies radically reconceptualising our species place within our own world this book is a deep dive into the similarities between science fiction studies and critical posthumanism and how they can be read together Both fields fantasise about future technologies envisage alienness through conversation with everyday life and both anticipate the Anthropocene as a dire source of rupture from the present Drawing inspiration from these and other consonances this book establishes a common theoretical ground between the two fields upon which the two currents of future oriented thought can meet and begin to share a common language An investigation that draws critical currency from the everyday condition of our species in relation to technology and our perilous situation in the Anthropocene the book observes posthumanism not just as a theoretical framework that may be applied to science fictional ideas but also as an integral part of how it is that science fiction is generated Featuring case studies of the work of prominent authors Isaac Asimov Ursula K Le Guin and Kim Stanley Robinson alongside the BBC television series Doctor Who and the cult videogame Outer Wilds Science Fiction and Posthumanism in the Anthropocene formulates a new critical paradigm which recognises the value of such works to posthumanist thought Addressing those with an interest in either academic discipline it demonstrates that urgent discourses around our shared future are more imperative now than ever before Kim Stanley Robinson Andrew Rowcroft, 2024-05-03 Kim Stanley Robinson remains one of the most progressive writers working today His novels and short stories have mapped cycles of capitalist violence economic expansion and material despoliation in turn proposing radical visions of social and economic justice through cooperatives collective agreements and stewardship of the environment But if Robinson is readily considered a political author less attention has been paid to his craft and composition This book examines Robinson s concern with literary apprenticeship In novels such as the post apocalyptic The Wild Shore the

intergenerational star ship narrative Aurora and the tale of Ice Age hunters Shaman Robinson creates characters who struggle with and against storytelling In these fictions apprentices battle against the limits of their interpretative powers as they come to recognise the real pleasures and the intense hardships of art and narrative The Big Book of Mars Marc Hartzman,2020-07-07 The most comprehensive look at our relationship with Mars yesterday today and tomorrow through history archival images pop culture ephemera and interviews with NASA scientists for fans of Andy Weir and For All Mankind Mars has been a source of fascination and speculation ever since the ancient Egyptians observed its blood red hue and named it for their god of war and plague But it wasn't until the 19th century when canals were observed on the surface of the Red Planet suggesting the presence of water that scientists novelists filmmakers and entrepreneurs became obsessed with the question of whether there's life on Mars Since then Mars has fully invaded pop culture inspiring its own day of the week Tuesday an iconic Looney Tunes character and many novels and movies from Ray Bradbury's Martian Chronicles to The Martian It's this cultural familiarity with the fourth planet that continues to inspire advancements in Mars exploration from NASA's launch of the Mars rover Perseverance to Elon Musk's quest to launch a manned mission to Mars through SpaceX by 2024 Perhaps one day we'll be able to answer the questions our ancestors asked when they looked up at the night sky millennia ago *Anthropocene Encounters: New Directions in Green Political Thinking* Frank Biermann,Eva Löwbrand,2019-02-07 Coined barely two decades ago the Anthropocene has become one of the most influential and controversial terms in environmental policy Yet it remains an ambivalent and contested formulation giving rise to a multitude of unexpected and often uncomfortable conversations This book traces in detail a broad variety of such Anthropocene encounters in science philosophy and literary fiction It asks what it means to think green in a time when nature no longer offers a stable backdrop to political analysis Do familiar political categories and concepts such as democracy justice power and time hold when confronted with a world radically transformed by humans The book responds by inviting more radical political thought plural forms of engagement and extended ethical commitments making it a fascinating and timely volume for graduate students and researchers working in earth system governance environmental politics and studies of the Anthropocene This is one of a series of publications associated with the Earth System Governance Project For more publications see www.cambridge.org/earth-system-governance **Provisional Cities** Renata Tyszczyk,2017-11-02 This book considers the provisional nature of cities in relation to the Anthropocene the proposed geological epoch of human induced changes to the Earth system It charts an environmental history of curfews admonitions and alarms about dwelling on Earth Provisional cities are explored as exemplary sites for thinking about living in this unsettled time Each chapter focuses on cities settlements or proxy urbanisations including past disaster zones remote outposts in the present and future urban fossils The book explores the dynamic changing and contradictory relationship between architecture and the global environmental crisis and looks at how to re-position architectural and urban practice in relation to wider intellectual

environmental political and cultural shifts The book argues that these rounder and richer accounts can better equip humanity to think through questions of vulnerability responsibility and opportunity that are presented by immense processes of planetary change These are cautionary tales for the Anthropocene Central to this project is the proposition that living with uncertainty requires that architecture is reframed as a provisional practice This book would be beneficial to students and academics working in architecture geography planning and environmental humanities as well as professionals working to shape the future of cities Space Ethics Brian Patrick Green,2021-10-19

