Hong,2020-12-21 Can China's Belt and Road Initiative BRI promote sustainable development alongside its primary aims of increasing commercial connectivity with China's partners In discussions of the BRI the focus has tended to be on the implications for infrastructure construction connectivity and economic diplomacy Rather less attention has been paid to its potential impact on sustainability The initiative has not only set principles to prevent climate change and promote sustainable development but also pledged to align with the UN's environmental objectives The contributors to this volume describe and evaluate the consequent policy coordination in the areas of green finance green energy and sustainable development in the Belt and Road regions They examine both the challenges and opportunities of these projects and the role that Hong Kong can play in supporting their assessment finance and implementation With contributions from authors based in mainland China Hong Kong Australia Qatar the UK and the US with experience in corporate social responsibility international finance environmental policy and international relations this book presents a thorough and rigorous analysis of the green side of the BRI A valuable resource for scholars of the BRI and its many implications for China its partners and the development of sustainable infrastructure

The Synergy Between Green Development, Green Economy, and Sustainable Development. An Exploration of OECD's Work Jayshree Soni,2023-09-25 Seminar paper from the year 2023 in the subject Business economics Business Management Corporate Governance grade A course Management language English abstract The motivation behind the overview and somewhat polemical article is to introduce the issue of green development another working procedure which the OECD is presently dealing with Green development is viewed as a reasonable instrument for accomplishing the immortal goal which is manageable turn of events In the paper a specific consideration is placed on the accompanying inquiry what sort of relationship happens between green development green economy and practical turn of events The creator examinations the motivation behind concurrent working of the three green thoughts The additional worth of this paper is a show of the creator's model of GG GE SD relations and another way to deal with characterizing the peculiarity of green development It is inferred that conjunction of the threesome green economy green development feasible advancement is sensible because of the integral and synergistic nature of connections between these ideas

Environmental Landscape and Sustainable Biodiversity for Healthy Green Growth Javid Ahmad Parray,Nowsheen Shameem,A. K.

Haghi,2025-03-11 This unique reference book represents sustainable development of UN for providing a proper life standard and mobility for people The 17 sustainable development goals SDGs as set by the United Nations for 2030 are the most basic prerequisite for the growth and development of national health This book also provides broad case studies to show the interconnection of sustainable development goals of healthy lifestyle that will have enormous impacts on proper environmental health standards In this advanced reference book the authors will invite experts from around the globe to help the readers to better understand the interconnection between the UN sustainable development goals and environmental sustainability for 2030 To achieve these goals the authors have divided this reference book into four sections The first section

of this research oriented book is devoted to reviewing the basic concepts of the healthy environmental sustainable development goals by considering the current world population of 7 billion. The plan is that the chapters selected in this section should provide the most important aspects needed in detail. In Section 2, to reach novel technology innovations for making changes in environment health policy, the requirements for making remarkable challenges along with the global economy are reviewed. Section 3 is used as a practical guide for postgraduate students interested in gaining their knowledge in the area of the environmental sustainability without a strong background in all 17 SDGs as set by the United Nations for 2030 and the different aspects of the sustainability for a healthier lifestyle. Section 4 addresses case studies to cover conceptual framework on how to better understand the sustainability goals and synergies among organic food, green energy and clean water technologies. It also exchanges valuable experiments in this multidisciplinary field by renowned research scientists.

Green Village and Town Construction in China Xiaoming Wang, Hong Hua, 2021-05-27. By means of multidisciplinary research on urban and rural planning, construction engineering, environmental engineering and engineering sociology, this book conducts pioneering research on the construction theory, construction methods, evaluation, technology and application of demonstration projects in China's green villages and towns. The book is divided into three parts and eleven chapters. Part I is about the theory and development of green village and town construction, including the theory and innovation, the evolution and development, the patterns and mechanisms, and the community of green village and town construction. Part II is about the planning and construction methods of green villages and towns, including the plan compilation, the environmental infrastructure construction and the construction and renovation of green buildings in villages and towns. Part III is about the evaluation of the planning and construction of green villages and towns, including the evaluation of plans, the evaluation of environmental infrastructure construction, the evaluation of green building construction and the comprehensive evaluation of the planning and construction of green villages and towns. Today, 564 million farmers live in 28,500 towns and 2,452 million villages in China. In 2018 alone, 820 million m² of new houses were built in rural areas. This proves that China's green village and town construction has great significance and can provide enlightenment to developing countries and even to the world. The book describes new theories, new perspectives and new methods of green village and town sustainable construction in China for overseas experts and readers.

The Economics of Green Growth Shunsuke Managi, 2015-06-05. The Economics of Green

Growth investigates the possibility of creating an integrated indicator covering three pillars of sustainable development economy society and the environment The excessive pursuit of economic efficiency has resulted in severe environmental problems such as climate change and biodiversity loss and societal human issues such as inequality and disparity The book aims to change the direction of economic growth towards one which is more sustainable It explores beyond the conventional indicator the GDP that measures economic growth and human well being It also introduces new indicators relevant to sustainable development and a green economy and discusses the key issues for these indicators Green Growth Gareth Dale,Manu V. Mathai,Jose A. Puppim de Oliveira,2016-02-15 The discourse of green growth has recently gained ground in environmental governance deliberations and policy proposals It is presented as a fresh and innovative agenda centred on the deployment of engineering sophistication managerial acumen and market mechanisms to redress the environmental and social derelictions of the existing development model But the green growth project is deeply inadequate whether assessed against criteria of social justice or the achievement of sustainable economic life upon a materially finite planet This volume outlines three main lines of critique First it traces the development of the green growth discourse quaideology It asks what explains modern society s investment in it why has it emerged as a master concept in the contemporary conjuncture and what social forces does it serve Second it unpicks and explains the contradictions within a series of prominent green growth projects Finally it weighs up the merits and demerits of alternative strategies and policies asking the vital question if not green growth then what

Export Product Quality, Renewable Energy, and Sustainable Production Umer Shahzad,Gagan Deep Sharma,Lianbiao Cui,John Mendy,2023-09-12 Economic development has long been acknowledged for its beneficial effects on human well being In the context of economic globalization and vertical specialization increasing the quality of export products is more critical and necessary to export success and sustainable development The product s quality is inextricably linked to its manufacture and production which need various types of energy and raw materials Meanwhile the adoption of more environmentally friendly and cleaner energy sources contributes to the achievement of sustainable production Therefore product quality may provide a new perspective from which to investigate the systematic relationship between greener and renewable energy sources sustainable production and environmental regulations as well as the nature of export competitiveness Generally export product quality has referred to the quality of manufactured products within the product lines Quality refers to the relative price of a country s varieties within their respective product lines Product sophistication assesses the composition of the aggregate exports Different varieties of same product as per quality level are being produced by several developing and emerging economies Within any given product line quality converges both conditionally and unconditionally to the world s benchmark increases in institutional quality and human capital are associated with faster quality upgrading In turn faster growth in quality is associated with more rapid output growth
