Greek and Roman Siege Machinery 399 BC-AD 363 Duncan B Campbell,2003-06-20 Siege machinery first appeared in the West during the Carthaginian invasion of Sicily in the late 5th century BC in the form of siege towers and battering rams After a 50 year hiatus these weapons of war re appeared in the Macedonian armies of Philip II and Alexander the Great a period that saw the height of their development in the Ancient World The experience of warfare with both the Carthaginians during the later 3rd century BC and Philip V of Macedon during the early 2nd century BC finally prompted the introduction of the siege tower and the battering ram to the Roman arsenal This title traces the development and use of these weapons across the whole of this period *The Wargames, The Roman Art And Science Of War* André Geraque Kiffer,2019-12-01 Board wargames are one of the most common forms of conflict simulation in mathematical models throughout history They are based on a map topographic or from a satellite photo where a hexagonal grid numbered or other geometric shape is applied to regulate the positioning and movement of the parts forces The pieces like those of chess are identified by symbols colors and numbers that register their historical qualities and quantities Two tables are basic the effects of geography terrain associated with weather conditions on the movements and the likely outcomes according to the relativity of opposing powers of the combats on the abilities of the pieces involved The sequence of each game is divided into a set number of turns or other names which vary according to the time scale and may range from minutes to years Punic Wars, 264 Bc André Geraque Kiffer,2019-12-06 Let us consider to make the next simulation possible that the political power of Carthage the suffetes and the families descended from kings would have understood the risk of living in the shadow of Rome They would understand that although the vocation of their people of Phoenician origin was essentially mercantilist they could not continue to practice it peacefully should the Roman Senate decide to expand its territory beyond the Italic peninsula And so rather late because they could have conquered all of Sicily involved in the Greek wars a long time ago than never they would decide for a total war against Rome to destroy its political power over the other nations of the peninsula so that they could conform to a Confederate Republic This would not forever prevent the inexorable march of Roman power but perhaps postpone or significantly alter its effects **Alesia 52 BC** Nic Fields,2014-06-20 52 BC is the key year of the Gallic Revolt with the near disastrous Roman defeat at Gergovia followed by the climactic victory over the Gallic chieftain Vercingetorix at Alesia In 52 BC Caesar s continued strategy of annihilation had engendered a spirit of desperation which detonated into a revolt of Gallic tribes under the leadership of the charismatic young Arvernian noble Vercingetorix Major engagements were fought at Noviodunum Avaricum and Gergovia with the last action being the most serious reverse that Caesar faced in the whole of the Gallic War However Vercingetorix soon realized that he was unable to match the Romans in pitched battle Taking advantage of the tribesmen s superior knowledge of their home territory Vercingetorix began a canny policy of small war and defensive manoeuvres which gravely hampered Caesar s movements by cutting off his supplies For

Caesar it was to be a grim summertime his whole Gallic enterprise faced disaster In the event by brilliant leadership force of arms and occasionally sheer luck Caesar succeeded in stamping out the revolt in a long and brutal action culminating in the siege of Alesia Vercingetorix finally surrendered and Alesia was to be the last significant resistance to the Roman will Never again would a Gallic warlord independent of Rome hold sway over the Celts of Gaul

Carthaginian Peace André Geraque Kiffer,2019-12-03 The politics of the Republic of Carthage will be played while the actions of the other contemporary powers will be simulated based on historical assumptions each seeking to apply its own policy of Divide et Impera in a scenario that we can affirm according to geographer Eratosthenes as the first world war

Greek Hoplite 480-323 BC Nicholas Sekunda,2000-12-25 The Greek hoplite the archetypal spear armed warrior is perhaps the most prevalent figure in our view of the Golden Age of Ancient Greek civilisation It was during this period that the state began to take greater responsibility for military organisation and the arming and equipping of its citizens From the victory at Marathon over Darius of Persia 490 BC through bitter inter state warfare to the rise of Philip of Macedonia and his son Alexander the Great the hoplite soldier was in the front line This title narrates the life and experiences of the common Greek warrior how he was recruited trained and fought and also looks in detail at how his weapons armour shields and helmets developed in the course of time