Throughout history humans have explored new places making both good and bad moral decisions along the way As humanity proceeds to explore space it is important that we learn from the successes and not repeat the mistakes of the past This book provides the first comprehensive introduction to ethics as it applies to space exploration and use It examines real world case studies that exemplify the ethical challenges we face in exploring beyond Earth space debris militarization in space hazardous asteroids planetary protection the search for extraterrestrial life commercial and private sector activities in space space settlements very long duration missions and planetary scale interventions Major themes include human health environmental concerns safety and risk governance and decision making and opportunities and challenges of multidisciplinary and international contexts Ideal for classroom use and beyond the book provides ways of thinking that will help students academics and policymakers examine the full range of ethical decisions on questions related to space exploration **Society After Money** Project Society After Money,2019-04-18

Project Society After Money is an interdisciplinary project between commons theory evolutionary political economy media studies and sociology that enter into a dialogue with one another in order to look at their specific theories and criticisms of money Conceived as the beginning of a necessary interdisciplinary dialogue the possibilities of post monetary forms of organization and production are taken into account and examined On one hand there is a lot of talk about digital revolution mediatized society networks Industry 4 0 On the other hand the present is described in terms of crisis financial crisis economic crisis planetary boundaries At once there is the description of a media technological change along with massive social and ecological disruptions Society After Money is based on the premise that there might be a conflict between digital media digital technology and the medium of money and perhaps new digital possibilities that allow alternative forms of economy It criticizes what is normally seen as self evident and natural namely that social coordination has to be done by the medium of money We re left with a highly innovative collection of contributions that initiates a broader social discourse on the role of money in the global society of the 21st century **Kim Stanley Robinson Maps the Unimaginable** William J.

Burling,2009-05-14 These essays examine Robinson s use of alternate history and politics both in his many novels and in his short stories This collection drawn from writers on four continents includes five new essays and broadens the interpretive debate surrounding Robinson s science fiction and argues for consideration of the author as an intellectual figure of the first rank Provided by publisher **Transversal Ecocritical Praxis** Patrick D. Murphy,2013-06-20 In Transversal Ecocritical

Praxis Theoretical Arguments Literary Analysis and Cultural Critique Patrick D Murphy Ph D utilizes ecocriticism and ecofeminism to develop his concept of transversal practice an interdisciplinary combination of theory and applied criticism He begins by explaining the necessity for cutting across disciplinary boundaries of all kinds in order to address the ecological dimensions of culture and literature The dialogical foundation of this orientation is elaborated through a consideration of the theories of Mikhail Bakhtin particularly in terms of the ethical responsibilities of the reader and critic Murphy then takes up issues of identity and subject formation in relation to genetics embodiment and selfhood These same issues play out in the history of the aesthetic category of the sublime which the author critiques from an ecofeminist perspective Following that he turns attention to cultural issues of consumption both at home and internationally looking particularly at postcolonial literature and forms of resistance to globalizations and agricultural land grabs Resistance and postcolonial literature is further analyzed through consideration of two book length Latin American poetic sequences one by Pablo Neruda and the other by Ernesto Cardenal Switching from works focused on the present Murphy turns his attention then to how these themes play out in the future oriented worlds of science fiction He concludes with two chapters that combine ecocritical cultural critique and economic analysis in studies of the destructive role of megadams particularly in Asia and the impact of the combined threats of peak oil and climate change on one island s tourist economy The conclusion contains a discussion of further drivers of future ecocritical analysis Traversing a wide range of examples literary cultural and economic this work fleshes out the benefits of an ethically grounded interdisciplinary ecocriticism

