Technology and English Language Teaching in a Changing World Ju Seong Lee, Di Zou, Michelle Mingyue Gu, 2024-04-03 This edited book explores the integration of technology into English language education with a particular focus on extracurricular and extramural contexts. The editors and an international team of scholars discuss how English teachers can critically and systematically design and implement language activities inside and outside the classroom to improve students' receptive and productive skills. The book also discusses how teachers can harness technology to enhance their teaching practices. The combination of theory, digital materials, teaching activities, evidence-based reflections, and a focus on Extracurricular and Extramural contexts will make this book an invaluable resource for pre-service and in-service language teachers on ESL, EFL, and TESOL courses as well as researchers in Applied Linguistics. Chapter 12 is available open access under a Creative Commons Attribution 4.0 International License via link.springer.com. *The Geometry Toolbox for Graphics and Modeling* Gerald Farin, Dianne Hansford, 2017-07-12 The Geometry Toolbox takes a novel and particularly visual approach to teaching the basic concepts of two and three dimensional geometry. It explains the geometry essential for today's computer modeling, computer graphics, and animation systems. While the basic theory is completely covered, the emphasis of the book is not on abstract proofs but rather on examples and algorithms. The Geometry Toolbox is the ideal text for professionals who want to get acquainted with the latest geometric tools. The chapters on basic curves and surfaces form an ideal stepping stone into the world of graphics and modeling.
