Greening Libraries:

Greening Libraries Monika Antonelli, Mark McCullough, 2012 It is difficult to turn on the television or read a news story today without learning about how green and sustainable practices are being implemented throughout society Libraries are not exempt from these broader trends In some cases libraries and librarians have been at the forefront of these efforts *Greening Libraries* provides library professionals with a collection of articles and papers that serve as a portal to understanding a wide range of green and sustainable practices within libraries and the library profession The book's articles come from a variety of perspectives on a wide range of topics related to green practices sustainability and the library profession *Greening Libraries* offers an overview of important aspects of the growing green library movement including but not limited to green buildings alternative energy resources conservation green library services and practices operations programming and outreach

Exploring Digital Metrics in Academic Libraries Thanuskodi, S., 2025-01-09 As academic libraries evolve in the digital age the need for effective data collection and analysis has become increasingly important in assessing their impact and enhancing their services *Exploring digital metrics in academic libraries* involves leveraging technology to track and measure a variety of activities from resource usage and user engagement to the effectiveness of digital collections and services These metrics provide valuable insights into how students faculty and researchers interact with library resources enabling libraries to make data driven decisions that improve access support learning and optimize operations By embracing digital metrics academic libraries can not only demonstrate their value to stakeholders but also adapt to the changing needs of the academic community in an increasingly digital world *Exploring Digital Metrics in Academic Libraries* discusses the changes needed to transform libraries and information science education and training It explores avenues to adopt implement and utilize the emerging digital library and all other available new technologies and their applications in library systems models policies and mechanisms This book covers topics such as cloud computing higher education and smart technology and is a useful resource for computer engineers librarians data scientists academicians and researchers

Going Green: Implementing Sustainable Strategies in Libraries Around the World Petra Hauke, Madeleine Charney, Harri Sahavirta, 2018-10-08 This publication examines aspects of reducing the ecological footprint in libraries workaday operations as well as the social role and responsibility of libraries as leaders in environmental sustainability The theoretical background and practical applications of contributions made by worldwide libraries to the United Nations 2030 Sustainable Development Goals SDGs are discussed General articles and research studies from Finland Germany Portugal and Brazil illuminate libraries contributions to the SDGs Case studies from Sweden Kenya Germany Ukraine China and Serbia highlight challenges and opportunities in implementing sustainable approaches in public libraries Examples of best practice from academic libraries in Hong Kong Cameroon Germany Uganda USA and Kenya are presented All papers published in this book are selected from the best papers of the ENSULIB Satellite Meeting 2017 in Berlin the

ENSULIB Public Libraries Section's Open Session at the IFLA Conference 2017 in Poland and from the IFLA Green Library Award 2017 All articles are written in English

Libraries Driving Education for Sustainable Development Petra Hauke, Antonia Mocatta, Priscilla Nga Ian Pun, 2025-06-02 The book refers to the UNESCO's ESD for 2030 education program Libraries especially green and sustainable libraries deserve prominent recognition as learning institutions and active driving partners for Education for Sustainable Development and which support their governments sustainability efforts In line with the Berlin Declaration on ESD and the UNESCO program the book focuses on innovative approaches and informal education projects created and provided by green and sustainable libraries

New Libraries in Old Buildings Petra Hauke, Karen Latimer, Robert Niess, 2021-06-21 This book focuses on difficulties and opportunities in revitalization of old derelict or abandoned buildings into a library and investigates the transformation of buildings which originally had a different purpose The publication shows worldwide best practice examples from different types of libraries in historic environments both urban and rural while maintaining a focus on sustainability concerning the architecture and interior design

The Changing Landscape for the Libraries and Librarians : Issues & Challenges Dr DD Lal, 2022-03-11 A smart library is an information center with networks of many libraries and their services in a larger informational ecosystem around the globe The Libraries are adding new digital resources and services while maintaining most of the old traditional resources and services Now the role of libraries information services the relationship between a library and users is changing significantly Traditional services of a library are modified and enhanced in an online environment The proposed book emphasizes the importance for a library to be flexible to changing needs and to adopt new technologies rapidly With the emergence of new technologies the traditional library acting as a medium for sharing information needs an integral refinement in its processes This transformation will bring in efficiency and minimize human error in the processes with the help of smart gates material location finders and smart check out booths to automate the processes of controlling access locating items as well as issuing returning of materials The smart library focuses on the use of technology in a library and is designed to be a very collaborative learning environment where participants are encouraged to contribute ideas and information Smart library improves traditional and non traditional library services improve users library experience and enhance opportunities for students learning Libraries are facing increased expectations from users and challenges of developing technologies including Web 2.0 Web 3.0 ebooks digitations and a problem of archiving digital content Webbased technology provides users and information professionals with powerful and flexible tools for information dissemination

