Ground Studies for Pilots: Navigation, 6th Ed R.B.Underdown & Tony Palmer,2008-07-07 This volume covers the General Navigation paper with the exception of the principles construction and errors of compasses which are dealt with in the new Instruments volume Compared with the Navigation section of the old Volume 3 Navigation General and Instruments there is much new material including navigation plotting procedures the use of navigation computers and a very detailed survey of all charts encountered by modern professional and amateur pilots Mathematics Reminders Form of the Earth Temperatures Airspeeds and Altitudes DR Navigation Maximum Range Radius of Action and Point of No Return Point of Equal or Critical Point and Examples Visual Navigation Navigation on Climbs and Descents Navigation in Plotting and the Cruise Use of Fixes Practical the Flight Log and Examples The Flight Management System FMS Inertial Navigation Systems and Examples The Solar System and Time and Examples Phenomena and Examples **Climatology for Airline Pilots** Roy

Quantick,2008-04-30 Climatology particularly the study of difficult and demanding weather conditions is of major importance to pilots now that aeroplanes fly over previously unavailable routes such as the North Pole and take direct routes over very large oceans Existing books on climatology address physical biological or cultural environments and do not supply adequate information for the pilot Nor do the present books on aviation meteorology provide sufficient detail on subjects such as arid climates tropical storms and upper tropospheric winds and temperatures This new book concentrates on aspects of climatology that are important for modern aviation including temperature precipitation solar radiation winds and regional climatic environments from around the world Although the book has been written with the airline pilot in mind it will also be an essential reference for Air Transport Pilot Licence training staff and for ATPL students It will also be of interest to operational route planning staff and students of climatology *Ground Studies for Pilots: Radio Aids Sixth Edition*

Underdown,David Cockburn,2001-06-08 This well regarded series for students taking the commercial and airline transport pilot licences has been substantially revised to bring it into line with the new European Joint Aviation Requirements JARs for flight crew licensing Each volume deals with the material required by one of the new JAR papers This volume covers those subjects traditionally referred to as Radio Aids It includes not only those systems ground and airborne equipment comprising the JAR Radio Navigation paper but also the basic principles of radio wave propagation and communications required in the Aircraft General paper The volume also covers those warning systems which use radio principles It continues to cover basic principles as well as communications and navigation equipment Emphasis on obsolete systems has been reduced to allow increased coverage of modern equipment Coverage has been expanded on displays and satellite communications and navigation systems as well as warning systems for terrain and collision avoidance and altitude monitoring The opportunity has been taken to simplify the presentation of information so as to aid revision work Many test questions and answers have been included based on the JAR syllabus **A Selected and Annotated Bibliography of Recent Air Age Education**
