Language, Space and Mind Paul Anthony Chilton, 2014-07-01 A new approach to linguistic meaning and grammatical constructions based on simple geometric principles *Language, Space and Mind* Paul Chilton, 2014 A new approach to linguistic meaning and grammatical constructions based on simple geometric principles **Language, Space and Mind** Paul Chilton, 2014-07-10 The idea that spatial cognition provides the foundation of linguistic meanings even highly abstract meanings has been put forward by a number of linguists in recent years This book takes this proposal into new dimensions and develops a theoretical framework based on simple geometric principles All speakers are conceptualisers who have a point of view both in a literal and in an abstract sense choosing their perspective in space time and the real world The book examines the conceptualising properties of verbs including tense aspect modality and transitivity as well as the conceptual workings of grammatical constructions associated with counterfactuality other minds and the expression of moral force It makes links to the cognitive sciences throughout and concludes with a discussion of the relationship between language brain and mind **Language, Space and Mind** Paul Chilton, 2014-07-10 A new approach to linguistic meaning and grammatical constructions based on simple geometric principles The Stylistics of Embodiment Anne Holm, 2025-01-22 This book presents a stylistic framework for analysing embodiment in lyric texts While the assumption that our minds are embodied underlies most approaches in cognitive stylistics and beyond a systematic account of the linguistic patterns through which the body may be manifested in poetic expression has not yet been provided Aiming to fill this gap the book focuses on contemporary lyric texts that prominently engage the senses in depicting past experiences Drawing its tools mainly from Cognitive Grammar and research on conceptual metaphors and iconicity the book investigates how sensory language gives rise to simulated embodied responses In doing so the book views poetic expression as a complex interplay of modalities and seeks to expand the concept of the lyric by incorporating digital poetry song lyrics performance poetry and lyrical prose among its case studies The book furthermore brings in current cognitive scientific research on the workings of memory to the analysis of sensory memory most centrally the psychological phenomenon of mental time travel It will be of interest to students and scholars working on stylistics literary studies and multimodal and intermedial studies **The Discourse of Conflict and Crisis** Piotr Cap, 2021-10-21 This book explores the linguistic patterns of conflict crisis and threat generation in Polish political rhetoric that have been at the heart of state level policies since the Law and Justice PiS Party came to power in October 2015 Analysing a vast corpus of speeches statements and remarks by prominent Law and Justice Party politicians this book sheds light on internal parliamentary and presidential discourse against opponents of the government before widening its lens to Poland's strained relations with the EU regarding refugee distribution and immigration Drawing on theories from contemporary critical discourse studies and critical cognitive pragmatics the book shows how the crisis conflict and threat elements in these discourses produce public coercion and strengthen the Party's leadership Piotr Cap extends his

argument further to examine discursive examples from Hungary Romania Bulgaria Austria Italy and the UK highlighting the correlation between the Law and Justice Party and broader socio political and rhetorical trends in contemporary Europe The result is an authoritative panorama of the mutual dependencies and shared discursive strategies of European right wing groups
