*Parenting After the Death of a Child* Jennifer L. Buckle, Stephen J. Fleming, 2011-01-19 The death of a child has a tremendous and overwhelming impact on parents and siblings, completely altering the psychological landscape of the family. In the aftermath of such a tragedy, parents face the challenge of not only dealing with their own grief but also that of their surviving children. How can someone attempt to cease parenting a deceased child while maintaining this role with his/her other children? Is it possible for a mother or father to effectively deal with feelings of grief and loss while simultaneously helping their surviving children? *Parenting After the Death of a Child: A Practitioner's Guide* addresses this complex and daunting dilemma. Following on the heels of a qualitative research study that involved interviewing bereaved parents, both fathers and mothers, Buckle and Fleming have put together several different stories of loss and recovery to create an invaluable resource for clinicians, students, and grieving parents. The authors present the experience of losing a child and its subsequent impact on a family in a novel and effective way, demonstrating the strength and importance of their book for the counseling field.

*Brief Interventions with Bereaved Children* Barbara Monroe, Frances Kraus, 2010 Recent years have seen increasing interest in the needs of children facing bereavement, and a corresponding increase in services to support them. This book addresses and explains the theoretical concepts and practical implications behind the idea of brief work with bereaved children and families. Flexible and accessible short-term services delivered at the right time underpin the strengths of bereaved children, supporting their recovery rather than pathologising the grief process. In this way, the book also speaks to the current interest in the concept of resilience and working with families' strengths and possibilities rather than merely identifying their problems. This second edition continues to be a unique book within the growing field of childhood bereavement, and the new chapters added to this edition discuss managing situations with learning disability, supporting very young children, and emotional literacy. The book also presents cases from the service user's perspective. It looks at different approaches to intervention, such as the importance of assessment and the value of groupwork, and also covers work with children and families before a death. *Brief Interventions with Bereaved Children* will appeal to practitioners, educators, and service providers managing scarce resources. The editors have more than twenty-five years' experience as practitioners within the field as service providers and educators. The book features chapters from distinguished contributors with backgrounds in healthcare, education, social work, and the police, alongside theoretical and practice-based chapters from

workers in the field of bereavement care for children

**Grief** Michael Cholbi, 2024-01-16 An engaging and illuminating exploration of grief and why despite its intense pain it can also help us grow Experiencing grief at the death of a person we love or who matters to us as universal as it is painful is central to the human condition Surprisingly however philosophers have rarely examined grief in any depth In *Grief* Michael Cholbi presents a groundbreaking philosophical exploration of this complex emotional event offering valuable new insights about what grief is whom we grieve and how grief can ultimately lead us to a richer self understanding and a fuller realization of our humanity Drawing on psychology social science and literature as well as philosophy Cholbi explains that we grieve for the loss of those in whom our identities are invested including people we don't know personally but cherish anyway such as public figures Their deaths not only deprive us of worthwhile experiences they also disrupt our commitments and values Yet grief is something we should embrace rather than avoid an important part of a good and meaningful life The key to understanding this paradox Cholbi says is that grief offers us a unique and powerful opportunity to grow in self knowledge by fashioning a new identity Although grief can be tumultuous and disorienting it also reflects our distinctly human capacity to rationally adapt as the relationships we depend on evolve An original account of how grieving works and why it is so important *Grief* shows how the pain of this experience gives us a chance to deepen our relationships with others and ourselves