Libraries and Sustainability René Tanner, Adrian K. Ho, Monika Antonelli, Rebekkah Smith Aldrich, 2021-11-08 Library workers at all types of organizations as well as LIS students learning about this newest Core Value of Librarianship will find this book an easy to digest introduction to what staff at a range of libraries have accomplished in incorporating sustainability into their decision making and professional practices In addition a discussion about the role of economics and sustainability will challenge readers to

stretch in new ways to positively impact their communities As a core value of librarianship sustainability is not an end point but a mindset a lens through which operational and outreach decisions can be made And it extends beyond an awareness of the roles that libraries can play in educating and advocating for a sustainable future As the programs and practices in this resource demonstrate sustainability can also encompass engaging with communities in discussions about resilience regeneration and social justice Inspiring yet assuredly pragmatic the many topics explored in this book edited by members of ALA s Sustainability Round Table and ALA s Special Task Force on Sustainability include a discussion of why sustainability matters to libraries and their user communities real life examples of sustainability programming transformative community partnerships collective responses for climate resilience and green building practices lessons learned and recommendations from library workers who have been active in putting sustainability into practice the intersection of sustainability with the work of equity diversity and inclusion suggestions regarding the revision of library and information science curriculum in light of the practical need to build community resilience an examination of how libraries efforts to support Doughnut Economics can bolster the United Nations work on the Sustainable Development Goals which seek to address the global impacts of climate change and potential collaborators for future sustainability related initiatives Information Literacy: Lifelong Learning and Digital Citizenship in the 21st Century Serap Kurbanoglu, Sonja Spiranec, Esther Grassian, Diane Mizrahi, Ralph Catts, 2014-12-13 This book constitutes the refereed proceedings of the European Conference on Information Literacy ECIL 2014 held in Dubrovnik Croatia in October 2014 The 93 revised full papers presented together with two keynotes and one invited paper were carefully reviewed and selected from 283 submissions The papers are organized in topical sections on theoretical framework related concepts research rights and ethics children higher education education and instruction assessment and evaluation libraries different aspects **The Green Library Planner** Mary M. Carr, 2013-09-11 Green buildings are better buildings In fact buildings use 36% of the energy in the United States according to the Environmental Protection Agency so green buildings that use less energy help to address the very real challenges of reliance on fossil fuel and climate change More than only being environmentally responsible green libraries are beautiful cost effective high performance buildings that enhance occupant health and comfort The Green Library Planner is designed for members of library building design teams who typically are not actively engaged in architecture construction or engineering but who need an introduction to the rationale for green buildings the elements of green building and the language of the field It will be equally useful for public officials boards or administrators who are considering a new green library building a renovated library structure or sustainable elements for a current library facility Mary M Carr a library director who is also a LEED Accredited Professional with national certification first introduces the basic tenets of green building She then covers the gamut of green building from design through all phases of construction or renovation to operations and maintenance Chapter highlights include Fundamentals of Sustainable Building The Importance of Place Energy and Lighting Indoor

Environmental Quality Water Conservation and Quality Sustainable Construction Management Techniques Commissioning Sustainable Operations and Maintenance With this information the librarian and related library staff and administrators will be able to design build or renovate and operate the library in the best way possible while considering the environmental and economic challenges faced locally and globally in the 21st century

