

CHANGING CRANKCASE OIL

Fig. 1—Removing Drain Plug

Remove drain plug and allow oil to drain into container, Figure 1.

NOTE: The best time to drain crankcase is after a day's operation when the oil is hot. Dirt and foreign material in the crankcase is in suspension and is easier to drain out.

Fig. 2—Dipstick and Filler Tube

After the oil is drained, install drain plug and add 2-1/2 pints of the proper viscosity oil through filler tube, Figure 2. Check dipstick and add another half-pint if dipstick reading indicates necessity.

CHANGING TRANSMISSION OIL AND FILTER

Fig. 3—Changing Transmission Oil

1. Remove transmission drain plug and drain all oil, Figure 3.

2. Unscrew and discard oil filter. *NOTE: If removal is difficult, a filter removal tool can be used.*

3. Remove strainer inside drain plug hole. *NOTE: The strainer is a friction fit to the intake oil line inside the transmission. Only the end of the strainer is visible through the drain plug hole. Remove with a needle nose pliers, being careful not to bend strainer.*

4. Wash strainer in a safe solvent and replace. Be certain strainer fits over oil line inside transmission. When properly inserted, strainer will fit tight on the oil line. Clean, replace and tighten magnetic drain plug.

5. Lightly oil the rubber gasket on the oil filter connection. Install a new John Deere AM31305 oil filter.

IMPORTANT: Tighten filter only hand tight.
