Linux Iptables Pocket Reference 1st First Edition By Gregor N Purdy 2004:

Linux iptables Pocket Reference Gregor N. Purdy, 2004-08-25 Firewalls Network Address Translation NAT network logging and accounting are all provided by Linux's Netfilter system also known by the name of the command used to administer it iptables The iptables interface is the most sophisticated ever offered on Linux and makes Linux an extremely flexible system for any kind of network filtering you might do Large sets of filtering rules can be grouped in ways that makes it easy to test them and turn them on and off Do you watch for all types of ICMP traffic some of them quite dangerous Can you take advantage of stateful filtering to simplify the management of TCP connections Would you like to track how much traffic of various types you get This pocket reference will help you at those critical moments when someone asks you to open or close a port in a hurry either to enable some important traffic or to block an attack The book will keep the subtle syntax straight and help you remember all the values you have to enter in order to be as secure as possible The book has an introductory section that describes applications followed by a reference encyclopaedic section with all the matches and targets arranged alphabetically

A Semantic Wiki-based Platform for IT Service Management Kleiner, Frank, 2015-02-25 The book researches the use of a semantic wiki in the area of IT Service Management within the IT department of an SME An emphasis of the book lies in the design and prototypical implementation of tools for the integration of ITSM relevant information into the semantic wiki as well as tools for interactions between the wiki and external programs The result of the book is a platform for agile semantic wiki based ITSM for IT administration teams of SMEs