Persuasive Aesthetic Ecocritical Praxis

Patrick D. Murphy, 2015-08-20 Persuasive Aesthetic Ecocritical Praxis continues Patrick D Murphy s focus on transversal ecocritical praxis by considering literature and cinema in terms of the persuasive force of aesthetic activity and whether or not artistic production and its criticism can be considered forms of activism Murphy argues that literature and other forms of aesthetic production hold out the promise of being able to move some individuals deeply through both affective and intellectual engagement in ways that facilitate ideological reflection To analyze aesthetic production ecocritically requires a transversal orientation in order to work continuously at accommodating a vast array of often seemingly disparate perspectives disciplines and contextual information as well as the ever changing thematic plot setting and contextual elements of the aesthetic works under consideration and the responses of changing audiences through time and across cultures Murphy demonstrates this approach through presenting theories of transversality and applying them with attention to issues of propaganda agitation and persuasion both in terms of artistic production and the criticism of such production He also brings an ecofeminist orientation to the fore with particular attention to the gendered economic aspects of environmental issues in an age of land grabs and plantation economies Along the way he treats a wide range of literary works films and miniseries In American literature he discusses realist and science fiction works from Susan Fenimore Cooper s Rural Hours to Paolo Bacigalupi s The Windup Girl Barbara Kingsolver s Flight Behavior to Kim Stanley Robinson s 2312 and

Ana Castillo's *So Far from God* to Leslie Marmon Silko's *Gardens in the Dunes*. In international literature he analyzes Mo Yan's *The Garlic Ballads*, Jiang Rong's *Wolf Totem*, Michiko Ishimure's *The Lake of Heaven*, Miyuki Miyabe's *All She Was Worth* and other novels. The book concludes with a reading of Ernest Callenbach's *Ecotopia* and *Ecotopia Emerging* and an Afterword recommending further directions for transversal ecocritical research and an interview that discusses Murphy's previous book *Transversal Ecocritical Praxis* and provides some personal background on the author. No Other Planet Mathias Thaler, 2022-09-22 Investigates the role of hope and fear in our climate changed world by focusing on various expressions of the utopian imagination. *Climate Change and the Contemporary Novel* Adeline Johns-Putra, 2019-03-21 Analysing how contemporary fiction explores climate change Johns Putra argues that literature can help us understand our obligations to the future. **Space Civilization** James Gilley, 2020-10-07 As humanity begins to move in earnest towards becoming a multiplanetary civilization the social science questions of what will be required of that civilization begin to emerge. This work seeks to highlight these questions and to provide some answers about the economic political and social predicaments of space civilization. Fantastic Cities Stefan Rabitsch, Michael Fuchs, Stefan L. Brandt, 2022-02-04 Contributions by Carl Abbott Jacob Babb Marleen S Barr Michael Fuchs John Glover Stephen Joyce Sarah Lahm James McAdams Cynthia J Miller Fernando Gabriel Pagnoni Berns Chris Pak Mar a Isabel P rez Ramos Stefan Rabitsch J Jesse Ram rez A Bowdoin Van Riper Andrew Wasserman Jeffrey Andrew Weinstock and Robert Yeates Metropolis Gotham City Mega City One Panem's Capitol the Sprawl Caprica City American and Americanized urban environments have always been a part of the fantastic imagination. *Fantastic Cities American Urban Spaces in Science Fiction Fantasy and Horror* focuses on the American city as a fantastic geography constrained neither by media nor rigid genre boundaries. *Fantastic Cities* builds on a mix of theoretical and methodological tools that are drawn from criticism of the fantastic media studies cultural studies American studies and urban studies. Contributors explore cultural media across many platforms such as Christopher Nolan's *Dark Knight Trilogy* the *Arkham Asylum* video games the 1935 movie serial *The Phantom Empire* Kim Stanley Robinson's fiction Colson Whitehead's novel *Zone One* the vampire films *Only Lovers Left Alive* and *A Girl Walks Home Alone at Night* Paolo Bacigalupi's novel *The Water Knife* some of Kenny Scharf's videos and Samuel Delany's classic *Dhalgren*. Together the contributions in *Fantastic Cities* demonstrate that the fantastic is able to realize that which is normally confined to the abstract metaphorical and/or subjective. Consequently both utopian aspirations for and dystopian anxieties about the American city become literalized in the fantastic city. *Science Fiction, Fantasy, and Politics* Dan Hassler-Forest, 2016-07-21 From Tolkien to Star Trek from *Game of Thrones* to *Battlestar Galactica* and from *The Walking Dead* to Janelle Mon e's Afrofuturist concept albums transmedia world building offers us complex and immersive environments beyond capitalism. This book examines the ways in which these popular storyworlds offer tools for anticapitalist theory and practice. Building on Hardt and Negri's theory of global capitalism *Science Fiction Fantasy and Politics* shows how transmedia world building has the potential of

