**Light Tanks M5/M51** Terry Gander, 2004 The light tank M5 and the M5A1 were the ultimate developments of the US light tank family that saw service during World War II This book contains information on markings camouflage and variants as well as its battle history and military record

**Light Tanks** Mikhail Baryatinskiy, 2006 It is one of the ironies of Soviet tank development that a country opposed to free enterprise and capitalism was largely reliant on influences from Britain and the USA for many of its early designs However unhindered by many of the tactical constraints that affected tank development in the West the Red Army was able to acquire and develop technology that was under rated in both Britain and the USA From Britain the famous manufacturer Vickers produced a Six Ton light tank effectively rejected by the War Office one example was acquired by the Russians and this formed the basis of the Russian T 26 of 1931 Further British designs also influenced the later light tanks equipment which was pivotal to the Red Army during its campaigns in Manchuria Finland and against the initial German assault in 1941 In the USA Walter Christie was also largely ignored as a designer but as with Vickers his designs came to be highly important His influence was seen in the BT short for Bystrochodri or Fast Tank series of light medium tanks that was first introduced in 1932 The BT series saw service in Spain Manchuria Finland and in the defense of Russia itself in 1941 The critical aspect of the Christie design was that the vehicles were capable of operating both with nor without tracks in the latter case eight road wheels carried the weight of the vehicle with steering being achieved via a steering wheel acting in conjunction with the clutch brake system In the second of the new Soviet Tanks series Mikhail Baryatinsky provides the reader with a comprehensive account of the development and operational record of Soviet light tanks Utilizing photographs line drawings and speciallyprepared artworks he provides a detailed portrait of these highly successful tanks Aimed at the modeler military historian and war gamer the new Soviet Tanks series is designed to provide probably for the first time in the English language authoritative information on the classic Soviet tank designs of the 20th century The series will be required reading for all those interested in the development of armored warfare over the past 100 years

**Sheridan** R. P. Hunnicutt, 2015-09-15 This installation in R P Huunnicutt s legendary 10 volume history of American tanks and armored vehicles provides a detailed survey of the American light tank s developmental history culminating with the M551 Sheridan AR AAV and the vehicles based on its design In the period directly after WWII the Army became interested in developing a light tank Hunnicutt begins by detailing the program that eventually produced the M41 series of 76mm gun tanks that were designed to fulfill this interest At 25 tons the M4 was considered to be too heavy in spite of its popularity with the troops that operated it Programs developed in an effort to produce a lighter weight tank resulted in the T71 and T92 tanks both of which retained the 76mm gun and weighed in at about 17 tons However once it was discovered that Soviet tanks of the same caliber were amphibious the T92 was scrapped to redirect design efforts to an amphibious light tank This new program produced the XM551 Sheridan no longer designated as a tank but rather as an

armored reconnaissance airborne assault vehicle or AR AAV for short An extremely complex design the M551 Sheridan AR AAV was plagued by problems with its weapons system in its early stages The vehicle required a great deal of frequent maintenance which made it unpopular with troops regardless of the fact that it provided a wide range of services It was phased out of service in the late 1970s Part III of this book covers the development of a future replacement for the Sheridan Part IV covers several other light tracked combat vehicles Boasting dozens of detailed illustrations line drawings and photographs as well as the depth precision and nuance for which R P Hunnicutt s books are renowned Sheridan A History of the American Light Tank is a must have for anyone with a keen interest in American military history Readers interested in related titles from R P Hunnicutt will also want to see Abrams ISBN 9781626542556 Armored Car ISBN 9781626541559 Bradley ISBN 9781626542525 Half Track ISBN 9781626541320 Patton ISBN 9781626548794 Pershing ISBN 9781626541672 Sherman ISBN 9781626548619 Stuart History of the American Light Tank Vol 1 ISBN 9781626548626 Firepower ISBN 9781635615036 **Sheridan** R. *M24 Chaffee Light Tank Technical Manual: TM 9-729* Department of the Army, 2013-08 The Light Tank M24 was an American tank used during the later part of World War II and in postwar conflicts including the Korean War and with the French in the War in Algeria and the First Indochina War In British service it was given the service name Chaffee after the United States Army General Adna R Chaffee Jr who helped develop the use of tanks in the United States armed forces In

