Fashioning the Self: Identity and Style in British Culture Emily Priscott,2023-06-06 Fashioning the Self Identity and Style in British Culture offers an eclectic approach to contemporary fashion studies Taking a broad definition of British culture this collection of essays explores the

significance of style to issues such as colonialism race gender and class embracing topics as diverse as eighteenth century portraiture literary dress culture and Edwardian working class glamour Examining the emblematic power of garments themselves and the context in which they are styled this work interrogates the ways that personal style can itself decontextualize garments to radically reframe their meanings Using an intentionally eclectic range of subjects from an interdisciplinary perspective this collection builds on the work of theorists such as Aileen Ribeiro Vika Martina Plock Cheryl Buckley and Hilary Fawcett to examine the social significance of personal style while also highlighting the diversity of British culture itself **Madras** India Census Division,1967 **Census of India, 1961** India.
