

Fuel System.

Both gasoline and All-Fuel tractors are available.

These tractors are equipped with a dual-induction carbureting system using a gravity-fed, natural-draft, dual intake carburetor and individually ported valves. Some early All-Fuel tractors used a natural-draft, single intake carburetor. The All-Fuel tractor has two fuel tanks—a large tank for fuel and a small auxiliary tank for gasoline which is used when starting the All-Fuel engine.

An oil-wash air cleaner assures clean air for the engine.

Ignition.

The tractor has a battery-distributor type ignition system with automatic spark advance. A 12 volt battery, generator, starter and lights are standard equipment. The lights consist of two front lights which can be made bright or dim, and a rear combination white and red warning light.

Cooling System.

The engine is water cooled. The cooling system includes a centrifugal-type water pump and a thermostatically controlled shutter.

Clutch.

A dry disk, hand operated clutch is enclosed within the belt pulley. The clutch contains four 7-inch dry disks. It is engaged by the clutch lever and rotates at crankshaft speed. When the clutch is disengaged, an adjustable pulley brake prevents pulley rotation.

Transmission and Differential.

The transmission lies crosswise in the main case. Shifting through the entire range of six forward speeds and one reverse speed is accomplished by one shift lever.

The differential is of the conventional type with a ring gear and spider driven directly by a pinion in the transmission.