offering more than a momentary escape from capitalist realism in the age of media convergence and participatory culture. The book features eight fantastic storyworlds that offer vivid illustrations of global capitalism's contradictory logic. Approaching transmedia world building both as a cultural form and as a political economy, it demonstrates the limitations inherent in fandom and fan culture, which is increasingly absorbed as a form of immaterial labor. But at the same time, the book also explores the productive ways in which fantastic storyworlds contain a radical energy that can give us new ways of thinking about politics, popular culture, and anticapitalism.

Entangled Peace Ignasi Torrent, 2021-08-30. This book unfolds an exploratory journey intended to scrutinise the suitability of entanglements and relations as a mode of thinking and seeing peacebuilding events. Through a reflection upon the UN's limited results in the endeavour towards securing lasting peace in war-torn scenarios, Torrent critically engages with three relevant debates in contemporary peacebuilding literature, including the inclusion of the locals, the achievement of organisational system-wide coherence, and the increasingly questioned agential condition of peacebuilding actors. Inattentive to the relational vulnerability of involved stakeholders, it is suggested that the UN seeks to secure a totalising modern history defined in the book as a story that undoes other stories. Whilst affirming the entangled ontogenesis of actors and processes in the conflict-affected configuration, *Entangled Peace* also delves into a cautionary argument about what the author refers to as entanglement fetishism, namely the celebratory, normative, deterministic, and exclusionary projection of a relational world. Inspired by Alfred North Whitehead, *Entangled Peace* is an invitation to speculate over the peacebuilding milieu and, by extension, the broader theatre of the real as radical openness in which events emanate from the collision of an infinite multiplicity of possible worlds.

Ecocritical Explorations in Literary and Cultural Studies Patrick D. Murphy, 2009-07-15. In *Ecocritical Explorations*, Patrick D. Murphy explores environmental literature and environmental cultural issues through both theoretical and applied criticism. He engages with the concepts of referentiality, simplicity, the nation-state, and virtual reality in the first section of the book and then goes on to interrogate these issues in contemporary environmental literature, both American and international. He concludes his argument with a discussion of the larger frames of family dynamics and unnatural disasters such as hurricanes and global warming, ending with a chapter on the integration of scholarship and pedagogy in the classroom with reference to his own teaching experiences. Murphy's study provides a wide-ranging discussion of contemporary literature and cultural phenomena through the lens of ecological literary criticism, giving attention to both theoretical issues and applied critiques. In particular, he looks at popular literary genres such as mystery and science fiction, as well as actual disasters and disaster scenarios. *Ecocritical Explorations in Literary and Cultural Studies* is a timely contribution to ecological literary criticism and an insightful look into how we represent our relationship with the environment.

Future Wars David Seed, 2012-01-01. This timely book investigates fiction that speculates about wars likely to break out in the near or distant future. Ranging widely across periods and conflicts, real and imagined, *Future Wars* explores the interplay between politics, literature, science, and fiction.

and war in a range of classic texts Individual essays look at Reagan s infamous Star Wars project nuclear fiction Martian invasion and the Pax Americana The use of future war scenarios in military planning dates back to the nineteenth century and Future Wars concludes with a US Army officer s assessment of the continuing usefulness of future wars fiction

Science Fiction and the Two Cultures Gary Westfahl, George Slusser, 2009-06-01 Essays in this volume demonstrate how science fiction can serve as a bridge between the sciences and the humanities The essays show how early writers like Dante and Mary Shelley revealed a gradual shift toward a genuine understanding of science how H G Wells first showed the possibilities of combining scientific and humanistic perspectives how writers influenced by Gernsback s ideas like Isaac Asimov illustrated the ways that literature could interact with science and assist in its progress and how more recent writers offer critiques of science and its practitioners
