Language and Communication in the Mathematics Classroom Heinz Steinbring, Maria Giuseppina Bartolini Bussi, Anna Sierpinska, 1998 The way in which teachers communicate with their students partly determines what they communicate This book addresses the communication issue by building on a series of papers whose first versions were presented in 1992 at the Sixth International Congress of Mathematics Education in Quebec Papers include 1 Crossing the Gulf between Thought and Symbol Language as Slippery Stepping Stones Susan E B Pirie 2 Three Epistemologies Three Views of Classroom Communication Constructivism Sociocultural Approaches Interactionism Anna Sierpinska 3 Verbal Interaction in the Mathematics Classroom A Vygotskian Analysis Maria G Bartolini Bussi 4 Discourse and Beyond On the Ethnography of Classroom Discourse Falk Seeger 5 From Stoffdidaktik to Social Interactionism An Evolution of Approaches to the Study of Language and Communication in German Mathematics Education Research Heinz Steinbring 6 Examining the Linguistic Mediation of Pedagogic Interactions in Mathematics Clive Kanes 7 Pupil Language Teacher Language Two Case Studies and the Consequences for Teacher Training Albrecht Abele 8 Teacher Student Communication in Traditional and Constructivist Approaches to Teaching Maria Luiza Cestari 9 Alternative Patterns of Communication in Mathematics Classes Funneling or Focusing Terry Wood 10 Students Communicating in Small Groups Making Sense of Data in Graphical Form Frances R Curcio and Alice F Artzt 11 Communication and Learning in Small Group Discussions Kaye Stacey and Anne Gooding 12 Mathematical Communication through Small Group Discussions Marta Civil 13 Formats of Argumentation in the Mathematics Classroom Gotz Krummheuer 14 Teaching without Instruction The Neo Socratic Method Rainer Loska 15 The Role of Natural Language in Prealgebraic and Algebraic Thinking Ferdinando Arzarello 16 How Students Interpret Equations Intuition versus Taught Procedures Mollie MacGregor 17 Epistemological and Metacognitive Factors Involved in the Learning of Mathematics The Case of Graphic Representations of Functions Maria Kaldrimidou and Andreas Ikononou 18 Making Mathematics Accessible Megan Clark 19 Itineraries through Logic To Enhance Linguistic and Argumentative Skills Giancarlo Navarra and 20 Communication in a Secondary Mathematics Classroom Some Images Judith Fonzi and Constance Smith ASK **Speaking Mathematically** David Pimm, 1987 This stimulating study focuses on mathematics as a language with its own rules and conventions and explores the implications of this for classroom practice *Language and Communication in Mathematics Education* Judit N. Moschkovich, David Wagner, Arindam Bose, Jackeline Rodrigues Mendes, Marcus Schütte, 2018-03-27 This book considers some of the outstanding questions regarding language and communication in the teaching and learning of mathematics an established theme in mathematics education research which is growing in prominence Recent research has demonstrated the wide range of theoretical and methodological resources that can contribute to this area of study including those drawing on cross disciplinary perspectives influenced by among others sociology psychology linguistics and semiotics Examining language in its broadest sense to include all modes of

communication including visual and gestural as well as spoken and written modes it features work presented and discussed in the Language and Communication topic study group TSG 31 at the 13th International Congress on Mathematical Education ICME 13 A joint session with participants of the Mathematics Education in a Multilingual and Multicultural Environment topic study group TSG 32 enhanced discussions which are incorporated in elaborations included in this book

Discussing cross cutting topics it appeals to readers from a wide range of disciplines such as mathematics education and research methods in education multilingualism applied linguistics and beyond

Teaching Mathematics in Multilingual Classrooms J.B. Adler, 2005-12-21

Increasingly teachers all over the world are grappling on a daily basis with the fact of multilingual classrooms In this book Jill Adler captures three inter related dilemmas that lie at the heart of teaching mathematics in multilingual classrooms Adler's identification and naming of the dilemma of code switching the dilemma of mediation and the dilemma of transparency arise from exploring the realities of actual classrooms and are shaped by a perspective of teaching as a social practice Adler provides a sharp analysis and strong theoretical grounding for her work pulling together research related to the relationship between language and mathematics communicating mathematics and mathematics in bi multilingual settings In so doing she offers a direct challenge to dominant research on communication in mathematics classrooms that has othered the multilingual setting in its normalisation of the monolingual classroom The norm is a multicultural one Set in contemporary South Africa a context of linguistic diversity and rapid change this book offers a spotlight whose beam is wide enough to illuminate dilemmas at work in all mathematics classrooms

