Limdep 10 Econometric Modeling Guide:

A Land of Milk and Butter Markus Lampe, Paul Sharp, 2019-04-12 How and why does Denmark have one of the richest most equal and happiest societies in the world today Historians have often pointed to developments from the late nineteenth century when small peasant farmers worked together through agricultural cooperatives whose exports of butter and bacon rapidly gained a strong foothold on the British market This book presents a radical retelling of this story placing largely German speaking landed elites rather than the Danish peasantry at center stage After acquiring estates in Denmark these elites imported and adapted new practices from outside the kingdom thus embarking on an ambitious program of agricultural reform and sparking a chain of events that eventually led to the emergence of Denmark's famous peasant cooperatives in 1882 A Land of Milk and Butter presents a new interpretation of the origin of these cooperatives with striking implications for developing countries today

Decent rural employment in different farming systems in Sub-Saharan Africa Food and Agriculture Organization of the United Nations, 2016-06-01 This paper analyses how the relationship between decent rural employment and agricultural productivity vary across production systems The focus is on sub Saharan Africa taking Ethiopia and Tanzania

as case studies A latent class stochastic frontier approach is applied to identify different production systems and technologies for a sample of farms in the two countries Subsequently we estimate the efficiency of production for these systems and investigate in how far decent rural employment indicators explain different levels of efficiencies across different latent classes

The Econometrics of Panel Data László Mátyás, Patrick Sevestre, 2013-12-01 The aim of this volume is to provide a general overview of the econometrics of panel data both from a theoretical and from an applied viewpoint Since the pioneering papers by Edwin Kuh 1959 Yair Mundlak 1961 Irving Hoch 1962 and Pietro Balestra and Marc Nerlove 1966 the pooling of cross sections and time series data has become an increasingly popular way of quantifying economic relationships Each series provides information lacking in the other so a combination of both leads to more accurate and reliable results than would be achievable by one type of series alone Over the last 30 years much work has been done investigation of the properties of the applied estimators and test statistics analysis of dynamic models and the effects of eventual measurement errors etc These are just some of the problems addressed by this work In addition some specific difficulties associated with the use of panel data such as attrition heterogeneity selectivity bias pseudo panels etc have also been explored The first objective of this book which takes up Parts I and II is to give as complete and up to date a presentation of these theoretical developments as possible Part I is concerned with classical linear models and their extensions Part II deals with nonlinear models and related issues logit and probit models latent variable models duration and count data models incomplete panels and selectivity bias point processes and simulation techniques

Well-recognized econometric experts discuss the rapidly growing research in economics and finance and offer insight on the future direction of these fields. Focusing on micro models, the first group of chapters deals with LIMDEP Econometric Modeling Guide William H. Greene, 2002 The Measurement of Productive Efficiency and Productivity Growth Harold O. Fried, C. A. Knox Lovell, Shelton S. Schmidt, 2008-02-04 When Harold Fried et al published *The Measurement of Productive Efficiency: Techniques and Applications* with OUP in 1993, the book received a great deal of professional interest for its accessible treatment of the rapidly growing field of efficiency and productivity analysis. The first several chapters providing the background, motivation and theoretical foundations for this topic were the most widely recognized. In this tight direct update, these same editors have compiled over ten years of the most recent

research in this changing field and expanded on those seminal chapters The book will guide readers from the basic models to the latest cutting edge extensions and will be reinforced by references to classic and current theoretical and applied research It is intended for professors and graduate students in a variety of fields ranging from economics to agricultural economics business administration management science and public administration It should also appeal to public servants and policy makers engaged in business performance analysis or regulation
