Green Infrastructure Finance Leading Initiatives And Research World Bank Studies:

Green Infrastructure Finance Aldo Baietti, 2012 Increasing concerns over the effects of climate change have heightened the importance of accelerating investments in green growth The International Energy Agency for example estimates that to reduce carbon dioxide emissions by 50 percent by 2050 global investments in the energy sector alone will need to total US 750 billion a year by 2030 and over US 1 6 trillion a year from 2030 2050 Despite global efforts to mobilize required capital flows the investments still fall far short Bloomberg New Energy Finance argues that by 2020 investments will be US 150 billion short from the levels required simply to stabilize CO2 emissions For the East Asia and Pacific region alone the World Bank study Winds of Change suggests that additional investments of US 80 billion a year over the next two decades are required Multiple factors affect green investments often rendering them financially not attractive Private investment flows therefore depend on public sectors interventions and support As in many countries public sector resources are scarce and spread across many competing commitments they need to be used judiciously and strategically to leverage sufficient private flows Many governments however still lack a clear comprehensive framework for assessing green investment climate and formulating an efficient mix of measures to accelerate green investments and are unfamiliar with international funding sources that can be tapped To address this challenge the World Bank with support from AusAID conducts the work on improving the financing opportunities for green infrastructure investments among its client countries This activity attempts to identify practical ways to value and monetize environmental externalities of investments and improve the promotion and bankability of green projects This research report as a key step in this activity provides a structured compendium of ongoing leading initiatives and activities designed to accelerate private investment flows in green growth It summarizes current investment challenges of green projects as well as proposed solutions financing schemes and instruments and initiatives that have set the stage for promoting green growth The results of this work are intended to benefit the international community and policymakers who are seeking to deepen their knowledge of green investment environment In addition it is hoped that this work will be useful to practitioners including fund managers and investors seeking to have a better understanding of current trends global initiatives and available funding sources and mechanisms for financing green projects

Green Infrastructure Finance Aldo Baietti, Andrey Shlyakhtenko, Roberto La Rocca, Urvaksh D. Patel, 2012-04-18 This report is a structured compendium of leading initiatives and activities put forward to accelerate private investment flows in green growth It summarizes current investment challenges of green projects as well as proposed solutions financing schemes and initiatives that have set the stage for scaling up green infrastructure investments

Green Infrastructure Finance The World Bank, 2012-06-06 This report builds on the conclusions of the Green Infrastructure Finance Leading Initiatives and Research report and lays out a simple and elegant way in which scarce public financing can leverage market interest in greening infrastructure particularly in the East Asia and Pacific Region

Agricultural Innovation Systems The World Bank, 2012-02-21 Managing the ability of agriculture to meet rising global demand and to respond to the changes and opportunities will require good policy sustained investments and innovation not business as usual Investments in public Research and Development extension education and their links with one another have elicited high returns and pro-poor growth but these investments alone will not elicit innovation at the pace or on the scale required by the intensifying and proliferating challenges confronting agriculture Experience indicates that aside from a strong capacity in Research and Development the ability to innovate is often related to collective action coordination the exchange of knowledge among diverse actors the incentives and resources available to form partnerships and develop businesses and conditions that make it possible for farmers or entrepreneurs to use the innovations While consensus is developing about what is meant by

innovation and innovation system no detailed blueprint exists for making agricultural innovation happen at a given time in a given place for a given result The AIS approach that looks at these multiple conditions and relationships that promote innovation in agriculture has however moved from a concept to a sub discipline with principles of analysis and action AIS investments must be specific to the context responding to the stage of development in a particular country and agricultural sector especially the AIS This sourcebook contributes to identifying designing and implementing the investments approaches and complementary interventions that appear most likely to strengthen AIS and to promote agricultural innovation and equitable growth It emphasizes the lessons learned benefits and impacts implementation issues and prospects for replicating or expanding successful practices The information in this sourcebook derives from approaches that have been tested at different scales in different contexts It reflects the experiences and evolving understanding of numerous individuals and organizations concerned with agricultural innovation including the World Bank This information is targeted to the key operational staff in international and regional development agencies and national governments who design and implement lending projects and to the practitioners who design thematic programs and technical assistance packages The sourcebook can also be an important resource for the research community and nongovernmental organizations NGOs