Oral Discourse and Education Bronwyn Davies, P. Corson, 2013-11-01

Oral Discourse and Education examines spoken language as a field of study looking at the various ways in which we can both theorise the place of talk in education and examine the way talk is actually done in educational settings Given the centrality of literacy based practices in schools a book focusing on talk brings quite different and important perspectives to the study of education Talk is something that has all too often been devalued and taken for granted What becomes evident throughout the papers included in this volume is that talk is of central importance in establishing identities and the cultures in which those identities are located However because we are unused to reflexively examining the way we talk there is a serious disjuncture between what we believe talk should achieve and what can be seen to be achieved in actual talk in educational settings Anyone interested in teaching should read this book

Becoming more aware of the centrality of talk and what it achieves is important both for enabling us to find ways to bring our ideals more in line with our practices and for being able to recognise and reflect on the ways our talk can be achieving things quite other than what we intend This book is relevant to teachers at primary secondary and tertiary levels and for researchers interested in spoken language in educational contexts

The Role of Mathematics Discourse in Producing Leaders of Discourse Libby Knott, 2010-01-01

The intent of this monograph is to showcase successful implementation of mathematical discourse in the classroom Some questions that might be addressed are How does a teacher begin to learn about using discourse purposefully

to improve mathematics teaching and learning How is discourse interwoven into professional development content courses to provide teachers with the tools necessary to begin using discourse in their own classrooms What does a discourse rich classroom look like and how is it different from other classrooms from both the teacher s and the students perspectives How can teachers of pre service teachers integrate discourse into their content and methods courses How can we use discourse research to inform work with teachers both pre and in service for example to help them know how to respond to elicited knowledge from students in their classrooms What are the discourse challenges in on line mathematics courses offered for professional development Can on line classrooms also be discourse rich What would that look like In what ways does mathematical discourse differ from discourse in general

Classroom Research on Mathematics and Language Núria Planas, Candia Morgan, Marcus Schütte, 2021-03-22 This book offers an international perspective on the current and future state of the research focusing in particular on the role and use of language in mathematics school teaching and learning It focuses on the development of a unified view of the languages of the learners of the teachers and of mathematics by considering the role of language in the learning teaching and doing of mathematics in the classroom and the current richness and plurality of language and culture The contributions in this volume combine to show how views of language and of language research in mathematics education have changed significantly in recent decades and how they will continue to change and become even more complex and challenging in the era of diversity All of these contributions by leading scholars are grouped into two sections for emphasis on issues of Theorising the complexity of language in mathematics teaching and learning Opening spaces of learning with mathematics classroom research on language This book will be of great interest to mathematics teachers teacher educators curriculum developers and mathematics education researchers who deal with the study and implementation of pedagogies of mathematics teaching and learning specifically in regions of the world which are culturally and sociolinguistically diverse

ICME is the largest international conference on mathematics education in the world. This quadrennial event is organized under the auspices of the International Commission on Mathematical Instruction (ICMI). This book, the Proceedings of ICME 14, presents the latest trends in mathematics education research and mathematics teaching practices at all levels. Each chapter covers an extensive range of topics in mathematics education. Volume I consists of 4 Plenary Lectures, 3 Plenary Panels, 5 Lectures of Awardees, 4 Survey Teams, 62 Topic Study Groups, 13 Discussion Groups, 20 Workshops, a Thematic Afternoon, and an Early Career Researcher Day. Plenary Lectures recognize substantial and continuing contributions to the growth of the field of Mathematics Education. Plenary Panels address three major challenges currently facing mathematics educators across the globe. The Survey Teams have a particular emphasis on identifying and characterizing important new knowledge, recent developments, new perspectives, and emergent issues. The Topic Study Groups provide a coverage of important topics in mathematics education. Volume II consists of 50 invited lectures which present the work and reflections of both established and emerging researchers from around the world. These lectures cover a wide spectrum of topics, themes, and issues that reflect the latest challenges and development in the field of mathematics education.
