## NAME

**man** — format and display the on-line manual pages

## SYNOPSIS

**man** *[--acdfbhkKrwW]* *[--path]* *[--m system]* *[--p string]* *[--C config\_file]* *[--M pathlist]* *[--P pager]* *[--B browser]* *[--H htmlpager]* *[--S section\_list]* *[section]* *name* ...

## DESCRIPTION

**man** formats and displays the on-line manual pages. If you specify *section*, **man** only looks in that section of the manual. *name* is normally the name of the manual page, which is typically the name of a command, function, or file. However, if *name* contains a slash (/) then **man** interprets it as a file specification, so that you can do **man /foo.5** or even **man /cd/foo/bar.1.gz**.

See below for a description of where **man** looks for the manual page files.

## MANUAL SECTIONS

The standard sections of the manual include:

- 1 User Commands
- 2 System Calls
- 3 C Library Functions
- 4 Devices and Special Files
- 5 File Formats and Conventions
- 6 Games et. Al.
- 7 Miscellaneous
- 8 System Administration tools and Daemons

Distributions customize the manual section to their specifics, which often include additional sections.

## OPTIONS

- C config\_file**  
Specify the configuration file to use; the default is `/private/etc/man.conf`. (See `man.conf(5)`.)
- M path**  
Specify the list of directories to search for man pages. Separate the directories with colons. An empty list is the same as not specifying **-M** at all. See `SEARCH PATH FOR MANUAL PAGES`.
- P pager**  
Specify which pager to use. This option overrides the `MANPAGER` environment variable, which in turn overrides the `PAGER` variable. By default, **man** uses `/usr/bin/less -is`.
- B**  
Specify which browser to use on HTML files. This option overrides the `BROWSER` environment variable. By default, **man** uses `/usr/bin/less-is`.
- H**  
Specify a command that renders HTML files as text. This option overrides the `HTMLPAGER` environment variable. By default, **man** uses `/bin/cat`.
- S section\_list**  
List is a colon separated list of manual sections to search. This option overrides the `MANSECT` environment variable.
- a**  
By default, **man** will exit after displaying the first manual page it finds. Using this option forces **man** to display all the manual pages that match *name*, not just the first.
- c**  
Reformat the source man page, even when an up-to-date cat page exists. This can be meaningful if the cat page was formatted for a screen with a different number of columns, or if the