April 1943 the Ordnance Corps together with Cadillac division of General Motors started work on the new project designated Light Tank T24 Every effort was made to keep the weight of the vehicle under twenty tons The armor was kept light with the glacis plate only twenty five mm thick but sloped at sixty degrees from the vertical A new lightweight 75 mm gun was developed a derivative of the gun used in the B 25H Mitchell bomber The gun had the same ballistics as the M3 but used a thinly walled barrel and different recoil mechanism The design also featured wider sixteen inch tracks and torsion bar suspension It had a relatively low silhouette and a three man turret On October 15 1943 the first pilot vehicle was delivered and production began in 1944 under the designation Light Tank M24 By the time production was stopped in August 1945 4 731 M24s had left the assembly lines Created in 1951 this technical manual reveals a great deal about the Chaffee s design and capabilities Intended as a manual for those charged with operation and maintenance it details many aspects of its engine cooling power and other systems Originally labeled restricted this manual was declassified long ago and is here reprinted in book form Care has been taken to preserve the integrity of the text M24 Chaffee Light Tank 1943-85 Steven J. Zaloga,2022-02-17 The history of US light tanks during World War II is a chequered one The Light Battalions of US Armored Divisions were initially filled with M3A1 and M5 Stuart tanks however on the battlefields of North Africa it was realised that these were disastrously under armoured and gunned and a replacement or the abandonment of light tank doctrine was desperately needed It wasn t until the last few months of WWII that the M24 Chaffee came into service and it was extensively used in combat from the Battle of the Bulge to the final campaigns in Germany This book will trace the history of this design its combat record in World War II its many variants and its extensive combat record post 1945 M5 Stuart Light Tank Crew Manual War Department,2011-08-01 The Light Tank M3 and M5 known as the General Stuart was the first tank used by American forces in armored combat during WWII Like its predecessor the M2A4 the Stuart was armed with a 37mm M5 main gun It also carried up to five Browning machine guns and 7500 rounds of ammunition The M3 version sported radial aero engines replaced in the M5 with smoother cooler twin Cadillac automobile engines The M5 also featured improved sloped armor and had the driver s hatches moved up top In the European Theater where enemy armored vehicles were plentiful the Stuart s weak main gun meant that it served primarily in cavalry and infantry support roles In the Pacific where enemy armor was less of a threat and close support was a necessity the Stuart s maneuverability proved a valuable asset Over 25 000 Stuarts and variants were produced during the war and they eventually served in the armies of over thirty countries including the Soviet Union India and Republic of China Army A few continue in active service military today Intended as a general purpose manual for the platoon leader tank commander and crew this 1944 War Department FM 17 68 field manual shows how to achieve efficient execution of mounted and dismounted action and precision and speed in service of the weapon Originally restricted this manual was declassified long ago and is here reprinted in book form Care has been taken to preserve the integrity of the text **America's Light Tanks 1934-1941** Charles Lemons,2025-01-14 This book

covers the little studied history and use of American light tanks between the two World Wars The M1 series Combat Car and the M2 series light tanks were the only service tanks built solely by and for the U S Army Although nearly obsolete by the beginning of World War II they still served in a training capacity for thousands of armor soldiers in 1941 1943 Their final service to the nation was to serve as hard targets for the tanks that followed in their footsteps Inside this book is a short history of their development photographs of them in use and descriptions pictures and drawings of the tactical markings of the units that utilized these vehicles to the eve of World War II **US Light Tanks, 1944 - 84** Steven J. Zaloga,1987

