

There are at least 7,000 known languages alive in the world today. Twenty-three of these languages are a mother tongue for more than 80 million people. The 23 languages make up the native tongue of 4.1 billion people. We represent each language within black borders and then provide the numbers of native speakers (in millions) by country. The colour of these countries shows how languages have taken root in many different regions.

Adaptive Languages Christian Bentz, 2018-06-11 Languages carry information To fulfil this purpose they employ a multitude of coding strategies This book explores a core property of linguistic coding called lexical diversity Parallel text corpora of overall more than 1800 texts written in more than 1200 languages are the basis for computational analyses Different measures of lexical diversity are discussed and tested and Shannon's measure of uncertainty the entropy is chosen to assess differences in the distributions of words To further explain this variation a range of descriptive explanatory and grouping factors are considered in a series of statistical models The first category includes writing systems word formation patterns registers and styles The second category includes population size non native speaker proportions and language status Grouping factors further elicit whether the results extrapolate across or are limited to specific language families and areas This account marries information theoretic methods with a complex systems framework illustrating how languages adapt to the varying needs of their users It sheds light on the puzzling diversity of human languages in a quantitative data driven and reproducible manner

An Introduction to Multilingualism Florian Coulmas, 2018 This book offers an introduction to the many facets of multilingualism in a changing world It begins with an overview of the multiplicity of human languages and their geographic distribution before moving on to the key question of what multilingualism actually is and what is understood

by terms such as mother tongue native speaker and speech community In the chapters that follow Florian Coulmas systematically explores multilingualism with respect to the individual institutions cities nations and cyberspace In each of these domains the dynamics of language choice are undergoing changes as a result of economic political and cultural forces Against this background two chapters discuss the effects of linguistic diversity on the integration and separation of language and society before a final chapter describes and assesses research methods for investigating multilingualism Each chapter concludes with problems and questions for discussion which place the topic in a real world context The book explores where when and why multilingualism came to be regarded as a problem and why it presents a serious challenge for linguistic theory today It provides the basic tools to analyse different kinds of multilingualism at both the individual and society level and will be of interest to students of linguistics sociology education and communication studies **The Handbook of**
