Green Restorations Sustainable Building And Historic Homes:

Green Restorations Aaron Lubeck, 2010-01-01 Some 40 percent of North Americans live in homes built prior to 1940 and when it comes time to remodel or restore our older homes homeowners and contractors can find themselves lost in a morass of wildly divergent information and opinion With *Green Restorations* author Aaron Lubeck brings his expertise as a restoration contractor and preservation consultant to this first of its kind guide leading the reader through the steps for restoring historic building using sustainable practices and green building techniques In a readily accessible room by room and system by system format *Green Restorations* covers rehabilitation and remodeling questions applicable to old homes focusing on the core techniques and debates often seen in practice Here you ll find the answers to restoration questions such as Is sealing my old crawl space a good idea Should I replace or rehabilitate my windows Are there historic aspects of my home I need to preserve and what can I change What are the cultural environmental and financial implications of my proposed changes Do residential historic tax credits apply to my home and how can I access them Written in such a way as to be accessible for homeowners but technical enough for contractors this book will appeal to anyone trying to green an older home while preserving its historic and cultural significance *Sustainable Heritage* Amalia Leifeste, Barry L.

Stiefel, 2018-06-14 This book brings together ecological conservation theory and heritage preservation theory and shows how these two realms have common purpose Through theoretical discussion and illustrative examples *Sustainable Heritage* reframes the history of multiple movements within preservation and sustainable design strategies into cross disciplinary themes Through topics such as Cultural Relationships with Nature Ecology Biodiversity Energy and Resource Systems Integrating Biodiversity into the Built Environment Rehabilitation Practice Fixing the Shortcomings Within Community Design Planning and Policy Strategies for Adapting Buildings and Structures for Rising Sea Levels and Vehicles as a Microcosm of Approaching Built Environment Rehabilitation the book explores contemporary ecological and heritage ethics as a strategy for improving the livability of the built environment The authors provide a holistic critique of the challenges we face in light of climate and cultural changes occurring from the local to the global level It synthesizes the best practices offered by separate disciplines as one cohesive way forward toward sustainable design The authors consider strategies for increasing the physical and cultural longevity of the built environment why these two are so closely paired and the potential their overlap offers for sustained and meaningful inhabitation *Sustainable Heritage* unites students and professionals in a wide range of disciplines with one common language and more closely aligned sets of objectives for preservation and sustainable design *The Past and Future City* Stephanie Meeks, Kevin C. Murphy, 2016-10-04 At its most basic historic preservation is about keeping old places alive in active use and relevant to the needs of communities today As cities across America experience a remarkable renaissance and more and more young diverse families choose to live work and play in historic neighborhoods the promise and potential of using our older and historic buildings to revitalize our cities is stronger

than ever This urban resurgence is a national phenomenon boosting cities from Cleveland to Buffalo and Portland to Pittsburgh Experts offer a range of theories on what is driving the return to the city from the impact of the recent housing crisis to a desire to be socially engaged live near work and reduce automobile use But there s also more to it Time and again when asked why they moved to the city people talk about the desire to live somewhere distinctive to be some place rather than no place Often these distinguishing urban landmarks are exciting neighborhoods Miami boasts its Art Deco district New Orleans the French Quarter Sometimes as in the case of Baltimore s historic rowhouses the most distinguishing feature is the urban fabric itself While many aspects of this urban resurgence are a cause for celebration the changes have also brought to the forefront issues of access affordable housing inequality sustainability and how we should commemorate difficult history This book speaks directly to all of these issues In *The Past and Future City* Stephanie Meeks the president of the National Trust for Historic Preservation describes in detail and with unique empirical research the many ways that saving and restoring historic fabric can help a city create thriving neighborhoods good jobs and a vibrant economy She explains the critical importance of preservation for all our communities the ways the historic preservation field has evolved to embrace the challenges of the twenty first century and the innovative work being done in the preservation space now This book is for anyone who cares about cities places and saving America s diverse stories in a way that will bring us together and help us better understand our past present and future

The Greened House Effect Jeff Wilson, 2013-05-24 With greater public awareness of the need for energy independence the issue of how we can make our existing homes more resource efficient is becoming ever more critical Residential buildings make up a large fraction of our energy needs largely due to heating and air conditioning So it s no longer enough to simply do the small stuff like switching to compact fluorescent bulbs or turning down the thermostat at night In *The Greened House Effect* author Jeff Wilson brings his twenty five years of construction experience and knowledge of home building to bear on making our current houses cleaner greener and healthier Think of a deep energy retrofit DER as a home makeover one that represents a significant investment but that saves money from the get go by capturing the energy you drop on the ground every month every year through inefficiency poor design or simply living in a typical older home Using his own family s DER of their 1942 home as a prime example Wilson weaves a readable narrative at a practical hammer and nail level He presents the solutions to our building and energy problems making them seem possible for average homeowners and small contractors by offering the right set of information skills and materials More technical information is presented in sidebars and graphs and numerous color photos illustrate the process including Testing the energy efficiency of your home and learning where improvements need to be made Issues of local building codes and regulations Financing and paying for a DER Major components of the DER such as roofs exterior walls basements and home systems Wilson s building experience along with his lifelong passion for energy issues all come together to form an inspirational can do approach to making our neighborhood our community our nation and our world a better place one home