Transforming Libraries, Building Communities
 Julie Biando Edwards, Melissa S. Robinson, Kelley Rae Unger, 2013-05-30 This book is for those moving their library beyond places to find information Written by practicing public librarians and an academic librarian with an interest in public libraries the book focuses on how public libraries can become more community centered and by doing so how they can transform both themselves and their communities The authors argue that focusing on building community through innovative and responsive services and programs will be the best way for the public library to reposition itself in the years to come Repositioning the library acknowledges that information is in abundance in contemporary life And while accessing information will always be at the heart of what libraries do it isn't the only thing they do It may not be in the future even the most important thing that they do This book encourages librarians to admit that our role has evolved and to reframe the discussion so that it is about what we actually can do play an essential role in meeting community needs and building strong and vibrant local communities The authors argue that repositioning libraries as community centered institutions is a responsibility Libraries bring people together They create community and they also create mini communities everything from book groups to writing circles to new citizen groups to linguistic or ethnic communities reflected in programming and in collections These mini communities help provide fellowship and foster relationships amongst the group members but also because they exist in the public place that is the library help the larger community recognize and learn about the mini communities that create the larger community This is the work of libraries The book is divided into three parts which include explorations into the importance of the community centered library practical advice on making your library more community centered and a showcase of community centered library programs services and initiatives across the United States A special focus of the book is on how community development literature and practice can inform librarianship with an emphasis on Asset Based Community Development principles The book looks at how community centered libraries build individual and community assets and how in doing so they serve as essential community anchors and institutions

Transformation Of Knowledge In The Digital Age Environment Through Library
 Dr. D. D. LAL, Ms. Yogita Talwar, Prof. Manoj Kumar Sinha, 2022-04-28 The proposed book emphasizes importance for a library to be flexible to changing needs and to adopt new technologies rapidly If a library of today wants to achieve success it must offer high quality service the best possible satisfaction of requirements and exhibit great flexibility in its activity In order to achieve all these goals it is necessary to attract specialists of a library to solving common problems Today people get their information online often filtered through for profit platforms If a book isn't online it's as if it doesn't exist Yet much of modern knowledge still exists only on the

printed page stored in libraries Libraries haven't met this digital demand stymied by costs e-book restrictions policy risks and missing infrastructure We now have the technology and legal frameworks to transform our library system The Internet Archive working with library partners proposes bringing millions of books online through purchase or digitization starting with the books most widely held and used in libraries and classrooms With the emergence of new technologies the traditional library acting as a medium for sharing information needs an integral refinement in its processes This transformation will bring in efficiency and minimize human error in the processes with the help of smart gates material location finder and smart check out booth to automate the processes of controlling access locating items as well as the issuing returning of materials However the changeover to a smart library system might face several challenges like for instance the cost of implementing numerous high frequency RFID readers at prime locations in the library Another crucial challenge of this system will be the limitation of the equipment to achieve a more performing system Highly sophisticated equipment will be required which will largely affect the cost Smart library focuses on use of technology in a library and is designed to be very collaborative learning environment where participants are encouraged to contribute ideas and information Smart library improves traditional and non traditional library services improves users library experience and enhances opportunities for students learning Libraries are facing increased expectations from users and challenge of developing technologies including Web 2.0 e-books digitations and a problem of archiving digital content Web based technology provides users and information professionals with powerful and flexible tools for information dissemination

The Translational Design of Universities, 2019-08-12 Whilst schools are transforming their physical and virtual environments at a relatively glacial pace in most countries across the globe universities are under extreme pressure to adapt to the rapid emergence of the virtual campus Competition for students by online course providers is resulting in a rapidly emerging understanding of what the nature of the traditional campus will look like in the 21st century The blended virtual and physical technology enabled hybrid learning environments now integrate the face to face and online virtual experience synchronously and asynchronously Local branch campuses are emerging in city and town centres and international branch campuses are growing at a rapid rate There is increasing pressure at various levels i.e. the city the urban and the campus to create formal and informal learning spaces as well as re-purposing the library and social or third spaces Many new hybrid campus developments are not based on any form of rigorous scholarly evidence The risk is that many of these projects may fail In taking an evidence based approach this book seeks to align with the model of translational research from medical practice using a modified translational design approach The majority of the chapter material comes from the scholarly work of doctoral graduates and their dissertations This book is the second in a series on the evidence based translational design of educational institutions with the first volume focussing on schools This volume on Higher Education covers the city to the classroom and those elements in between It also explores what the future might look like as judgements are made about what works in campus planning and design in our rapidly
