Czaika,2018-02-08 Political and scientific debates on migration policies have mostly focused on governments efforts to control or reduce low skilled asylum and irregular migration or to encourage the return migration of these categories Less research and constructive discourse has been conducted on the role and effectiveness of policies to attract or retain high skilled workers An improved understanding of the drivers and dynamics of high skilled migration is essential for effective policy making as most highly developed and emerging economies experience growing shortages of high skilled labour supply in certain occupations and sectors and skilled immigration is often viewed as one way of addressing these Simplistic assumptions that high skilled migrants are primarily in pursuit of higher wages raise the expectation that policies which open channels for high skilled immigration are generally successful Although many countries have introduced policies aimed at attracting and facilitating the recruitment of high skilled workers not all recruitment efforts have had the desired effects and anecdotal evidence on the effectiveness of these programmes is rather mixed The reason is that the rather narrow focus on migration policy coincides with a lack of systematic and rigorous consideration of other economic social and political drivers of migration which may be equally or sometimes even more important than migration policies per se A better understanding of migration policies their making consequences and limitations requires a systematic knowledge of the broader economic social and political structures and their interaction in both origin and destination countries This book enhances this vibrant field of social scientific enquiry by providing a systematic multidisciplinary and global analysis of policies driving international high skilled migration processes in their interaction with other migration drivers at the individual city national and international level

Major Trade-Offs Corey Moss-Pech,2025-05-06 An eye opening look at the relationship between students majors and

their entry level jobs Humanities majors are used to answering the question So what are you going to do with that degree The common misconception is that students in humanities programs don t learn any useful skills for the real world In Major Trade Offs sociologist Corey Moss Pech argues that not only do humanities majors learn real world skills but they actually use them when they graduate Despite this discrepancy graduates with so called practical degrees like business and engineering are much more likely to find employment and they earn higher salaries Why do we belittle a liberal arts education despite the valuable skills that students acquire during their studies Major Trade Offs addresses this question by following students from different majors as they enter the workforce To understand the relationship between majors and entry level jobs Moss Pech conducted nearly 200 interviews with roughly ninety students from four majors at a large Midwestern university engineering business English and communications He follows these students through their senior years chronicling their internships and the support their universities provide in helping them pursue their career paths He found that graduates from practical majors entered the labor market successfully typically through structured internship programs However many ended up in entry level jobs that while well paid were largely clerical and didn t necessarily require a degree to perform On the other hand liberal arts majors rarely accessed structured internships and were largely left to carve out their own paths but did use their degree skills once they secured a job These results challenge popular myths about the marketability of these different majors and offer a new vision for the future of higher education Liberal arts skills are essential in the labor market and yet educators and policymakers still push resources into the practical arts perpetuating the myth that those majors are more valuable while depriving students of a well rounded education and leaving them no better prepared for the workforce than liberal arts students Of interest to students educators and employers Major Trade Offs calls on colleges and universities to advocate for liberal arts majors leveling the playing field for students as they plan for entry level work