*Handbook on M2A4 and M3 Light Tanks* ,1941 **M3 & M5 Stuart Light Tank 1940-45** Steven J. Zaloga,2022-04-28 The M3 and M5 family of light tanks were the culmination of American tank development of the 1930s By the time of the outbreak of the World War II they were approaching obsolescence as tank forces in Europe were shifting from light to medium tanks as the main element of their armored forces First entering combat in the autumn of 1941 in the Western Desert with the British Army the Stuart quickly proved its inadequacies The M3 and M5 light tanks proved more suitable in the Pacific theater than in Europe and fought successfully in many of the major battles including Guadalcanal Tarawa and Peleliu This title narrates this distinctive and unusual fighting vehicle s history **T-26 in Detail** Miroslav Baric, Mike Collins, Light Tanks and Heavily Armed Combat Vehicles Youri Obrachtsov,2014-01-19 Light tanks and heavily armed combat vehicles are part of the Armored Fighting Vehicle family These armored vehicles widespread throughout the world can accomplish a number of different missions They are simple in their utilization and are extremely polyvalent This book regroups for the first time all light tanks and heavy weapons vehicles with chains or wheels from the world over and their many modernizations and modifications along with the technical characteristics of each and every model Enriched with more than 350 photos clear and methodic it reveals the history of each vehicle along with precise dates and a time table showing when they were put into service Dimensions are indicated in a practical and visual manner This handbook allows the precise identification of a light tank and a heavily armed combat vehicle from an image even partial A series of four tests will allow you to evaluate your current level and improve your knowledge on the matter Regrouping all these qualities this manual is an indispensable tool for the armed forces and everyone that has a passion for armored vehicles and military history This book was realized by a specialist in the field of identification in collaboration with manufacturers and armed forces It is the fourth volume in a series of books on military material the first volumes of which are entitled Main Battle Tanks Infantry Fighting Vehicles and Wheeled 8x8 Armored Fighting Vehicles Tanks Marsh Gelbart,1996 M5 and M5A1 Stuart Light Tank David Doyle,2006-07 Named after the Civil War general Jeb Stuart the Stuart was used by the British Army in North Africa during World War II Although the tank lacked firepower and had bad internal layout it was quick and mechanically reliable earning it the nickname Honey This title offers wartime photos of the M5A1 US Light Tank better known as the Stuart

**Italian Light Tanks CV L3/33-35-38** Luca Cristini,2022 Created in the early 1930s to provide the Italian army with a

large scale light tank the L3 remained at the forefront of armored units until 1941 Although it played an important role only in the fighting of the Ethiopian campaign and the Spanish Civil War The sardine box later was limited to anti partisan combat and support of occupation troops after the difficult start of World War II Produced in large numbers in view of the country s industrial capacity in the 1930s about 2 000 were made from 1933 until 1938 when production ceased **Light Tanks M1-M5** Chris Ellis,Peter Chamberlain,1969 Light Tanks, M1A1, M1A2, M2A1, M2A2, M2A3, M2A4, M3 United States. War Department,1941 **Russian Light Tank T-26** Luca Stefano Cristini,2023 The Russian T 26 was a light tank designed for infantry support produced in the Soviet Union from 1931 It did not originate as an autonomous design but was mainly derived from the British Vickers 6 ton or Vickers Type E vehicle The T 26 tanks were armed with two parallel turrets in the centre of the hull each equipped with a light machine gun The next step was to install a 27 mm or 37 mm cannon on one turret This was replaced by a 45 mm piece and this increased the armour piercing and explosive power Known as the Mod 1933 it was a great success and was produced alone in around 5 500 examples an exceptional run for the time Versions derived from the T 26 were the OT 26 flamethrower with a flamethrower instead of a cannon the OT 33 which had both the ST 26 bridge carrier to give tank divisions the necessary mobility against natural obstacles the T 26 A 4 U railing radio command tank and many others **Handbook on M2A4, M3 and M3A1 Light Tanks** ,1942
