Sechser,Neil Narang,Caitlin Talmadge,2021-11-28 Technology has always played a central role in international politics it shapes the ways states fight during wartime and compete during peacetime Today rapid advancements have contributed to a widespread sense that the world is again on the precipice of a new technological era Emerging technologies have inspired much speculative commentary but academic scholarship can improve the discussion with disciplined theory building and rigorous empirics This book aims to contribute to the debate by exploring the role of technology both military and non military in shaping international security Specifically the contributors to this edited volume aim to generate new theoretical insights into the relationship between technology and strategic stability test them with

sound empirical methods and derive their implications for the coming technological age This book is very novel in its approach It covers a wide range of technologies both old and new rather than emphasizing a single technology Furthermore this volume looks at how new technologies might affect the broader dynamics of the international system rather than limiting the focus to a stability The contributions to this volume walk readers through the likely effects of emerging technologies at each phase of the conflict process The chapters begin with competition in peacetime move to deterrence and coercion and then explore the dynamics of crises the outbreak of conflict and war escalation in an environment of emerging technologies The chapters in this book except for the Introduction and the Conclusion were originally published in the Journal of Strategic Studies **The London Journal, and Weekly Record of Literature, Science, and Art** ,1853 **The British cultivator and agricultural review** ,1844 *The National Jury Verdict Review and Analysis* ,2000
